

Miscellaneous furniture and fixtures manufacturers

1974

Industrie des articles d'ameublement divers

1974

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABBREVIATIONS

n.e.s.: Not elsewhere specified.

S.I.C.: Standard Industrial Classification.

ABRÉVIATIONS

n.c.a.: Non classé(e)s ailleurs.

C.T.I.: Classification type des industries (titre français du système de classification industrielle de 1960).

C.A.É.: Classification des activités économiques (titre français du système de classification industrielle de 1970).

NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.

2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.

3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.

2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.

3. Il suffit au lecteur qui désire connaître la valeur de la production (activité manufacturière) d'additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

MISCELLANEOUS FURNITURE AND FIXTURES MANUFACTURERS

S.I.C. 266

INDUSTRIE DES ARTICLES D'AMEUBLEMENT DIVERS
C.A.E. 266

The Miscellaneous Furniture and Fixtures Industry includes establishments primarily engaged in manufacturing store furniture and fixtures, public building and professional furniture and fixtures of all kinds and of all materials. It also includes establishments primarily engaged in manufacturing mattresses and bed springs. The main categories of products are store furniture and fixtures; furniture and fixtures for restaurants, schools, churches and other public buildings; mattresses of all kinds; box springs and other bed springs; hospital furniture and equipment; lockers and shelving; etc.

In 1974, the value of shipments of goods of own manufacture by the manufacturers classified to this industry amounted to \$367.8 million in current dollars or 13.6% greater than the \$323.7 million of the previous year. In 1971 dollars, however, the shipment value declined by 5.0% as the industry selling price index increased from 114.0 in 1973 to 136.5 in 1974 (1971=100).

The following indicates shipments by product category for the period from 1970 to 1974:

TABLE I. Shipments of Miscellaneous Furniture
TABLEAU I. Livraisons d'articles d'ameublement divers

| Year — Année | Special purpose — Fins spéciales | Mattresses | Springs | Other | Total |
|---|--|--------------|---------------|-------------|-------|
| | | — Matelas | — Sommiers | — Autres | |
| millions of dollars — millions de dollars | | | | | |
| 1970 | 95.6 | 36.4 | 22.3 | 93.7 | 248.0 |
| 1971 | 98.4 | 39.5 | 24.1 | 91.1 | 253.1 |
| 1972 | 119.8 | 46.2 | 27.9 | 96.6 | 290.5 |
| 1973 | 144.6 | 52.0 | 35.6 | 91.5 | 323.7 |
| 1974 | 159.4 | 62.6 | 40.2 | 105.6 | 367.8 |

The first three of the above items account for approximately 70% of the output of this industry. In 1974, special purpose furniture accounted for 43% with hotel, restaurant, store and office fixtures (\$54.6 million) and furniture (\$22.7 million), lockers and shelvings (\$29.1 million) and school furniture (\$164 million) the significant products.

This industry has a large number of small establishments. The 1974 census covered 400 establishments of which only 31 had more than 100 employees and 237 had fewer than 20 employees.

The number of production and related workers declined slightly in 1974 to 10,513 from 10,575 in the previous year. Their average hourly earnings increased from \$3.27 to \$3.62 during this period.

The cost of materials and supplies was \$184.9 million in 1974, an increase of 14.7% over the \$161.1 million purchased and used in 1973. The following summarizes the cost of the significant materials used for the period from 1970 to 1974:

Cette industrie comprend les établissements qui s'occupent principalement de la fabrication de meubles et d'articles d'ameublement de toutes sortes et de toutes matières pour magasins, édifices publics et pour certaines professions. Cette industrie comprend aussi les établissements qui s'occupent principalement de la fabrication de matelas et sommiers. Les principales catégories de produits sont les meubles et aménagements de magasins, de restaurants, d'écoles, d'églises et d'autres édifices publics, les matelas de toutes sortes, les sommiers-caisses et les autres sommiers, les meubles et matériel d'hôpitaux, les armoires et rayonnages, etc.

En 1974, la valeur des livraisons de produits de propre fabrication effectuées par les établissements de cette industrie s'est élevée à \$367.8 millions (dollars courants), une progression de 13.6 % sur les \$323.7 millions de l'année précédente. Toutefois, en dollars de 1971, la valeur des livraisons a accusé une baisse de 5.0 %, tandis que l'indice des prix de vente de l'industrie est passé de 114.0 à 136.5 entre 1973 et 1974 (1971=100).

Le tableau suivant présente la valeur des livraisons par catégorie de produits pour la période de 1970 à 1974:

Les trois premiers articles du tableau totalisent environ 70 % de la production de cette industrie. En 1974, les meubles spéciaux ont figuré pour 43 % de la production, les principaux produits étant les meubles (\$22.7 millions) et les articles d'ameublement (\$54.6 millions) pour hôtels, restaurants, magasins et bureaux, les armoires et rayonnages (\$29.1 millions) et les meubles d'école (\$164 millions).

