PRODUCTION, SHIPMENTS  
AND STOCKS ON HAND OF SAWMILLS  
EAST OF THE ROCKIES

PRODUCTION, EXPÉDITIONS  
ET STOCKS EN MAINS DES SCIERIES  
A L'EST DES ROCHEUSES

OCTOBER, 1950

OCTOBRE, 1950

Returns from 1,128 sawmill operators were compiled for October, these mills accounting for 60.95 per cent of the total output east of the Rockies in 1948. From these returns, preliminary estimates for all mills in the provinces covered have been prepared.

According to these calculations, the production of sawn lumber, east of the Rockies (excluding sawn ties) amounted to 182,434 M ft. p.m. in October, as compared with 258,188 M ft. the previous month and with 137,702 M ft. in October 1949.

Table 1 gives a comparative summary of the production of reporting operators, the estimated production of all operators, and shipments and stocks on hand of reporting operators. This Table shows the reported production in October registered a decrease of 24.74% from the previous month but an increase of 29.67% over October 1949, while estimated production of all operators decreased 29.34% from September 1950 but increased 32.48% over October 1949. Shipments of reporting operators totalled 160,814 M ft. in October as compared with 174,086 M ft. in September, a decrease of 7.62% and reported stocks on hand at the end of October amounted to 370,594 as compared with 399,483 M ft. on the last day of September, a decrease of 7.23%.

Tables 2 to 5 give the production, shipments and stocks on hand of the mills reporting only. It is to be noted that all these figures may cover different mills from month to month and also that quantities for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

Les rapports de 1,128 exploitants ont été colligés pour octobre dont les moulins ont contribué 60.95 p.c. de la production à l'est des Rocheuses en 1948. Grâce à ces rapports, on a pu faire des estimations préliminaires pour toutes les scieries de ces provinces.

D'après ces calculs, la production de bois d'œuvre à l'est des Rocheuses (traverses sciées exclues) aurait atteint 182,434 M p.m.p. en octobre comparativement à 258,188 M p.m.p. le mois précédent et à 137,702 M p.m.p. en octobre 1949.

Le tableau 1 donne un résumé comparé de la production des exploitants qui font rapport, de la production estimative de tous les exploitants, et des expéditions et des stocks des exploitants qui font rapport. Ce tableau fait voir que la production déclarée en octobre diminue de 24.74 p. 100 comparativement au mois précédent mais augmente de 29.67 p. 100 comparativement à octobre 1949. Par ailleurs, la production estimative de tous les exploitants diminue de 29.34 p. 100 comparativement à septembre 1950 mais augmente de 32.48 p. 100 comparativement à octobre de 1949. Les expéditions des exploitants qui font rapport s'établissent, au total, à 160,814 M p. au regard de 174,086 M p. en septembre, diminution de 7.62 p. 100. Les stocks en mains déclarés à la fin d'octobre sont de 370,594 M p. comparativement à 399,483 M p. le dernier jour de septembre, diminution de 7.23 p. 100.

Les tableaux 2 à 5 donnent la production, les expéditions et les stocks des seules scieries qui font rapport. Il faut remarquer que tous ces chiffres peuvent s'appliquer parfois à des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks en mains comprennent parfois du bois acheté par certains moulins pour revende.

The 383 mills which reported sawing in October produced 107,368 M ft. of softwoods and 5,849 M ft. of hardwoods. This compared with 447 mills reporting the production of 142,556 M ft. of softwoods and 7,883 M ft. of hardwoods in September. Details by provinces and species are given in Table 2.

Shipments during October were reported by 496 operators, as compared with 549 in September. Particulars of shipments are given in Table 3. It is to be noted, however, that the first destination only is given and that some of the lumber shipped to wholesalers and exporters will eventually be reshipped to other provinces or exported. Similarly, much of the lumber shipped to wholesalers and retailers will eventually be used by building contractors, manufacturers and others.

Table 4 gives details of sawmill lumber stocks by provinces and by species, separating lumber sold but not shipped and lumber unsold. Stocks by species are further separated by grades, and unsold stocks are classified by thicknesses. Stocks at the end of October reported by 270 mills amounted to 370,594 M ft. of which 273,981 M ft. were sold and 96,613 M ft. unsold.

Table 5 shows the number of operators reporting, by provinces, and also the percentage of the sample to the 1948 production of all mills in the provinces covered.

NOTE: Tables 1 to 5 of this survey deal with production in all provinces east of the Rockies (except Newfoundland), shipments from sawmills in those provinces to the various domestic and foreign markets and to the various classes of customers, and stocks of sawn lumber on hand in sawmill yards at the end of the month. This survey is restricted to mills having an annual output of 500,000 or more feet board measure except in Prince Edward Island where it also includes mills in the 200 to 499 M ft. class. Sawmills in the 500,000 feet and over class accounted for 81.84 per cent of the total production of sawn lumber in 1948, in the eight provinces covered.

Les 383 moulins qui ont rapporté du sciage en octobre ont produit 107,368 M p. de bois tendre et 5,849 M p. de bois dur. Pour septembre, 447 scieries ont rapporté la production de 142,556 M p. de bois tendre et 7,883 M p. de bois dur. Les détails par province et par essence paraissent au tableau 2.

Les expéditions en octobre ont été déclarées par 496 exploitants, comparativement à 549 pour septembre, et paraissent en détail au tableau 3. A noter, cependant, que la première destination seulement est indiquée et qu'une partie du bois expédié aux grossistes et exportateurs sera éventuellement réexpédiée à d'autres provinces ou exportée. De même une grande partie du bois expédié aux grossistes et aux détaillants sera ultimement utilisée par les entrepreneurs en construction, les manufacturiers et d'autres.

Les stocks de bois aux mains des scieries, par province et par essence, paraissent en détail au tableau 4, distinction étant faite entre le bois vendu mais non expédié et le bois non vendu. Les stocks par essence sont de plus séparés selon la qualité et les stocks non vendus sont classifiés selon l'épaisseur. Les stocks déclarés à la fin d'octobre par 270 moulins s'élèvent à 370,594 M p. dont 273,981 M p. vendus et 96,613 M p. non vendus.

Le tableau 5 donne le nombre d'exploitants faisant rapport, par province, et aussi le pourcentage de l'échantillon en fonction de la production de toutes les scieries dans les provinces concernées pour 1948.

NOTA: Les tableaux 1 à 5 de ce relevé portent sur la production de bois scié dans toutes les provinces à l'est des Rocheuses, (sauf Terre-Neuve), sur les expéditions des scieries de ces provinces au divers marchés domestiques et étrangers et aux diverses catégories de clients, et sur les stocks de bois scié, en mains dans les cours des scieries à la fin du mois. Ce relevé est limité aux scieries dont la production annuelle est de 500,000 pieds ou plus, mesure de planche, sauf dans le cas de l'Île du Prince-Edouard où il comprend aussi les scieries produisant de 200 à 499 M p. Les scieries dont la production atteignait ou dépassait 500,000 pieds ont contribué en 1948, 81.84 pour cent de la production totale de bois scié dans les huit provinces en question.

Table 1. - Comparative summary of production, shipments and stocks on hand.

Tableau 1. - Résumé comparé de la production, des expéditions et des stocks en mains.
