### 1. Explanatory Notes

"Explanatory Notes" on selected statistical terms may be found on the inside back cover of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.

### 2. Deletion of Establishments without Employees

With relatively few exceptions, establishments which in previous censuses did not report payment of salaries and wages (and, by inference, had no employment) were not surveyed in the 1975 Census of Manufactures. Although this involved deleting a total of some 1,400 establishments, they accounted for only 0.03% of the shipments of all manufacturing industries in 1974. Except for the number of establishments, the effect of this change on historical comparability of census data for most industries is either non-existent or only marginal. For industries in which there is an appreciable effect, however, details are provided in the introductory text of the relevant 1975 reports in this series.

### 3. Effect of Small Establishment Reporting on Fuel and Electricity Statistics

Users should note that information on the cost of fuel and electricity is not collected separately for small establishments but is included in "cost of materials and supplies", beginning with 1970. Although this does not affect the calculation of "value added", it does understate the value of fuel and electricity, especially in those industries and provinces where small establishments account for a significant proportion of the total. This may affect the statistics in Table 1, the lower employment size groups in Table 2, and Table 4, which applies to large establishments only.

### 4. Changes in Data on Working Owners and Partners, and Withdrawals

Questions on the number of working owners and partners were dropped from the short form (for small establishments) in 1970. A study of past data showed that, for each establishment reporting withdrawals, it would be sufficiently accurate to impute one working owner for each establishment classified as an "individual ownership" and two working owners or partners for each establishment classified as a "partnership". (By definition, working owners and partners do not exist in the other types of business organization). Due to difficulties in collecting consistent, reliable information on withdrawals, this question was deleted from both the long and short forms in 1975 (the data themselves were last published for 1973). Beginning with 1975, the imputation of numbers of working owners and partners for short-form respondents has been made solely on the basis of type of organization. This change results in an apparent increase in the number of working owners and partners as, in the past, not every establishment classified as an individual ownership or a partnership reported withdrawals every year. Numbers of working owners and partners for long-form respondents (sent to large establishments) have been taken as reported for all years.

### 5. Value of Production

Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

### 1. Notes explicatives

On trouvera au recto de la couverture arrière de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.

### 2. Suppression des établissements sans salariés

À quelques exceptions près, les établissements qui n'ont pas déclaré de traitements ni de salaires aux recensements précédents (donc aucun salarié), n'ont pas été pris en compte au recensement des manufactures de 1975. Ces 1,400 établissements hors de l'enquête ne sont cependant intervenus que pour 0.03 % des livraisons de toutes les industries manufacturières en 1974. Sauf pour ce qui est du nombre d'établissements, les répercussions de cette modification sur la comparabilité chronologique des données du recensement sont nulles ou minimales pour la plupart des industries. Toutefois, pour chaque industrie touchée par cette modification, on a pris soin d'inclure des détails supplémentaires dans l'introduction du bulletin approprié de 1975.

### 3. Répercussions des déclarations des petits établissements sur les statistiques du combustible et de l'électricité

Le lecteur remarquera que les renseignements concernant le coût du combustible et de l'électricité ne sont pas recueillis à part auprès des petits établissements mais inclus, depuis 1970, dans le "coût des matières et fournitures". Bien que cette pratique n'influe pas sur le calcul de la "valeur ajoutée", elle entraîne une sous-estimation de la valeur du combustible et de l'électricité dans les industries et les provinces où les petits établissements en consomment une part importante. Elle peut également modifier les statistiques du tableau 1, celles des petits groupes de salariés figurant au tableau 2 et les données au tableau 4, qui ne visent que les grands établissements.

