Returns from sawmill operators in October for provinces east of the Rockies, excepting Manitoba, Saskatchewan and Alberta accounted for 68.9 per cent of the production in 1962. From these returns preliminary estimates for all mills covered in these provinces have been prepared. Data for Manitoba is not available, while data for Saskatchewan was supplied by the Saskatchewan Timber Board and for Alberta by the Alberta Bureau of Statistics.

According to these calculations, the production of sawn lumber east of the Rockies (excluding sawn ties) amounted to 250,878 M ft. b.m. in October 1964 as compared with 312,241 M ft. the previous month and 204,785 M ft. in October 1963.

Table 1 gives a comparative summary of the production of reporting operators, the estimated production of all operators and shipments and stocks on hand of reporting operators. This table shows that the reported production in October registered a decrease of 7 per cent from the previous month but increased 36 per cent over October 1963. Estimated production of all operators decreased 20 per cent from September 1964 but increased 23 per cent over October 1963. Shipments of reporting operators totalled 242,993 M ft. in October 1964 as compared with 219,286 M ft. in September 1964, an increase of 11 per cent. Reported stocks at the end of October 1964 were 498,788 M ft. as compared with 543,719 M ft. on the last day of September 1964, a decrease of 8 per cent.

It is to be noted that the figures presented in tables 2 to 5 may cover different mills from month to month and also that quantities for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

Table 3 gives particulars of reported shipments only. It is to be noted, however, that the first destination only is given and that some of the lumber reported as having been shipped by the producers may have been or may be reshipped by the purchasers and reported by them also, thereby causing a certain amount of duplication.

Tables 4 and 5 give details of Stocks at end of month and purchases during the month for reporting mills only.

Table 6 shows the number of operators reporting by provinces and also the percentage of the sample to the 1962 production of all mills covered.

Note: Tables 1 to 6 of this survey deal with production in all provinces east of the Rockies (except Newfoundland, the Yukon and Northwest Territories) shipments from sawmills in those provinces to the various domestic and foreign markets, stocks of sawn lumber on hand in sawmill yards at the end of the month and lumber purchased by reporting operators during month. This survey is in most cases, restricted to mills having an annual output of 500,000 feet board measure or more. These mills accounted for almost 90 per cent of the total production of sawn lumber in 1962 in the eight provinces covered. The 1964 data for Alberta, contained in this report, have been supplied by the Alberta Bureau of Statistics.

PRODUCTION, EXPÉDITIONS ET STOCKS EN MAINS DES SCIERIES  
À L'EST DES ROCHEUSES

OCTOBRE 1964

D'après les rapports reçus des exploitants en octobre, les scieries des provinces situées à l'est des Rocheuses, le Manitoba, la Saskatchewan et de l'Alberta exceptés, ont été comptables de 68.9 p. 100 de la production totale de 1962. D'après ces rapports, on a établi des estimations provisoires à l'égard de toutes les scieries enquêtées dans ces provinces. Les chiffres du Manitoba ne sont pas disponibles; ceux de la Saskatchewan ont été fournis par la Saskatchewan Timber Board, et ceux de l'Alberta, par le Bureau de la statistique de l'Alberta.

D'après ces calculs, la production de sciage à l'est des Rocheuses (traverses sciées exclues) a atteint 250,878 M p.m.p. en octobre 1964 comparativement à 312,241 M p.m.p. le mois précédent et 204,785 M p.m.p. en octobre 1963.

Le tableau 1 donne un résumé comparé de la production des exploitants déclarants, de la production estimative de tous les exploitants et des expéditions et des stocks des exploitants déclarants. Ce tableau fait voir que la production déclarée en octobre diminue de 7 p. 100 comparativement au mois précédent, mais augmente de 36 p. 100 au regard du mois d'octobre 1963. La production estimative de tous les exploitants diminue de 20 p. 100 comparativement au mois de septembre 1964 mais augmente de 23 p. 100 au regard d'octobre 1963. Les expéditions des exploitants déclarants s'établissent en octobre 1964, au total, à 242,993 M p.m.p. au regard de 219,286 M p.m.p. en septembre 1964, une augmentation de 11 p. 100. Les stocks déclarés à la fin d'octobre 1964 sont de 498,788 M p.m.p. comparativement à 543,719 M p.m.p. le dernier jour de septembre 1964, une diminution de 8 p. 100.

Il faut remarquer que les chiffres des tableaux 2 à 6 peuvent s'appliquer à des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks comprennent parfois du bois acheté par certains moulins pour revente.

Les détails sur les expéditions déclarées seulement paraissent au tableau 3. A noter cependant, que seule la première destination est indiquée et qu'une partie du bois déclarée comme ayant été expédiée par les producteurs a pu ou pourra être réexpédiée et déclarée aussi par les acheteurs, causant ainsi un certain double emploi.

Les tableaux 4 et 5 donnent le détail des stocks à la fin du mois, et les achats des moulins déclarants seulement.

Le tableau 6 donne le nombre d'exploitants déclarants, par province, ainsi que le pourcentage de l'échantillon en fonction de la production de toutes les scieries enquêtées en 1962.

Nota: Les tableaux 1 à 6 du présent rapport portent sur la production de bois scié dans toutes les provinces à l'est des Rocheuses, (sauf Terre-Neuve, le Yukon et les Territoires du Nord-Ouest), sur les expéditions des scieries de ces provinces aux divers marchés intérieurs et étrangers, sur les stocks de bois scié dans les cours de scieries à la fin du mois et sur le bois acheté au cours du mois par les exploitants déclarants. Dans la plupart des cas la présente enquête se limite aux scieries dont la production annuelle est de plus de 500,000 pieds-planche ou plus. Ces scieries ont été comptables, en 1962, de près de 90 p. 100 de la production totale de sciage dans les huit provinces observées. Le Bureau de la statistique de l'Alberta a fourni les chiffres pour cette province en 1964.
