THE FURNITURE INDUSTRY IN CANADA
1927 and 1928.

Ottawa, March, 1930.- A report on the furniture industry for 1927 and 1928 has just been issued by the Forest Products Branch of the Dominion Bureau of Statistics. This is one of the most important wood-using industries in Canada and includes the manufacture of household furniture, upholstering and repair establishments, firms manufacturing store and office furniture and fixtures and those making wicker furniture and wickerware. The total gross value of the products of this group of industries in 1928 was \$41,825,534 as compared to \$35,733,818 in 1927. This includes the products of factories engaged primarily in the manufacture of furniture and represents the greater part of these products made in Canada. There are however a number of other woodworking factories that manufacture furniture and do cabinetwork as a side line but which are included under some other class of manufacturing industry.

The furniture industry in Canada is at present centred in southwestern Ontario. Out of a total of 566 establishments 217 were located in Ontario in 1928, 70 were in Quebec, 40 in British Columbia, 18 in Manitoba and the remainder scattered among the other four provinces. The total capital invested in the industry in 1928 was \$39,829,474 as compared to \$36,682,976 in 1927. The manufacture of furniture gave employment to 11,672 male and 867 female workers in 1928, paying a total of \$13,689,344 in wages and salaries. Fuel used in 1928 was valued at \$364,579 and a total of 20,040 horse power was used in the process of manufacture.

