PRODUCTION, SHIPMENTS
 AND STOCKS ON HAND OF SAWMILLS
 EAST OF THE ROCKIES

PRODUCTION, EXPEDITIONS
 ET STOCKS EN MAINS DES SCIERIES
 A L'EST DES ROCHEUSES

DECEMBER, 1947.

DECEMBRE, 1947

Ottawa, February 27, 1948. - Returns from 976 sawmill operators were compiled for December, these mills accounting for 61.64 per cent of the total output east of the Rockies in 1945. From these returns, preliminary estimates for all mills in the provinces covered have been prepared, to which have been added estimates of production in British Columbia, prepared by the Timber Controller, Department of Reconstruction and Supply.

Ottawa, le 27 février 1948. - Les rapports de 976 exploitants ont été colligés pour décembre, dont les moulins ont contribué 61.64 p.c. de la production à l'est des Rocheuses en 1945. Grâce à ces rapports, on a pu faire des estimations préliminaires pour toutes les scieries de ces provinces, auxquels chiffres on a ajouté les estimations de la production en Colombie-Britannique, préparées par la Régie du bois, Ministère de la Reconstruction et des Approvisionnements.

According to these calculations, Canadian production of sawn lumber (excluding sawn ties) amounted to 276,330 M ft. b.m. in December as compared with 310,272 M ft. the previous month and with 270,690 M ft. in December 1946. Estimates by provinces are given below.

D'après ces calculs, la production canadienne de bois d'oeuvre (traverses sciées exclues) aurait atteint 276,330 M p.m.p. en décembre, comparative-ment à 310,272 M p.m.p. le mois précédent et à 270,690 M p.m.p. en décembre 1946. Les estimations par province sont données ci-dessous.

This table shows that production east of the Rockies in December registered a decrease of 25.24 p.c. from the previous month and a decrease of 14.85 p.c. from December 1946, while production in British Columbia recorded a decrease of 3.29 p.c. from the previous month but an increase of 11.22 p.c. over December 1946. Total Canadian production of sawn lumber in December is 10.94 p.c. lower than the previous month but 2.08 p.c. higher than in December 1946.

Tables 1 to 5 give, as in the past, only the production, shipments and stocks of the mills reporting. Table 1 gives a comparative summary of production, shipments and stocks on hand for the twelve months of 1947. Production in December (51,532 M ft.) was lower than the previous month (72,027 M ft.) but the coverage was smaller. Shipments totalled 124,376 M ft. in December, as compared with 138,531 M ft. in November, and stocks on hand at the end of December amounted to 288,179 M ft., as compared with 393,364 M ft. on the last day of November. It is to be noted that all these figures may cover different mills from month to month and also that figures for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

The 231 mills which reported sawing in December produced 46,157 M ft. of softwoods, and 5,375 M ft. of hardwoods. This compared with 308 mills reporting the production of 62,778 M ft. of softwoods and 9,249 M ft. of hardwoods in November. The number of active mills decreased in most provinces. Details by provinces and species are given in Table 2.

Shipments during December were reported by 374 operators, as compared with 473 in November. Particulars of shipments are given in Table 3. It is to be noted, however, that the first destination only is given and that some of the lumber shipped to wholesalers and exporters will eventually be reshipped to other provinces or exported. Similarly, much of the lumber shipped to wholesalers and retailers will eventually be used by building contractors, manufacturers and others.

Table 4 gives details of sawmill lumber stocks by provinces and by species, separating lumber sold but not shipped and lumber unsold. Stocks by species are further separated by grades, and unsold stocks are classified by thicknesses. Stocks at the end of December reported by 254 mills, amounted to 288,179 M ft., of which 239,656 M ft. were sold and 48,523 M ft. unsold.

Ce tableau indique que la production à l'est des Rocheuses en décembre a enregistré une diminution de 25.24 p.c. sur le mois précédent et une diminution de 14.85 p.c. sur décembre 1946, tandis que la production en Colombie-Britannique indique une diminution de 3.29 p.c. sur le mois précédent, mais une augmentation de 11.22 p.c. sur décembre 1946. La production totale canadienne de bois d'œuvre en décembre est de 10.94 p.c. plus basse que le mois précédent mais supérieure de 2.08 p.c. à celle de décembre 1946.

