PRODUCTION, SHIPMENTS  
AND STOCKS ON HAND OF SAWMILLS

PRODUCTION, EXPEDITONS  
ET STOCKS EN MAINS DES SCIERIES

MAY, 1947.

MAI 1947.

Ottawa, July 25, 1947. - Returns from 763 sawmill operators were compiled for May, these mills accounting for 53.81 per cent of the total output east of the Rockies in 1945. From these returns, preliminary estimates for all mills in the provinces covered have been prepared, to which have been added estimates of production in British Columbia, prepared by the Timber Controller, Department of Reconstruction and Supply.

Ottawa, le 25 juillet 1947. - Les rapports de 763 exploitants ont été colligés pour mai, dont les moulins ont contribué 53.81 p.c. de la production à l'est des Rocheuses en 1945. Grâce à ces rapports, on a pu faire des estimations préliminaires pour toutes les scieries de ces provinces, auxquels chiffres on a ajouté les estimations de la production en Colombie-Britannique, préparées par la Régie du bois, Ministère de la Reconstruction et des Approvisionnements.

According to these calculations, Canadian production of sawn lumber(excluding sawn ties) amounted to 415,331 M ft.b.m. in May, as compared with 351,945 M ft. the previous month and with 383,210 M ft. in May 1946. Estimates by provinces are given below.

D'après ces calculs, la production canadienne de bois d'oeuvre (traversee sciées exclues) aurait atteint 415,331 M p.m.p. en mai, comparativement à 351,945 M p.m.p. le mois précédent et à 383,210 M p.m.p. en mai 1946. Les estimations par province sont données ci-dessous.

This Table shows that production east of the Rockies in May registered an increase of 48.20 per cent over the previous month but a decrease of 28.33 per cent from May 1946, while production in British Columbia recorded a decrease of 1.46 per cent from the previous month but an increase of 115.34 per cent over May 1946. Total Canadian production of sawn lumber in May is 18.01 per cent higher than the previous month and 8.38 per cent higher than in May 1946.

Tables 1 to 5 give, as in the past, only the production, shipments and stocks of the mills reporting. Table 1 gives a comparative summary of production, shipments and stocks on hand for the first five months of 1947. Production in May (112,289 M ft.) was higher than the previous month (75,694 M ft.) but the coverage was smaller. Shipments totalled 131,202 M ft. in May, as compared with 103,271 M ft. in April, and stocks on hand at the end of May amounted to 270,490 M ft., as compared with 309,461 M ft. on the last day of April. It is to be noted that all these figures may cover different mills from month to month and also that figures for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

The 451 mills which reported sawing in May produced 88,514 M ft. of softwoods and 23,775 M ft. of hardwoods. This compared with 382 mills reporting the production of 60,747 M ft. of softwoods and 14,947 M ft. of hardwoods in April. The number of active mills increased in all provinces except Manitoba, Alberta and Saskatchewan. Details by provinces and species are given in Table 2.

Shipments during May were reported by 483 operators, as compared with 419 in April. Particulars of shipments are given in Table 3. It is to be noted, however, that the first destination only is given and that some of the lumber shipped to wholesalers and exporters will eventually be reshipped to other provinces or exported. Similarly, much of the lumber shipped to wholesalers and retailers will eventually be used by building contractors, manufacturers and others.

Table 4 gives details of sawmill lumber stocks by provinces and by species, separating lumber sold but not shipped and lumber unsold. Stocks by species are further separated by grades, and unsold stocks are classified by thicknesses. Stocks at the end of May, reported by 311 mills, amounted to 270,490 M ft., of which 194,762 M ft. were sold and 75,728 M ft. unsold.

Ce tableau indique que la production à l'est des Rocheuses en mai a enregistré une augmentation de 48.20 p.c. sur le mois précédent mais une diminution de 28.33 p.c. sur mai 1946, tandis que la production en Colombie-Britannique indique une diminution de 1.46 p.c. sur le mois précédent mais une augmentation de 115.34 p.c. sur mai 1946. La production totale canadienne de bois d'oeuvre en mai est 18.01 p.c. plus haute que le mois précédent et supérieure de 8.38 p.c. à celle de mai 1946.