### 4. Modifications aux données sur les propriétaires et associés actifs, et retraits

À partir de 1970, les questions relatives aux propriétaires et associés actifs ont été supprimées de la formule abrégée (destinée aux petits établissements). En revoyant les données antérieures, nous avons constaté que, dans le cas des établissements déclarant des retraits, il suffirait d'imputer un propriétaire actif à chaque établissement "à propriétaire unique" et deux propriétaires ou associés actifs à chaque "société en nom collectif". (Par définition, les propriétaires et associés actifs n'existent pas dans les autres genres d'entreprise). Étant donné qu'il est difficile de recueillir des renseignements uniformes et fiables sur les retraits, cette question a été supprimée en 1975 des questionnaires longs et abrégés (les données ont été publiées pour la dernière fois en 1973). À partir de 1975, le nombre de propriétaires et d'associés actifs, dans le cas des enquêtes sur la formule abrégée, est imputé uniquement selon la forme juridique. Cette modification se traduit par une augmentation apparente du nombre de propriétaires et d'associés actifs puisque, dans le passé, les établissements "à propriétaire unique" et ceux classés comme "société en nom collectif" n'ont pas tous déclaré des retraits chaque année. Pour les enquêtes utilisant la formule longue (envoyée aux grands établissements), le nombre de propriétaires et d'associés actifs est égal au chiffre indiqué chaque année.

### 5. Valeur de la production

Le lecteur qui désire connaître la valeur de la production (activité manufacturière), n'a qu'à additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

SECTION 1

FURNITURE RE-UPHOLSTERY AND REPAIR SHOPS

S.I.C. 2611

RÉFECTION, REMBOURRAGE ET RÉPARATION DE MEUBLES

C.A.É. 2611

1975

This industry comprises establishments primarily engaged in repair and re-upholstery of furniture. Household Furniture Manufacturers, n.e.s. (S.I.C. 2619) are included in Section 2 of this publication.

In 1975, the value of shipments of goods of own manufacture amounted to \$51.3 million compared to \$51.0 million in 1974; an increase of 0.5%.

This industry is characterized by its large number of small establishments. The average manufacturing revenue reported for all establishments (742) amounted to only \$69,000.

The total number of employees decreased 3.0% in 1975 to 2,337 from 2,410 in 1974 and represented an average of 3.1 per establishment.

Change in Basis of Reporting in 1975

As indicated in the "Notes to Users" on the inside front cover, most small establishments which did not report salaries and wages in 1974 were not surveyed in the 1975 Census of Manufactures. Although the omission of such establishments had little or no effect in many industries, it does affect to some extent the historical comparability of data for Furniture Re-upholstery and Repair Shops.

Cette industrie comprend les établissements dont l'activité principale consiste dans la réfection, le rembourrage et la réparation de meubles. L'Industrie des meubles de maison, n.c.a. (C.A.É. 2619) est comprise dans la section 2 de cette publication.

En 1975, la valeur des livraisons de produits de propre fabrication s'est élevée à \$51.3 millions par rapport à \$51.0 millions en 1974; une hausse de 0.5 %.

Cette industrie se caractérise par son grand nombre de petits établissements. La valeur moyenne des recettes au titre de l'activité manufacturière déclarées pour tous les établissements (742) n'a atteint que \$69,000.

Le nombre total des salariés a baissé de 3.0 %, passant de 2,410 en 1974 à 2,337 en 1975, ce qui représente une moyenne de 3.1 par établissement.

Modification de la base de déclaration en 1975

Comme nous l'avons indiqué dans les "Notes au lecteur" au verso de la couverture, la plupart des petits établissements qui n'ont déclaré ni traitements ni salaires en 1974 n'ont pas été pris en compte dans le recensement des manufactures de 1975. Bien que leur omission a peu influé sur les chiffres de cette industrie, elle a eu certaines répercussions sur la comparabilité chronologique des données de la Réfection, rembourrage et réparation de meubles.

In order to provide an indication of the probable effect of this change on 1975 Census data for this industry, the following table on selected items from the 1974 Census may be of interest:

Dans le but d'indiquer les répercussions possibles de cette modification sur les données du recensement de 1975 pour cette industrie, le tableau ci-dessous présente certains postes tirés du recensement de 1974.

## SECTION 2

HOUSEHOLD FURNITURE MANUFACTURERS, N.E.S.  
S.I.C. 2619INDUSTRIE DES MEUBLES DE MAISON, N.C.A.  
C.A.É. 2619

1975

This industry includes establishments primarily engaged in manufacturing household furniture of all kinds and of all materials. Establishments which have as their principal activity, the repair and re-upholstery of furniture, are included in Section 1 of this publication (S.I.C. 2611).

