MARCH, 1950

MARS, 1950

Returns from 1,186 sawmill operators were compiled for March, these mills accounting for 63.49 per cent of the total output east of the Rockies in 1947. From these returns, preliminary estimates for all mills in the provinces covered have been prepared.

According to these calculations, the production of sawn lumber, east of the Rockies (excluding sawn ties) amounted to 202,260 M ft. b.m. in March, as compared with 178,797 M ft. the previous month and with 204,026 M ft. in March 1949.

Table 1 gives a comparative summary of the production of reporting operators, the estimated production of all operators, and shipments and stocks on hand of reporting operators. This Table shows the reported production in March registered an increase of 1.06% over the previous month and an increase of 4.54% over March 1949, while estimated production of all operators increased 13.12% over February 1950 but decreased .87% from March 1949. Shipments of reporting operators totalled 138,999 M ft. in March as compared with 121,607 M ft. in February, an increase of 14.30% and reported stocks on hand at the end of March amounted to 397,794 as compared with 404,637 M ft. on the last day of February, a decrease of 1.69%.

Tables 2 to 5 give the production, shipments and stocks on hand of the mills reporting only. It is to be noted that all these figures may cover different mills from month to month and also that quantities for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

Prepared in the Forestry Section  
Dominion Bureau of Statistics, Ottawa.

Les rapports de 1,186 exploitants ont été colligés pour mars dont les moulins ont contribué 63.49 p.c. de la production à l'est des Rocheuses en 1947. Grâce à ces rapports, on a pu faire des estimations préliminaires pour toutes les scieries de ces provinces.

D'après ces calculs, la production de bois d'oeuvre à l'est des Rocheuses (traverses sciées exclues) aurait atteint 202,260 M p.m.p. en mars comparativement à 178,797 M p.m.p. le mois précédent et à 204,026 M p.m.p. en mars 1949.

Le tableau 1 donne un résumé comparé de la production des exploitants qui font rapport, de la production estimative de tous les exploitants, et des expéditions et des stocks des exploitants qui font rapport. Ce tableau fait voir que la production déclarée en mars augmente de 1.06 p. 100 comparativement au mois précédent et augmente de 4.54 p. 100 comparativement à mars 1949. Par ailleurs, la production estimative de tous les exploitants augmente de 13.12 p. 100 comparativement à février 1950 mais diminue de .87 p. 100 comparativement à mars de 1949. Les expéditions des exploitants qui font rapport s'établissent, au total, à 138,999 M p. au regard de 121,607 M p. en février, augmentation de 14.30 p. 100. Les stocks en mains déclarés à la fin de mars sont de 397,794 M p. comparativement à 404,637 M p. le dernier jour de février, diminution de 1.69 p. 100.

Les tableaux 2 à 5 donnent la production, les expéditions et les stocks des seules scieries qui font rapport. Il faut remarquer que tous ces chiffres peuvent s'appliquer parfois à des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks en mains comprennent parfois du bois acheté par certains moulins pour revente.

Préparé dans la Section des Forêts.  
Bureau fédéral de la Statistique, Ottawa.

The 392 mills which reported sawing in March produced 113,664 M ft. of softwoods and 13,031 M ft. of hardwoods. This compared with 347 mills reporting the production of 116,154 M ft. of softwoods and 9,218 M ft. of hardwoods in February. Details by provinces and species are given in Table 2.

Shipments during March were reported by 497 operators, as compared with 457 in February. Particulars of shipments are given in Table 3. It is to be noted, however, that the first destination only is given and that some of the lumber shipped to wholesalers and exporters will eventually be reshipped to other provinces or exported. Similarly, much of the lumber shipped to wholesalers and retailers will eventually be used by building contractors, manufacturers and others.

Table 4 gives details of sawmill lumber stocks by provinces and by species, separating lumber sold but not shipped and lumber unsold. Stocks by species are further separated by grades, and unsold stocks are classified by thicknesses. Stocks at the end of March reported by 296 mills amounted to 397,794 M ft. of which 286,138 M ft. were sold and 112,656 M ft. unsold.

Table 5 shows the number of operators reporting, by provinces, and also the percentage of the sample to the 1947 production of all mills in the provinces covered.

NOTE: Tables 1 to 5 of this survey deal with production in all provinces east of the Rockies, (except Newfoundland), shipments from sawmills in those provinces to the various domestic and foreign markets and to the various classes of customers, and stocks of sawn lumber on hand in sawmill yards at the end of the month. This survey is restricted to mills having an annual output of 500,000 or more feet board measure except in Prince Edward Island where it also includes mills in the 200 to 499 M ft. class. Sawmills in the 500,000 feet and over class accounted for 83.26 per cent of the total production of sawn lumber in 1947, in the eight provinces covered.

Les 392 moulins qui ont rapporté du sciage en mars ont produit 113,664 M p. de bois tendre et 13,031 M p. de bois dur. Pour février, 347 scieries ont rapporté la production de 116,154 M p. de bois tendre et 9,218 M p. de bois dur. Les détails par province et par essence paraissent au tableau 2.

Les expéditions en mars ont été déclarées par 497 exploitants, comparativement à 457 pour février et paraissent en détail au tableau 3. À noter, cependant, que la première destination seulement est indiquée et qu'une partie du bois expédié aux grossistes et exportateurs sera éventuellement réexpédiée à d'autres provinces ou exportée. De même une grande partie du bois expédié aux grossistes et aux détaillants sera ultimement utilisée par les entrepreneurs en construction, les manufacturiers et d'autres.

Les stocks de bois aux mains des scieries, par province et par essence, paraissent en détail au tableau 4, distinction étant faite entre le bois vendu mais non expédié et le bois non vendu. Les stocks par essence sont de plus séparés selon la qualité et les stocks non vendus sont classifiés selon l'épaisseur. Les stocks déclarés à la fin de mars par 296 moulins s'élevèrent à 397,794 M p. dont 286,138 M p. vendus et 112,656 M p. non vendus.

Le tableau 5 donne le nombre d'exploitants faisant rapport, par province, et aussi le pourcentage de l'échantillon en fonction de la production de toutes les scieries dans les provinces concernées par 1947.

NOTA: Les tableaux 1 à 5 de ce relevé portent sur la production de bois scié dans toutes les provinces à l'est des Rocheuses, (sauf Terre-Neuve), sur les expéditions des scieries de ces provinces aux divers marchés domestiques et étrangers et aux diverses catégories de clients, et sur les stocks de bois scié, en mains dans les cours des scieries à la fin du mois. Ce relevé est limité aux scieries dont la production annuelle est de 500,000 pieds ou plus, mesure de planche, sauf dans le cas de l'île du Prince-Édouard où il comprend aussi les scieries produisant de 200 à 499 M p. Les scieries dont la production atteignait ou dépassait 500,000 pieds ont contribué en 1947 83.26 p.c. de la production totale de bois scié dans les huit provinces en question.