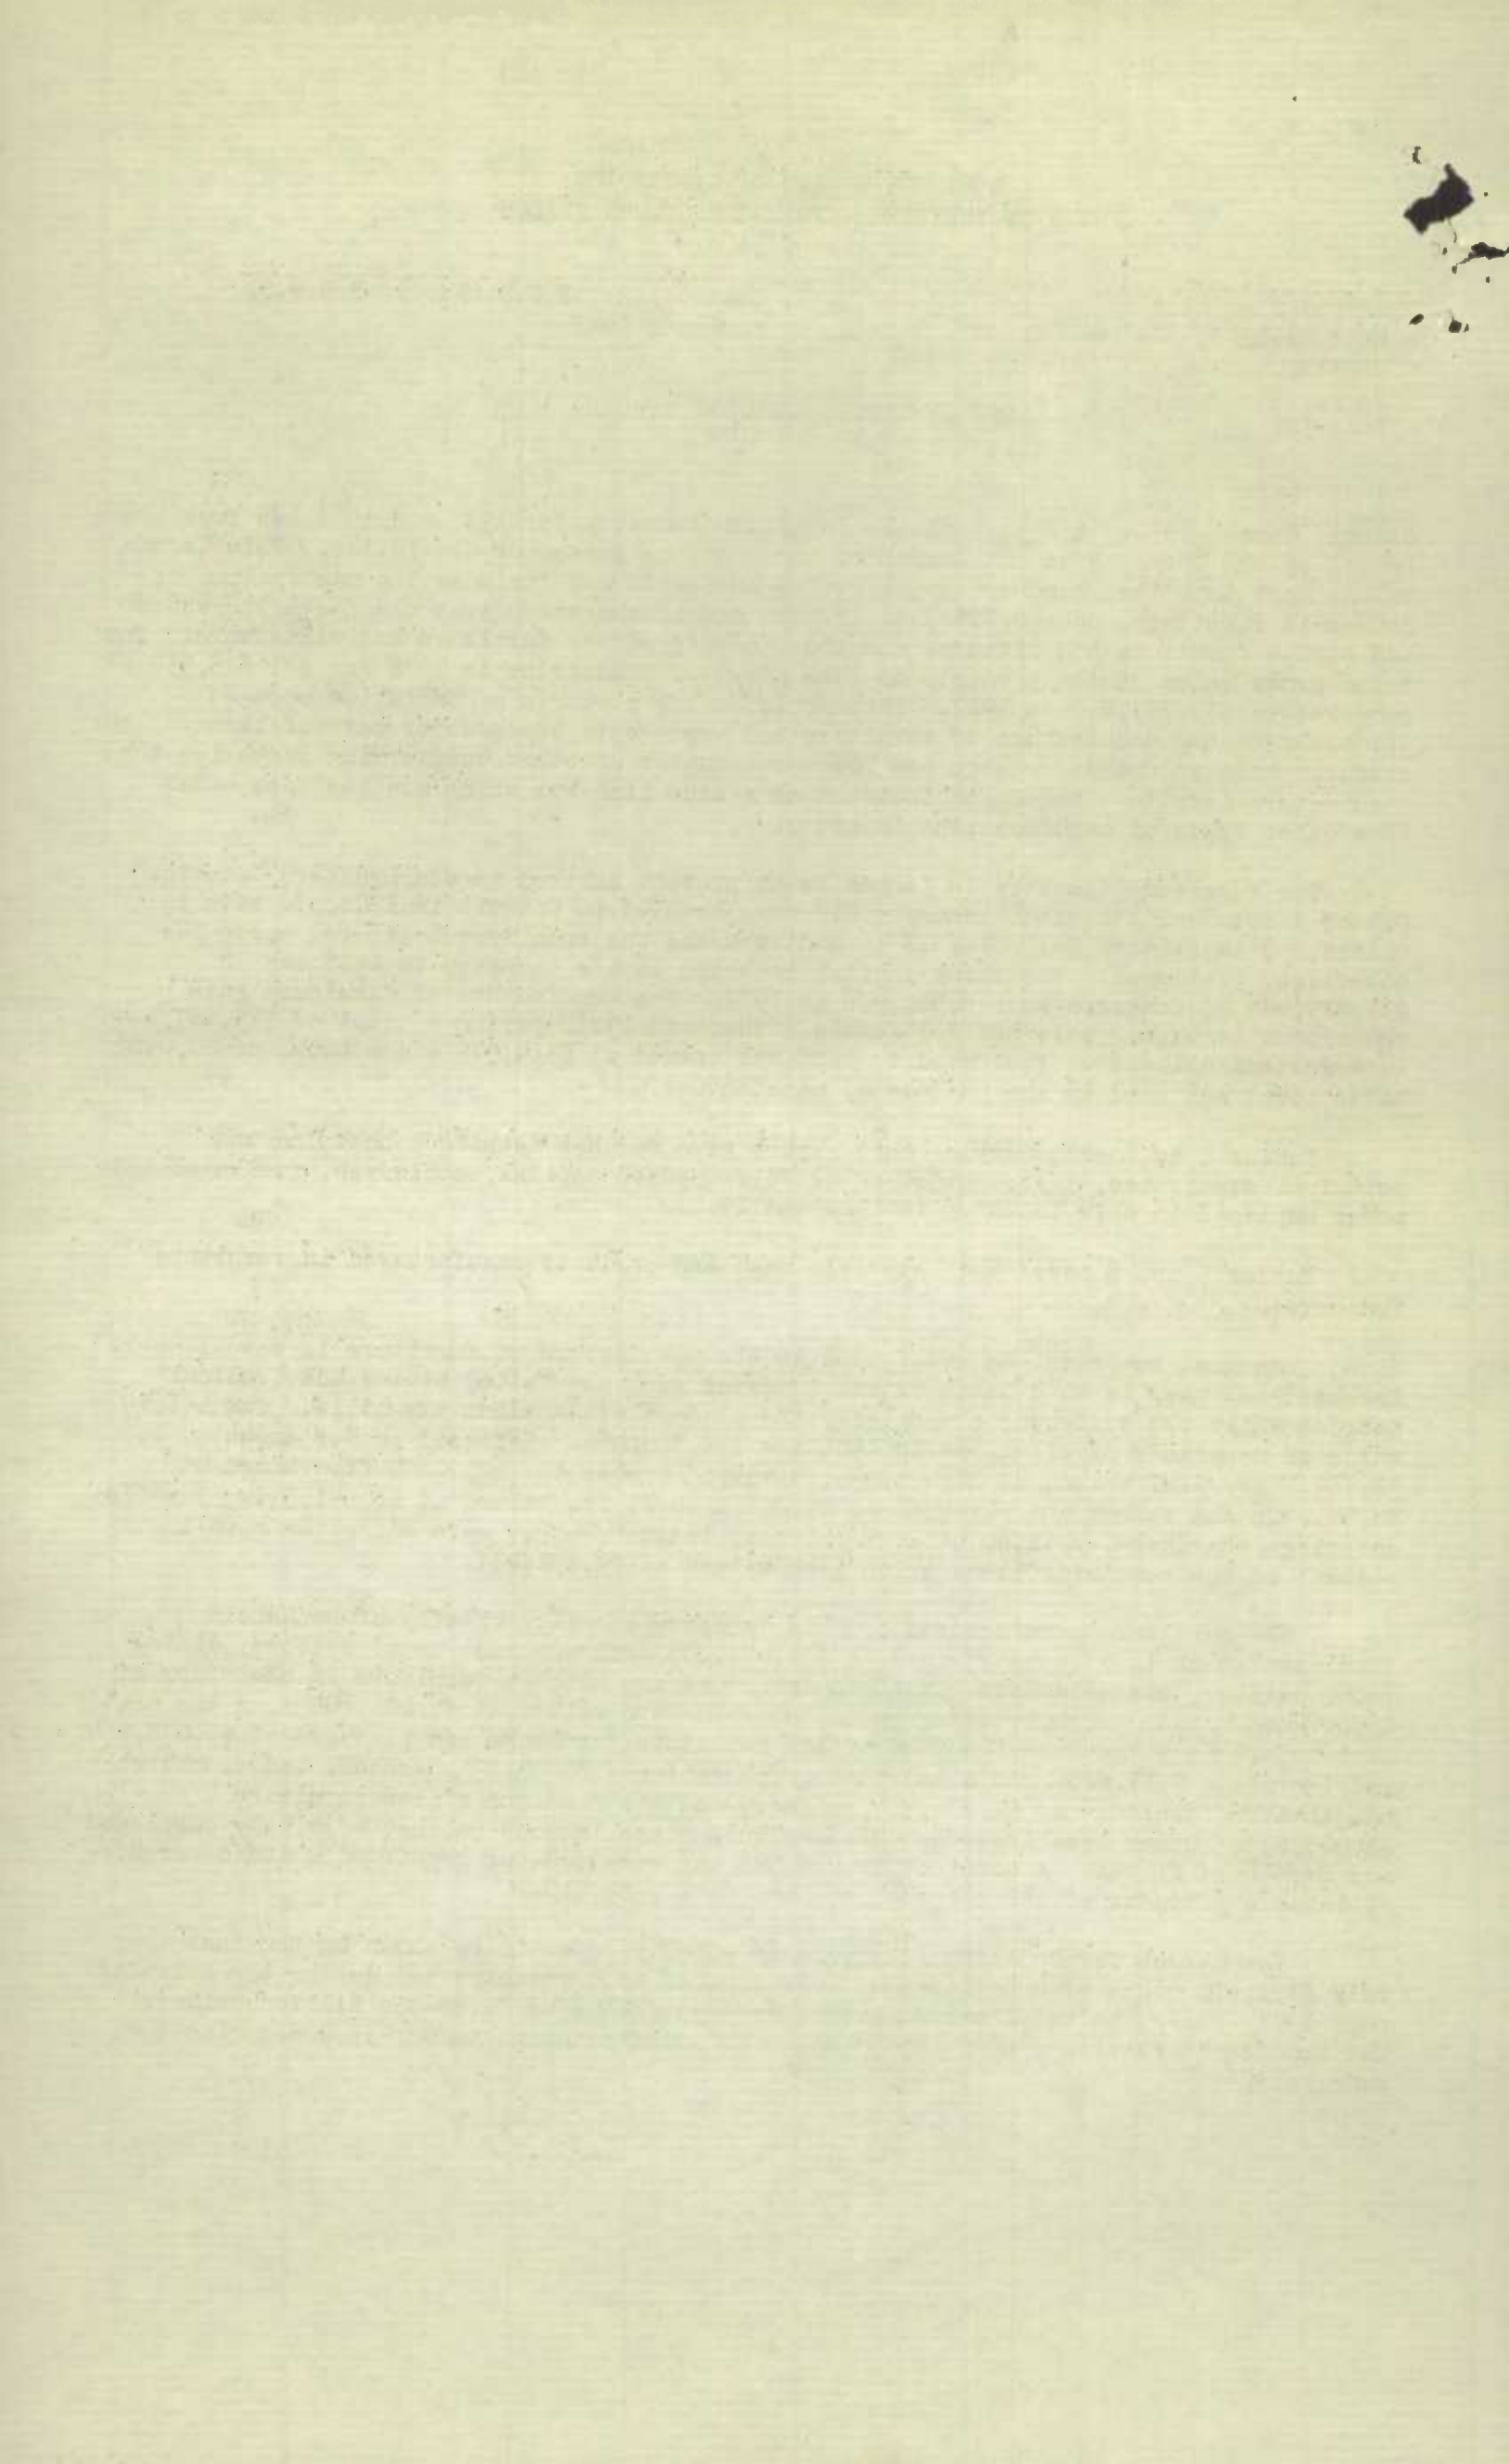

Tables 1 to 6 accompanying this report give further details concerning the principal statistics, distribution of establishments, capital, employees, fuel used and power employed in this industry in 1927 and 1928.

Tables 7 and 8 cover the materials used and products manufactured in furniture factories.

The most important material used in the manufacture of furniture is sawn lumber. The hardwood used is to a large extent imported from the United States and tropical sources while the softwoods are chiefly the product of Canadian saw-mills. The total value of materials of all kinds in 1928 was \$16,312,469. Softwood lumber amounted to 38,789 M ft. B.M. valued at \$1,278,095, hardwood lumber to 60,706 M ft. valued at \$4,241,406 and veneer and ply-wood to 25,896 M surf. ft. valued at \$1,141,531. Textile coverings, hardware, paints, oils, varnishes, leather, etc., were among the more important of the remaining items which were valued at \$9,651,437.

The furniture manufactured by this industry consists chiefly of household furniture which in 1928 was valued at \$21,443,055, and was made up of bedroom, dining room, parlour, miscellaneous household furniture and kitchen furniture in the order of importance named. Upholstering and mattresses were valued at \$5,021,604 and the next most important items were those of office and store furniture and fixtures at \$5,078,664, refrigerators \$317,878, radio and phonograph cabinets \$1,004,891, school, lodge, church and theatre furniture at \$1,204,769, wicker, rattan, reed and willow furniture \$1,205,637. Other less important classes were miscellaneous cabinet work, baby carriages and furniture frames. A total of \$1,063,526 was received for repair work and other miscellaneous products of all classes amounted to \$5,185,510.

The market for Canadian furniture is chiefly domestic as shown by the fact that only \$352,472 worth of Canadian-made furniture of wood was exported during the calendar year 1928, while the total annual production averaged over forty-one million dollars. The imports of furniture of wood and other material amounted to \$2,935,208 during the same year.

THE FURNITURE INDUSTRY

Table 1 - Principal Statistics - 1927 and 1928

Items		1927	1928
