SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABBREVIATIONS

n.e.s.: Not elsewhere specified.

S.I.C.: Standard Industrial Classification.

ABRÉVIATIONS

n.c.a.: Non classé(e)s ailleurs.

C.T.I.: Classification type des industries (titre français du système de classification industrielle de 1960).

C.A.E.: Classification des activités économiques (titre français du système de classification industrielle de 1970).

NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.

2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.

3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.

2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.

3. Il suffit au lecteur qui désire connaître la valeur de la production (activité manufacturière) d'additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

FURNITURE RE-UPHOLSTERY AND REPAIR SHOPS
S.I.C. 2611

RÉFÉCTION, REMBOURRAGE ET RÉPARATION DE MEUBLES
C.A.E. 2611

1973

This industry comprises establishments primarily engaged in repair and re-upholstery of furniture. Household Furniture Manufacturers, n.e.s. (S.I.C. 2619) are included in Section 2 of this publication.

In 1973, the value of shipments of goods of own manufacture amounted to \$42.2 million compared to \$36.0 million in 1972; an increase of 17.3%.

Approximately 96% of this value was received for reupholstering and repair work, i.e. \$40.5 million.

This industry is characterized by its large number of small establishments which numbered 799 in 1973. The average manufacturing revenue reported for all establishments (954) amounted to only \$44,000.

The total number of employees increased 10% in 1973 to 2,103 from 1,911 in 1972 and represented an average of slightly more than two per establishment.

Cette industrie comprend les établissements dont l'activité principale consiste dans la réfection, le rembourrage et la réparation de meubles. L'industrie des meubles de maison, n.c.a. (C.A.E. 2619) est comprise dans la section 2 de cette publication.

En 1973, la valeur des livraisons de produits de propre fabrication s'est élevée à \$42.2 millions par rapport à \$36.0 millions en 1972; une hausse de 17.3 %.

Environ 96 % de cette valeur, c'est-à-dire \$40.5 millions, provenait du rembourrage et de la réparation.

Cette industrie se caractérise par son grand nombre de petits établissements (799 en 1973). La valeur moyenne des recettes au titre de l'activité manufacturière déclaréea pour tous les établissements (954) n'a atteint que \$44,000.

Le nombre total des salariés a augmenté de 10 %, passant de 1,911 en 1972 à 2,103 en 1973, ce qui représente une moyenne d'un peu plus de 2 salariés par établissement.

SECTION 2

HOUSEHOLD FURNITURE MANUFACTURERS, N.E.S.
S.I.C. 2619

INDUSTRIE DES MEUBLES DE MAISON, N.C.A.
C.A.E. 2619

1973

This industry includes establishments primarily engaged in manufacturing household furniture of all kinds and of all materials. Establishments which have as their principal activity the repair and re-upholstery of furniture are included in Section 1 of this publication (S.I.C. 2611).

In 1973, shipments of goods of own manufacture by the manufacturers of household furniture increased to \$591.0 millions from \$492.5 millions in 1972, a gain of 20.0%. In real terms, however, the increase was 9.3% as the selling price index moved from 131.5 to 144.4.

The following table compares shipments by type of furniture for the period from 1970 to 1973:

Cette industrie comprend les établissements dont l'activité principale est la fabrication de meubles de toutes sortes et de toutes matières. Les établissements dont l'activité principale porte sur la réparation et le rembourrage des meubles sont pris en compte à la section 1 de la présente publication (C.A.E. 2611).

En 1973, les livraisons de produits de propre fabrication effectuées par l'industrie des meubles de maison sont passées de \$492.5 millions en 1972 à \$591.0 millions, soit une hausse de 20.0 %. En chiffres réels, toutefois, l'augmentation s'établissait à 9.3 %, l'indice du prix de vente ayant progressé de 131.5 à 144.4.

Le tableau suivant établit des comparaisons entre les livraisons selon le genre de meubles pour la période située entre 1970 et 1973:

Shipments of Household Furniture

Livraisons des meubles de maison

	Wooden Meubles	Upholstered — Rembourrés	Metal — En métal	Other — Autres	Total
					millions of dollars — millions de dollars
1970	143.0	102.8	34.6	60.5	340.9
1971	161.9	120.4	43.2	62.1	387.6
1972	202.8	155.7	53.5	80.5	492.5
1973	241.4	199.7	61.8	88.1	591.0

Wooden household furniture accounts for approximately 40% of the total and upholstered 30 to 35%.

There were 655 establishments included in our 1973 census and of this total 575 or 88% had less than 100 employees.

