PRODUCTION, SHIPMENTS
AND STOCKS ON HAND OF SAWMILLS
EAST OF THE ROCKIES

PRODUCTION, EXPÉDITIONS
ET STOCKS EN MAINS DES SCIÉRIES
A L'EST DES ROCHEUSES

FEBRUARY, 1953

FEVRIER, 1953

Returns from 1,179 sawmill operators were compiled for February, these mills accounting for 63.00 per cent of the total output east of the Rockies in 1950. From these returns, preliminary estimates for all mills in the provinces covered have been prepared.

According to these calculations, the production of sawn lumber, east of the Rockies (excluding sawn ties) amounted to 269,116 M ft. b.m. in February, as compared with 214,898 M ft. the previous month and with 232,874 M ft. in February 1952.

Table 1 gives a comparative summary of the production of reporting operators, the estimated production of all operators, and shipments and stocks on hand of reporting operators. This table shows the reported production in February registered an increase of 26.60% over the previous month and an increase of 16.10% over February 1952, while estimated production of all operators increased 25.22% over January 1953 and increased 15.56% over February 1952. Shipments of reporting operators totalled 145,772 M ft. in February as compared with 126,395 M ft. in January, an increase of 15.33% and reported stocks on hand at the end of February amounted to 503,349 as compared with 435,747 M ft. on the last day of January, an increase of 15.51%.

Tables 2 to 5 give the production, shipments and stocks on hand of the mills reporting only. It is to be noted that all these

Les rapports de 1,179 exploitants ont été colligés pour février dont les moulins ont contribué 63.00 p.c. de la production à l'est des Rocheuses en 1950. Grâce à ces rapports, on a pu faire des estimations préliminaires pour toutes les scieries de ces provinces.

D'après ces calculs, la production de bois d'œuvre à l'est des Rocheuses (traverses sciées exclues) aurait atteint 269,116 M p.m.p. en février comparativement à 214,898 M p.m.p. le mois précédent et à 232,874 M p.m.p. en février 1952.

Le tableau 1 donne un résumé comparé de la production des exploitants qui font rapport, de la production estimative de tous les exploitants, et des expéditions et des stocks des exploitants, qui font rapport. Ce tableau fait voir que la production déclarée en février augmente de 26.60 p. 100 comparativement au mois précédent et augmente de 16.10 p. 100 comparativement à février 1952. Par ailleurs, la production estimative de tous les exploitants augmente de 25.22 p. 100 comparativement à janvier de 1953 et augmente de 15.56 p. 100 comparativement à février de 1952. Les expéditions des exploitants qui font rapport s'établissent, au total, à 145,772 M p. au regard de 126,395 M p. en janvier augmentation de 15.33 p. 100. Les stocks en mains déclarés à la fin de février sont de 503,-349 M p. comparativement à 435,747 M p. le dernier jour de janvier augmentation de 15.51 p. 100.

Les tableaux 2 à 5 donnent la production, les expéditions et les stocks des seules scieries qui font rapport. Il faut remarquer que tous ces chif-

Bureau fédéral de la statistique, Ottawa.

figures may cover different mills from month to month and also that quantities for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

The 446 mills which reported sawing in February produced 159,853 M ft. of softwoods and 13,471 M ft. of hardwoods. This compared with 420 mills reporting the production of 125,269 M ft. of softwoods and 11,640 M ft. of hardwoods in January. Details by provinces and species are given in Table 2.

Shipments during February were reported by 535 operators, as compared with 502 in January. Particulars of shipments are given in Table 3. It is to be noted, however, that the first destination only is given and that some of the lumber shipped to wholesalers and exporters will eventually be reshipped to other provinces or exported. Similarly, much of the lumber shipped to wholesalers and retailers will eventually be used by building contractors, manufacturers and others.

Table 4 gives details of sawmill lumber stocks by provinces and by species, separating lumber sold but not shipped and lumber unsold. Stocks by species are further separated by grades, and unsold stocks are classified by thicknesses. Stocks at the end of February reported by 328 mills amounted to 503,349 M ft. of which 319,430 M ft. were sold and 183,-919 M ft. unsold.

Table 5 shows the number of operators reporting, by provinces, and also the percentage of the sample to the 1950 production of all mills in the provinces covered.

NOTE: Tables 1 to 5 of this survey deal with production in all provinces east of the Rockies (except Newfoundland), shipments from sawmills in those provinces to the various domestic and foreign markets and to the various classes of customers, and stocks of sawn lumber on hand in sawmill yards at the end of the month. This survey is restricted to mills having an annual output of 500,000 or more feet board measure except in Prince Edward Island where it also includes mills in the 200 to 499 M ft. class. Sawmills in the 500,000 feet and over class accounted for 83.46 per cent of the total production of sawn lumber in 1950, in the eight provinces covered.

fres peuvent s'appliquer parfois à des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks en mains comprennent parfois du bois acheté par certains moulins pour revente.

Les 446 moulins qui ont rapporté du sciage en février ont produit 159,853 M p. de bois tendre et 13,471 M p. de bois dur. Pour janvier, 420 scieries ont rapporté la production de 125,269 M p. de bois tendre et 11,640 M p. de bois dur. Les détails par province et par essence paraissent au tableau 2.

Les expéditions en février ont été déclarées par 535 exploitants, comparativement à 502 pour janvier, et paraissent en détail au tableau 3. A noter, cependant, que la première destination seulement est indiquée et qu'une partie du bois expédié aux grossistes et exportateurs sera éventuellement ré-expédiée à d'autres provinces ou exportée. De même une grande partie du bois expédié aux grossistes et aux détaillants sera ultimement utilisée par les entrepreneurs en construction, les manufacturiers et d'autres.

Les stocks de bois aux mains des scieries par province et par essence, paraissent en détail au tableau 4, distinction étant faite entre le bois vendu mais non expédié et le bois non vendu. Les stocks par essence sont de plus séparés selon la qualité et les stocks non vendus sont classifiés selon l'épaisseur. Les stocks déclarés à la fin de février par 328 moulins s'élèvent à 503,349 M p. dont 319,430 M p. vendus et 183,919 M p. non vendus.

Le tableau 5 donne le nombre d'exploitants faisant rapport, par province, et aussi le pourcentage de l'échantillon en fonction de la production de toutes les scieries dans les provinces concernées pour 1950.

NOTA: Les tableaux 1 à 5 de ce relevé portent sur la production de bois scié dans toutes les provinces à l'est des Rocheuses, (sauf Terre-Neuve), sur les expéditions des scieries de ces provinces au divers marchés domestiques et étrangers et aux diverses catégories de clients, et sur les stocks de bois scié, en mains dans les cours des scieries à la fin du mois. Ce relevé est limité aux scieries dont la production annuelle est de 500,000 pieds ou plus, mesure de planche, sauf dans le cas de l'Île du Prince-Edouard où il comprend aussi les scieries produisant de 200 à 499 M p. Les scieries dont la production atteignait ou dépassait 500,000 pieds ont contribué en 1950, 83.46 pour cent de la production totale de bois scié dans les huit provinces en question.