Change in Basis of Reporting in 1975

As indicated in the "Notes to Users" on the inside front cover, most small establishments which did not report salaries and wages in 1974 were not surveyed in the 1975 Census of Manufactures. Although the omission of such establishments had little or no effect in many industries, it does affect to some extent the historical comparability of data for Household Furniture Manufacturers, n.e.s.

In order to provide an indication of the probable effect of this change on 1975 Census data for this industry, the following table on selected items from the 1974 Census may be of interest:

Items - Postes	Number of establishments - Nombre d'éta- blissements	Number of working owners and partners - Nombre de propriétaires et associés actifs	Cost of materials and supplies used - Coût des matières et fournitures utilisées	Shipments of goods of own manufacture - Livraisons de produits de propre fabrication	Value added by manufacture - Valeur ajoutée par l'activité manufacturière
thousands of dollars - milliers de dollars					
A. Establishments (including those with no salaries and wages) - Établissements (y compris ceux qui n'ont déclaré ni traitements ni salaires) .....	721	217	358,929	711,455	360,291
B. Establishments (excluding those with no salaries and wages) - Établissements (sauf ceux qui n'ont déclaré ni traitements ni salaires) .....	680	176	358,357	710,630	360,036
C. Difference - Différence .....	41	41	572	825	255
D. C as a percentage of A - Pourcentage de C par rapport à A .....	5.7	18.9	0.2	0.1	0.1

In 1975, the value of shipments of goods of own manufacture by this industry decreased to \$695.4 million (current dollars) from \$711.5 million in 1974, a loss of 2.3%. The Industry Selling Price Index, however, increased to 158.0 (1971 = 100) from 145.3 and as a result, the shipments in 1971 dollars declined by 9.8%.

Cette industrie comprend les établissements dont l'activité principale est la fabrication des meubles de toutes sortes et de toutes matières. Les établissements dont l'activité principale porte sur la réparation et le rembourrage de meubles sont pris en compte dans la section 1 de la présente publication (C.A.É. 2611).

Modification de la base de déclaration en 1975

Comme nous l'avons indiqué dans les "Notes au lecteur" au verso de la couverture, la plupart des petits établissements qui n'ont déclaré ni traitements ni salaires en 1974 n'ont pas été pris en compte dans le recensement des manufactures de 1975. Bien que leur omission a peu influé sur les chiffres de cette industrie, elle a eu certaines répercussions sur la comparabilité chronologique des données de l'Industrie des meubles de maison, n.c.a.

Dans le but d'indiquer les répercussions possibles de cette modification sur les données du recensement de 1975 pour cette industrie, le tableau ci-dessous présente certains postes tirés du recensement de 1974.

Les livraisons de produits de propre fabrication de cette industrie ont baissé de 2.3 %, passant de \$711.5 millions en 1974 à \$695.4 millions (dollars courants) en 1975. Cependant, l'Indice des prix de vente a bondi de 145.3 (1971 = 100) à 158.0, ce qui, en dollars de 1971, correspond à une diminution de 9.8 % des livraisons.

The following indicates shipments by type of furniture for the period from 1971-1975:

Le tableau suivant illustre, par genre de meubles, les livraisons pour la période allant de 1971-1975:

## Shipments of Household Furniture

## Livraisons des meubles de maison

	Wooden - En bois	Upholstered - Rembourrés	Metal - En métal	Furniture components - Éléments de meubles	Other - Autres	Total
	millions of dollars - millions de dollars					
1971 .....	161.9	120.4	43.2	20.5	41.6	387.6
1972 .....	202.8	155.7	53.5	26.6	53.9	492.5
1973 .....	241.4	199.7	59.5	27.2	63.2	591.0
1974 .....	296.6	235.8	72.9	32.0	74.2	711.5
1975 .....	271.2	225.5	67.6	29.4	101.7	695.4

In 1975, wooden household furniture accounted for 39% of the total value of shipments by this industry with wooden bedroom suites the most significant product (\$104.0 million). Upholstered furniture represented 32% of the total.

