## British Columbia Sawnilis

Coast Mills producing less than 500 Mft . b.m. per year and Interior Mills producing less than $3,000 \mathrm{M} \mathrm{ft}$. b.m. per year are excluded from this survey. For these small mills and any larger mills that fall to report the January 1967 production has been estimated on the basis of log scale figures for the previous year, supplied by the B.C. Forest Service. The stocks of non-reporting mills have been estimated inftially on the basis of the estimated production and the ratio between stocks and production of reporting mills. In following months production and stocks of non-reporting mills will be estimated on the basis of the inftial production and stock estimates and the rate of increase or decrease in production and stocks of the reporting mills. The total of unduplicated shipments is calculated from the total production (reported and estimated) and the increase or decrease in total stocks (reported and estimated).

The species distribution of estimated production and estimated stocks is based on the species distribution of reported production and reported stocks.

Table 3 gives the distribution of shipments reported by sawmills and planing mills. It is to be noted that the reported destinations are not necessarily final destinations. The shipments to points in B.C. In particular include sales to lumber dealers who are not included in this survey. Undoubtedly part of this lumber is subsequently shipped to other destinations. The reported shipments to points in B.C. also include sales to other sawmills or planing mills in B.C. who axe included in this survey. The further shipment of this lumber by the purchasing milis is also included in the reported shipments. This leads to duplication in the figures for shipments by destination, overstating the shipments to points in B.C. The quantities of lumber purchased by reporting mills from other mills are shown in Table 7.

While the reported shipments by destination, particularly the reported shipments to points in B.C., contain some duplication, the total of reported shipments and estimated shipments and adjustments is free of duplication.

The co-operation of the Forest Service and of the British Columbia Lumber Manufacturers' Division of the Council of the Forest Industries of B.C., The Interior Lumber Manufacturers' Association and the Northern Interior Lumbermen's Association is gratefully acknowledged.
