PRODUCTION, SHIPMENTS
AND STOCKS ON HAND OF SAWMILLS
EAST OF THE ROCKIES

APRIL, 1948.

Ottawa, June 25, 1948. - Returns from 815 sawmill operators were compiled for April, these mills accounting for 57.27 per cent of the total output east of the Rockies in 1948. From these returns, preliminary estimates for all mills in the provinces covered have been prepared, to which have been added estimates of production in British Columbia, prepared by the Timber Controller, Department of Reconstruction and Supply.

According to these calculations, Canadian production of sawn lumber (excluding sawn ties) amounted to 353,349 M ft.b.m. in April, as compared with 409,652 M ft. the previous month and with 367,291 M ft. in April 1947. Estimates by provinces are given below.

PRODUCTION, EXPEDITIONS
ET STOCKS EN MAINS DES SCIERIES
A L'EST DES ROCHEUSES

AVRIL, 1948.

Ottawa, le 25 juin 1948. - Les rapports de 815 exploitants ont été colligés pour avril, dont les moulins ont contribué 57.27 p.c. de la production à l'est des Rocheuses en 1948. Grâce à ces rapports, on a pu faire des estimations préliminaires pour toutes les scieries de ces provinces, auxquels chiffres on a ajouté les estimations de la production en Colombie-Britannique, préparées par la Régie du bois, Ministère de la Reconstruction et des Approvisionnements.

D'après ces calculs, la production canadienne de bois d'oeuvre (traverses sciées exclues) aurait atteint 353,349 M p.m.p. en avril comparative-ment à 409,652 M p.m.p. le mois précédent et à 367,291 M p.m.p. en avril 1947. Les estimations par province sont données ci-dessous.

| Provinces | April--Avril | | | March--Mars | | | 4 months--4 mois | | |

This table shows that production east of the Rockies in April registered a decrease of 34.25 p.c. from the previous month and a decrease of 16.78 p.c. from April 1947, while production in British Columbia recorded an increase of 6.79 p.c. from the previous month and an increase of 6.00 p.c. over April 1947. Total Canadian production of sawn lumber in April is 13.75 p.c. less than the previous month and 3.80 lower than in April 1947.

Tables 1 to 5 give, as in the past, only the production, shipments and stocks of the mills reporting. Table 1 gives a comparative summary of production, shipments and stocks on hand for the first four months of 1948. Production in April (71,866 M ft.) was lower than the previous month (120,851 M ft.) but the coverage was smaller. Shipments totalled 100,145 M ft. in April, as compared with 126,533 M ft. in March, and stocks on hand at the end of April amounted to 289,058 M ft., as compared with 319,305 M ft. on the last day of March. It is to be noted that all these figures may cover different mills from month to month and also that figures for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

The 357 mills which reported sawing in April produced 56,804 M ft. of softwoods, and 15,062 M ft. of hardwoods. This compared with 366 mills reporting the production of 107,016 M ft. of softwoods and 13,835 M ft. of hardwoods in March. The number of active mills increased in Prince Edward Island, Quebec and Ontario, but due to decreases in all other provinces, the total remains practically the same. Details by provinces and species are given in Table 2.

Shipments during April were reported by 411 operators, as compared with 434 in March. Particulars of shipments are given in Table 3. It is to be noted, however, that the first destination only is given and that some of the lumber shipped to wholesalers and exporters will eventually be reshipped to other provinces or exported. Similarly, much of the lumber shipped to wholesalers and retailers will eventually be used by building contractors, manufacturers and others.

Table 4 gives details of sawmill lumber stocks by provinces and by species, separating lumber sold but not shipped and lumber unsold. Stocks by species are further separated by grades, and unsold stocks are classified by thicknesses. Stocks at the end of April reported by 367 mills, amounted to 289,058 M ft., of which 200,258 M ft. were sold and 88,800 M ft. unsold.

Ce tableau indique que la production à l'est des Rocheuses en avril a enregistré une diminution de 34.25 p.c. sur le mois précédent et une diminution de 16.78 p.c. sur avril 1947, tandis que la production en Colombie-Britannique indique une augmentation de 6.79 p.c. sur le mois précédent, et une augmentation de 6.00 p.c. sur avril 1947. La production totale canadienne de bois d'oeuvre en avril est de 13.75 p.c. plus basse que le mois précédent et inférieure de 3.80 p.c. à celle d'avril 1947.

