THE FURNITURE INDUSTRY IN CANADA
1925 and 1926.

Ottawa, January 1928.- A report on the furniture industry for 1925 and 1926 has just been issued by the Forest Products Branch of the Dominion Bureau of Statistics. This is one of the most important wood-using industries in Canada and includes the manufacture of household furniture, upholstery and repair establishments, firms manufacturing store and office furniture and fixtures and those making wicker furniture and wickerware. The total gross value of the products of this group of industries in 1926 was \$31,293,442 as compared to \$27,110,462 in 1925. This includes the products of factories engaged primarily in the manufacture of furniture and represents the greater part of these products made in Canada. There are however a number of other woodworking factories that manufacture furniture and do cabinetwork as a side line but which are included under some other class of manufacturing industry.

The furniture industry in Canada is at present centred in southwestern Ontario. Out of a total of 331 establishments 201 were located in Ontario in 1926, 65 were in Quebec, 23 in British Columbia, 20 in Manitoba and the remainder scattered among the other four provinces. The total capital invested in the industry in 1926 was \$34,070,226 as compared to \$32,864,975 in 1925. The manufacture of furniture gave employment to 9,135 male and 665 female workers in 1926 paying a total of \$10,457,420 in wages and salaries. Fuel used in 1926 was valued at \$365,915 and a total of 18,083 horse power was used in the process of manufacture.

Tables 1 to 6 accompanying this report give further details concerning the principal statistics, distribution of establishments, capital, employees, fuel used and power employed in this industry in 1925 and 1926.

Tables 7 and 8 cover the materials used and products manufactured in furniture factories.

The most important material used in the manufacture of furniture is sawn lumber. The hardwood used is to a large extent imported from the United States and tropical sources while the softwoods are chiefly the product of Canadian saw-mills. The total value of materials of all kinds in 1926 was \$11,364,955. Softwood lumber amounted to 28,235 M. ft. B.M. valued at \$963,959, hardwood lumber to 52,399 M. ft. valued at \$3,056,715 and veneer and ply-wood to 17,542 M. suff. ft. valued at \$820,891. Textile coverings, hardware, paints, oils, varnishes, leather etc. were among the more important of the remaining items which were valued at \$6,523,390.

The furniture manufactured by this industry consists chiefly of household furniture which in 1926 was valued at \$16,758,156, and was made up of bedroom, dining room, parlour, miscellaneous household furniture and kitchen furniture in the order of importance named. Upholstery and mattresses were valued at \$4,037,141 and the next most important items were those of office and store furniture and fixtures at \$3,509,437, refrigerators \$934,559, radio and phonograph cabinets \$859,964, school, lodge, church and theatre furniture at \$791,226, wicker, rattan reed and willow furniture \$724,865, phonograph sets and accessories \$571,482, other less important classes were miscellaneous cabinet work, baby carriages and furniture frames. A total of \$520,971 was received for repair work and other miscellaneous products of all classes amounted to \$2,585,641.

The market for Canadian furniture is chiefly domestic as shown by the fact that only \$405,361 worth of Canadian-made furniture was exported during the fiscal year ending March 1927 while the total annual production averaged over thirty one million dollars. The imports of furniture amounted to \$1,957,739 during the fiscal year 1926-1927.

1. The first part of the report deals with the general situation of the country and the progress of the war.

2. The second part of the report deals with the military operations and the results of the campaigns.

3. The third part of the report deals with the economic situation and the measures taken to support the war effort.

4. The fourth part of the report deals with the social and political situation and the measures taken to maintain order and stability.

5. The fifth part of the report deals with the international situation and the relations with other countries.

6. The sixth part of the report deals with the future prospects and the measures taken to prepare for the post-war period.

7. The seventh part of the report deals with the conclusions and recommendations of the committee.

8. The eighth part of the report deals with the appendixes and the statistical tables.

9. The ninth part of the report deals with the index and the list of references.

10. The tenth part of the report deals with the general remarks and the final conclusions.

THE FURNITURE INDUSTRY.