Les tableaux 1 à 5 donnent, comme précédemment, la production, les expéditions et les stocks des seules scieries qui ont fait rapport. Le tableau 1 donne un résumé comparatif de la production, des expéditions et des stocks en mains pour les cinq premiers mois de 1947. La production en mai (112,289 M p.) a été supérieure à celle du mois précédent (75,694 M p.) mais le pourcentage de l'échantillon était moindre. Les expéditions ont atteint 131,202 M p. en mai, comparativement à 103,271 M p. en avril, et les stocks en mains à la fin de mai s'élevaient à 270,490 M p., comparativement à 309,461 M p. le dernier jour d'avril. Il faut remarquer que tous ces chiffres couvrent parfois des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks en mains comprennent dans certains cas du bois acheté par certains moulins pour la revente.

Les 451 moulins qui ont rapporté du sciage en mai ont produit 88,514 M p. de bois tendre et 23,775 M p. de bois dur. Pour avril, 382 scieries ont rapporté la production de 60,747 M p. de bois tendre et 14,947 M p. de bois dur. Le nombre de scieries actives a augmenté dans toutes les provinces sauf le Manitoba, l'Alberta et la Saskatchewan. Les détails par province et par essence paraissent au tableau 2.

Les expéditions en mai ont été déclarées par 483 exploitants, comparativement à 419 pour avril, et paraissent en détail au tableau 3. A noter, cependant, que la première destination seulement est indiquée et qu'une partie du bois expédié aux grossistes et exportateurs sera éventuellement ré-expédiée à d'autres provinces ou exportée. De même une grande partie du bois expédié aux grossistes et aux détaillants sera ultimement utilisée par les entrepreneurs en construction, les manufacturiers et d'autres.

Les stocks de bois aux mains des scieries, par province et par essence, paraissent en détail au tableau 4, distinction étant faite entre le bois vendu mais non expédié et le bois non vendu. Les stocks par essence sont de plus séparés selon la qualité et les stocks non vendus sont classifiés selon l'épaisseur. Les stocks déclarés à la fin de mai par 311 moulins s'élèvent à 270,490 M p., dont 194,762 M p. vendus et 75,728 M p. non vendus.

Table 5 shows the number of operators reporting, by provinces, and also the percentage of the sample to the 1945 production of all mills in the provinces covered.

Le tableau 5 donne le nombre d'exploitants faisant rapport, par province, et aussi le pourcentage de l'échantillon en fonction de la production de toutes les scieries dans les provinces concernées pour 1945.

NOTE: Tables 1 to 5 of this survey deal with production in all provinces except British Columbia, shipments from sawmills in those provinces to the various domestic and foreign markets and to the various classes of customers, and stocks of sawn lumber on hand in sawmill yards at the end of the month. This survey is restricted to mills having an annual output of 500,000 or more feet board measure, except in Prince Edward Island where it also includes mills in the 200 to 499 M ft. class. Sawmills in the 500,000 feet and over class accounted for 80.06 per cent of the total production of sawn lumber in 1945, in the eight provinces covered.

NOTA: Les tableaux 1 à 5 de ce relevé portent sur la production de bois scié dans toutes les provinces sauf la Colombie-Britannique, sur les expéditions des scieries de ces provinces aux divers marchés domestiques et étrangers et aux diverses catégories de clients, et sur les stocks de bois scié, en mains dans les cours des scieries à la fin du mois. Ce relevé est limité aux scieries dont la production annuelle est de 500,000 pieds ou plus, mesure de planche, sauf dans le cas de l'île du Prince-Edouard où il comprend aussi les scieries produisant de 200 à 499 M p. Les scieries dont la production atteignait ou dépassait 500,000 pieds ont contribué en 1945 80.06 p.c. de la production totale de bois scié dans les huit provinces en question.