The number of production and related workers continued to increase and equalled 22,728 in 1973 compared to 21,233 in the previous year. The average hourly earning were \$2.83 in the year under review compared to \$2.61 in 1972.

The cost of materials and supplies increased in 1973 by 21.9% over 1972 and totalled \$290.7 millions. Hardwood lumber and upholstering and studio couch fabrics were the significant items.

Les meubles de maison en bois représentent environ 40 % du total et les meubles rembourrés de 30 à 35 %.

Notre recensement de 1973 faisait état d'un total de 655 établissements, dont 575, soit 88 %, comprenaient moins de 100 employés.

Le nombre de travailleurs de la production et assimilés a continué à augmenter pour atteindre 22,728 en 1973, comparativement à 21,233 l'année précédente. Les gains horaires moyens ont été de \$2.83 pour l'année observée contre \$2.61 en 1972.

Le coût des matières et fournitures a connu une hausse de 21.9 % en 1973 par rapport à 1972 et s'est chiffré à \$290.7 millions. Les bois de sciage feuillus ainsi que les tissus extérieurs pour meubles et divans "studio" ont été les articles qui ont le plus contribué à cette hausse.

The table below compares imports and exports of household furniture for the period from 1970 to 1974:

Le tableau qui suit compare les importations et les exportations de meubles de maison pour la période de 1970 à 1974:

	Imports	Exports
	Importations	Exportations
	millions of dollars - millions de dollars	
1970	24.6	12.8
1971	29.3	15.4
1972	46.6	16.0
1973	75.6	20.4
1974	118.0	21.5

The excess of imports over exports has increased from \$11.8 millions in 1970 to \$96.5 millions in 1974.

The preliminary estimate of shipments in 1974 by the manufacturers classified to this industry was \$745.5 millions based on data published by the Inventories, Shipments and Orders Section (Refer to Catalogue 31-001). This indicates an increase of 26% over 1973. When the industry selling price index is considered, however, (173.4 in 1974) the gain was only approximately 5%.

Some establishments not classified to this industry manufacture household furniture as a secondary activity. Their shipments of these products are included in Table 8, "All Industries".

L'excédent des importations sur les exportations a augmenté, passant de \$11.8 millions en 1970 à \$96.5 millions en 1974.

D'après les estimations provisoires, les livraisons effectuées en 1974 par les établissements classés dans cette industrie se sont chiffrées à \$745.5 millions; ces estimations sont fondées sur les données publiées par la Section des livraisons, des stocks et des commandes (voir le n° 31-001 au catalogue) et elles indiquent une hausse de 26 % par rapport à 1973. Toutefois, si l'on prend en compte l'indice du prix de vente dans l'industrie (173.4 en 1974) l'augmentation n'était que de 5 % environ.

Certains établissements non classés dans cette industrie produisent des meubles de maison à titre d'activité secondaire. Le tableau 8 indique leurs livraisons de ces produits sous la rubrique "toutes industries".

TABLE 1. PRINCIPAL STATISTICS, 1970-1973

TABLEAU 1. STATISTIQUES PRINCIPALES, 1970-1973

Year and province — Année et province	Establishments — Établissements	Manufacturing activity — Activité manufacturière							Total activity — Activité totale						
		Production and related workers — Travailleurs de la production et assimilés			Cost of fuel and electricity — Coût du combustible et de l'électricité	Cost of materials and supplies — Coût des matières et fournitures	Value of shipments of goods of own manufacture — Valeur des livraisons de produits de propre fabrication	Value added — Valeur ajoutée	Working owners and partners — Propriétaires et associés actifs		Employees — Salariés		Value added — Valeur ajoutée		
		Number — Nombre	Man-hours paid — Heures-hommes payées	Wages — Salaires					Number — Nombre	Withdrawals — Prélevements	Number — Nombre	Salaries and wages — Traitements et salaires			
		No. — nombre	'000		\$'000	\$'000	\$'000	\$'000					\$'000

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected exclusions or extensions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment – Business operating unit capable of reporting certain specified input and output data, usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity – Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture – Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added – Net output as measured by gross output less purchased commodity inputs used and contract work by others.

(a) **Value added, manufacturing activity:** Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

(b) **Value added, total activity:** Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages – Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use; beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories – Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units – Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

Établissement – Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Cout des matières et fournitures, du combustible et de l'électricité – De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication – Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fondue intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la nüne.

Valeur ajoutée – Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

(a) **Valeur ajoutée, activité manufacturière:** valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

(b) **Valeur ajoutée, activité totale:** comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires – Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc. versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks – Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires – Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).