En 1975, les meubles de maison en bois ont représenté 39 % de la valeur totale des livraisons de cette industrie, les mobiliers de chambre à coucher en bois intervenant pour la plus grosse part (\$104.0 millions). Les meubles rembourrés ont figuré pour 32 % de la valeur totale.

There were 708 establishments included in our 1975 Census and of this total 631 or 89% had less than 100 employees.

Le recensement de 1975 a appréhendé au total 708 établissements, dont 631 (89 %) comptaient moins de 100 salariés.

The number of production and related workers decreased to 23,133 compared to 23,771 in the previous year. Their average hourly earnings were \$3.59 in 1975 compared to \$3.22 in 1974.

Le nombre de travailleurs de la production et assimilés a atteint 23,133 comparativement à 23,771 l'année précédente. Les gains horaires moyens sont passés de \$3.22 en 1974 à \$3.59 en 1975.

The cost of materials and supplies was 8.0% lower and equalled \$330.5 million in the year under review. The following summarizes these costs for the period 1971-1975:

Pour l'année observée, le coût des matières et fournitures a subi une baisse de 8.0 % pour se chiffrer à \$330.5 millions. Le tableau suivant en présente un résumé pour la période de 1971-1975:

## Cost of Materials and Supplies

## Coût des matières et des fournitures

	Lumber - Bois de cons- truction	Upholster- ing studio couch fabrics - Tissus pour divans- studio	Furniture frames - Châssis de meubles	Steel and other metals - Acier et autres métaux	Hardware - Quincail- lerie	Sub- total - Total partiel	Other - Autres	Total
	millions of dollars - millions de dollars							
1971 .....	25.5	18.2	14.1	12.9	10.1	80.8	102.0	182.8
1972 .....	35.0	25.2	19.0	16.9	14.6	110.7	127.7	238.4
1973 .....	46.6	33.7	22.7	19.3	17.6	139.9	150.8	290.7
1974 .....	53.6	38.4	28.7	23.7	17.2	161.6	197.3	358.9
1975 .....	44.8	39.4	23.1	17.4	16.1	140.8	189.7	330.5

The first five items above represent approximately 45% of the cost of all materials and supplies used by this industry.

The table below indicates imports and exports of household furniture for the period from 1971-1976:

	Imports — Importations	Exports — Exportations	Trade balance — Balance commerciale
	millions of dollars - millions de dollars		
1971 .....	29.3	15.4	- 13.9
1972 .....	46.6	16.0	- 30.6
1973 .....	75.6	20.4	- 55.2
1974 .....	118.0	21.5	- 96.5
1975 .....	109.6	17.2	- 92.4
1976 .....	139.3	17.0	- 122.3

In 1976, the excess of imports over exports increased significantly to \$122.3 million.

The preliminary estimate of shipments in 1976 by the manufacturers classified to this industry was \$795.0 million (current dollars) or 14.3% higher than in 1975 based on data published by the Inventories, Shipments and Orders Section (Catalogue 31-001). When the Industry Selling Price Index is considered, however (168.4 in 1976, 1971 = 100) the increase was 6.8%.

Some establishments not classified to this industry manufacture household furniture as a secondary activity. Their shipments of these products are included in Table 7, "All Industries".

As part of the continuing program of Statistics Canada to reduce the reporting burden on small establishments, the number reporting on "short-form" questionnaires in this industry increased from 227, accounting for 2.7% of shipments of goods of own manufacture in 1974 to 343 representing 8.2% in 1975. Since short-form questionnaires do not ask for commodity detail, the effect of this change is to reduce the quantities and/or values of some of the individual commodities included in Tables 5, 6 and 7.

Les cinq premiers articles représentent environ 45 % du coût de tous les matériaux et fournitures utilisés par cette industrie.