Les tableaux 1 à 5 donnent, comme précédemment, la production, les expéditions et les stocks des seules scieries qui ont fait rapport. Le tableau 1 donne un résumé comparatif de la production, des expéditions et des stocks en mains pour les quatre premiers mois de 1948. La production en avril (71,866 M p.) a été inférieure à celle du mois précédent (120,851 M p.) mais le pourcentage de l'échantillon était moindre. Les expéditions ont atteint 100,145 M p. en avril comparativement à 126,533 M p. en mars; et les stocks en mains à la fin d'avril s'élevaient à 289,058 M p., comparativement à 319,305 M p. le dernier jour de mars. Il faut remarquer que tous ces chiffres couvrent parfois des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks en mains comprennent dans certains cas du bois acheté par certains moulins pour la revente.

Les 357 moulins qui ont rapporté du sciage en avril ont produit 56,804 M p. de bois tendre et 15,062 M p. de bois dur. Pour mars, 366 scieries ont rapporté la production de 107,016 M p. de bois tendre et 13,835 M p. de bois dur. Le nombre de scieries actives a augmenté dans l'Île du Prince-Edouard, le Québec et l'Ontario, mais à cause de diminutions dans les autres provinces, le total est demeuré à peu près le même. Les détails par province et par essence paraissent au tableau 2.

Les expéditions en avril ont été déclarées par 411 exploitants, comparativement à 434 pour mars, et paraissent en détail au tableau 3. A noter, cependant, que la première destination seulement est indiquée et qu'une partie du bois expédié aux grossistes et exportateurs sera éventuellement ré-expédiée à d'autres provinces ou exportée. De même une grande partie du bois expédié aux grossistes et aux détaillants sera ultimement utilisée par les entrepreneurs en construction, les manufacturiers et d'autres.

Les stocks de bois aux mains des scieries, par province et par essence, paraissent en détail au tableau 4, distinction étant faite entre le bois vendu mais non expédié et le bois non vendu. Les stocks par essence sont de plus séparés selon la qualité et les stocks non vendus sont classifiés selon l'épaisseur. Les stocks déclarés à la fin d'avril par 367 moulins s'élèvent à 289,058 M p., dont 200,258 M p. vendus et 88,800 M p. non vendus.

Table 5 shows the number of operators reporting, by provinces, and also the percentage of the sample to the 1945 production of all mills in the provinces covered.

Le tableau 5 donne le nombre d'exploitants faisant rapport, par province, et aussi le pourcentage de l'échantillon en fonction de la production de toutes les scieries dans les provinces concernées pour 1945.

NOTE: Tables 1 to 5 of this survey deal with production in all provinces except British Columbia, shipments from sawmills in those provinces to the various domestic and foreign markets and to the various classes of customers, and stocks of sawn lumber on hand in sawmill yards at the end of the month. This survey is restricted to mills having an annual output of 500,000 or more feet board measure, except in Prince Edward Island where it also includes mills in the 200 to 499 M ft. class. Sawmills in the 500,000 feet and over class accounted for 80.06 per cent of the total production of sawn lumber in 1945, in the eight provinces covered.

NOTA: Les tableaux 1 à 5 de ce relevé portent sur la production de bois scié dans toutes les provinces sauf la Colombie-Britannique, sur les expéditions des scieries de ces provinces aux divers marchés domestiques et étrangers et aux diverses catégories de clients, et sur les stocks de bois scié, en mains dans les cours des scieries à la fin du mois. Ce relevé est limité aux scieries dont la production annuelle est de 500,000 pieds ou plus, mesure de planche, sauf dans le cas de l'île du Prince-Edouard où il comprend aussi les scieries, produisant de 200 à 499 M p. Les scieries dont la production atteignait ou dépassait 500,000 pieds ont contribué en 1945 80.06 p.c. de la production totale de bois scié dans les huit provinces en question.