Les tableaux 1 à 5 donnent, comme précédemment, la production, les expéditions et les stocks des seules scieries qui ont fait rapport. Le tableau 1 donne un résumé comparatif de la production, des expéditions et des stocks en mains pour les douze mois de 1947. La production en décembre (51,532 M p.) a été inférieure à celle du mois précédent (72,027 M p.) mais le pourcentage de l'échantillon était moindre. Les expéditions ont atteint 124,376 M p. en décembre comparative-ment à 138,531 M p. en novembre; et les stocks en mains à la fin de décembre s'élevaient à 288,179 M p., comparativement à 393,364 M p. le dernier jour de novembre. Il faut remarquer que tous ces chiffres couvrent parfois des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks en mains comprennent dans certains cas du bois acheté par certains moulins pour la revente.

Les 231 moulins qui ont rapporté du sciage en décembre ont produit 46,157 M p. de bois tendre et 5,375 M p. de bois dur. Pour novembre, 308 scieries ont rapporté la production de 62,778 M p. de bois tendre et 9,249 M p. de bois dur. Le nombre de scieries actives a diminué dans la plupart des provinces. Les détails par province et par essence paraissent au tableau 2.

Les expéditions en décembre ont été déclarées par 374 exploitants, comparativement à 473 pour novembre, et paraissent en détail au tableau 3. A noter, cependant, que la première destination seulement est indiquée et qu'une partie du bois expédié aux grossistes et exportateurs sera éventuellement ré-expédiée à d'autres provinces ou exportée. De même une grande partie du bois expédié aux grossistes et aux détaillants sera ultimement utilisée par les entrepreneurs en construction, les manufacturiers et d'autres.

Les stocks de bois aux mains des scieries, par province et par essence, paraissent en détail au tableau 4, distinction étant faite entre le bois vendu mais non expédié et le bois non vendu. Les stocks par essence sont de plus séparés selon la qualité et les stocks non vendus sont classifiés selon l'épaisseur. Les stocks déclarés à la fin de décembre par 254 moulins s'élevaient à 288,179 M p., dont 239,656 M p. vendus et 48,523 M p. non vendus.

Table 5 shows the number of operators reporting, by provinces, and also the percentage of the sample to the 1945 production of all mills in the provinces covered.

Le tableau 5 donne le nombre d'exploitants faisant rapport, par province, et aussi le pourcentage de l'échantillon en fonction de la production de toutes les scieries dans les provinces concernées pour 1945.

NOTE: Tables 1 to 5 of this survey deal with production in all provinces except British Columbia, shipments from sawmills in those provinces to the various domestic and foreign markets and to the various classes of customers, and stocks of sawn lumber on hand in sawmill yards at the end of the month. This survey is restricted to mills having an annual output of 500,000 or more feet board measure, except in Prince Edward Island where it also includes mills in the 200 to 499 M ft. class. Sawmills in the 500,000 feet and over class accounted for 80.06 per cent of the total production of sawn lumber in 1945, in the eight provinces covered.

NOTA: Les tableaux 1 à 5 de ce relevé portent sur la production de bois scié dans toutes les provinces sauf la Colombie-Britannique, sur les expéditions des scieries de ces provinces aux divers marchés domestiques et étrangers et aux diverses catégories de clients, et sur les stocks de bois scié, en mains dans les cours des scieries à la fin du mois. Ce relevé est limité aux scieries dont la production annuelle est de 500,000 pieds ou plus, mesure de planche, sauf dans le cas de l'île du Prince-Edouard où il comprend aussi les scieries, produisant de 200 à 499 M p. Les scieries dont la production atteignait ou dépassait 500,000 pieds ont contribué en 1945 80.06 p.c. de la production totale de bois scié dans les huit provinces en question.