Le tableau suivant rend compte des importations et exportations de meubles de maison pour la période allant de 1971-1976:

En 1976, l'excédent des importations sur les exportations a été substantiel se chiffrant à \$122.3 millions.

D'après les données publiées par la Section des livraisons, stocks et commandes (n° 31-001 au catalogue), une première estimation fixait les livraisons des établissements classés dans cette industrie à \$795.0 millions en 1976 (dollars courants), soit 14.3 % de plus qu'en 1975. Cependant, si l'on tient compte de l'Indice des prix de vente dans cette industrie (168.4 en 1976, 1971 = 100), l'augmentation est de 6.8 %.

Certains établissements non classés dans cette industrie produisent des meubles de maison à titre d'activité secondaire. Le tableau 7 indique leurs livraisons de ces produits sous la rubrique "Toutes industries".

Dans le cadre du programme permanent de Statistique Canada visant à alléger le fardeau de déclaration des petits établissements, le nombre d'enquêtés qui ont répondu sur formules abrégées au sein de cette industrie a été porté de 227 en 1974 à 343 en 1975, ce qui représente 2.7 % et 8.2 % respectivement des livraisons de produits de propre fabrication. Comme les questionnaires abrégés ne renferment pas de données détaillées sur les produits, cette modification réduit la quantité et (ou) la valeur de certains produits distincts figurant aux tableaux 5, 6 et 7.

TABLE 1. PRINCIPAL STATISTICS, 1970-1975  
TABLEAU 1. STATISTIQUES PRINCIPALES, 1970-1975

	Number of establishments - Nombre d'établissements	Manufacturing activity - Activité manufacturière							Total activity - Activité totale			
		Production and related workers - Travailleurs de la production et assimilés			Cost of fuel and electricity(1) - Coût du combustible et de l'électricité(1)	Cost of materials and supplies(1) - Coût des matières et fournitures(1)	Value of shipments of goods of own manufacture - Valeur des livraisons de produits de propre fabrication	Value added - Valeur ajoutée	Employees - Salariés		Value added - Valeur ajoutée	
		Number - Nombre	Thousands of man-hours paid - Milliers d'heures-hommes payées	Wages - Salaires					Number - Nombre	Salaries and wages - Traitements et salaires		
thousands of dollars - milliers de dollars											thousands of dollars - milliers de dollars

## EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

**Establishment** – Smallest operating unit capable of reporting certain specified input and output data; usually a plant or mill.

### Large Establishments

**Cost of materials and supplies, fuel and electricity** – Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

**Value of shipments of goods of own manufacture** – Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In reports on the fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown for these industries. Integrated smelters' work on own ore is valued at imputed charge to mine.

**Value added** – Net output as measured by gross output less purchased commodity inputs used and contract work by others.

- (a) Value added, manufacturing activity: Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.
- (b) Value added, total activity: Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

**Employees, salaries and wages** – Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use; beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

**Inventories** – Book value of owned inventory held in Canada, including goods in transit and on consignment.

### Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services and fuel and electricity; and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity. Value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

**Head offices, sales offices and auxiliary units** – Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

## NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

**Établissement** – Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

### Grands établissements

**Coût des matières et fournitures, du combustible et de l'électricité** – De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

**Valeur des livraisons de produits de propre fabrication** – Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. Dans les publications sur l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, l'industrie de matériel ferroviaire roulant ainsi que l'industrie de la construction et de la réparation de navires, la valeur de la production remplace celle des livraisons; dans la présente publication, on présente la valeur des livraisons pour ces industries. Pour établir la valeur du travail effectué par une fonderie intégrée sur du minerai qui lui appartient, on calcule le coût qu'il faudrait imputer à la mine.

**Valeur ajoutée** – Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

- a) Valeur ajoutée, activité manufacturière: valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.
- b) Valeur ajoutée, activité totale: comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

**Salariés, traitements et salaires** – Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés, ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc. versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

**Stocks** – Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

### Petits établissements

Pour les établissements qui remplissent une "formule abrégée", "le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés et le combustible et l'électricité; et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale. La valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

**Sièges sociaux, bureaux de vente et unités auxiliaires** – Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970.)