On trouve dans cette industrie un grand nombre de petits établissements. Des 400 établissements visés par le recensement de 1974, seulement 31 comptaient plus de 100 salariés alors que 237 en avaient moins de 20.

Le nombre de travailleurs de la production et assimilés a baissé légèrement, passant de 10,575 en 1973 à 10,513 en 1974. Au cours de la même période, leurs gains horaires moyens ont monté de \$3.27 à \$3.62.

Le coût des matières et fournitures s'est chiffré à \$184.9 millions en 1974, une augmentation de 14.7 % par rapport aux \$161.1 millions de 1973. Le tableau suivant illustre le coût des matières principales pour les années 1970 à 1974:

| | Cost of Materials and Supplies | | | | | | | | Total | |
|---|-----------------------------------|----------------------------|--------------------|----------------------|--------|---------|----------|-------|-------|--|
| | Coûts des matières et fournitures | | | | | | | | | |
| | Sheet & strip, steel | Ticking, mattress & pillow | Stuffing materials | Other forms of metal | Lumber | Springs | Hardware | Other | | |
| millions of dollars — millions de dollars | | | | | | | | | | |
| 1970 | 7.0 | 8.9 | 7.9 | 9.3 | 7.8 | 7.0 | 5.5 | 66.2 | 119.6 | |
| 1971 | 7.4 | 9.9 | 9.7 | 9.9 | 7.4 | 7.3 | 6.8 | 68.5 | 126.9 | |
| 1972 | 9.9 | 12.1 | 10.9 | 11.0 | 8.6 | 8.6 | 7.5 | 73.8 | 142.4 | |
| 1973 | 13.8 | 13.1 | 11.7 | 9.9 | 10.1 | 10.8 | 9.7 | 82.0 | 161.1 | |
| 1974 | 18.5 | 15.2 | 15.2 | 12.8 | 12.5 | 12.2 | 10.0 | 88.5 | 184.9 | |

The first seven of the above items represent approximately 50% of the total cost of all materials and supplies used by this industry.

The imports and exports of miscellaneous furniture products are listed on page 4 for the period 1970 to 1975:

Les sept premiers articles susmentionnés représentent environ 50 % du coût total de toutes les matières et fournitures utilisées par cette industrie.

Le tableau à la page 4 présente un sommaire des importations et exportations d'articles d'ameublement divers pour la période de 1970 à 1975:

| Year — Année | Imports — Importations | Exports — Exportations | Trade Balance — Balance commerciale |
|--------------------|------------------------------|------------------------------|---|
| | | \$'000 | |
| 1970 | 8,412 | 8,282 | — 130 |
| 1971 | 7,707 | 8,059 | + 352 |
| 1972 | 1,156 | 10,120 | — 973 |
| 1973 | 17,731 | 14,516 | — 3,215 |
| 1974 | 26,363 | 19,931 | — 6,432 |
| 1975 | 25,279 | 23,777 | — 1,502 |

The excess of imports over exports declined in 1975 to \$1.5 million compared to \$6.4 million in 1974.

According to data published by the Inventories, Shipments and Orders Section (refer to Catalogue 31-001), the preliminary estimate of shipments by the manufacturers classified to this industry in 1975 was \$396.2 million (current dollars) or 7.7% greater than in 1974. When the industry selling price index is considered, however, (149.7 in 1975, 1971=100) the 1975 shipments in 1971 dollars decreased by approximately 1.5%.

Some establishments classified to other industries also manufacture miscellaneous furniture as a secondary activity. The shipments of their products are included in Table 8 "All Industries".

L'excédent des importations sur les exportations est tombé à \$1.5 million en 1975 comparativement aux \$6.4 millions enregistrés en 1974.

Selon les données publiées par la Section des stocks, livraisons et commandes (voir la publication n° 31-001 au catalogue), la première estimation des livraisons effectuées par les fabricants classés dans cette industrie en 1975 s'élevait à \$396.2 millions (dollars courants), une progression de 7.7 % sur 1974. Cependant, si l'on tient compte de l'indice des prix de vente de l'industrie (149.7 en 1975, 1971=100) les livraisons en 1975 (dollars de 1971) ont fléchi d'environ 1.5 %.

Certains établissements classés dans d'autres industries fabriquent également des articles d'ameublement divers à titre d'activité secondaire. Les chiffres de leurs livraisons figurent au tableau 8 sous "Toutes industries".

TABLE 1. PRINCIPAL STATISTICS, 1961, 1965-1974

TABLEAU 1. STATISTIQUES PRINCIPALES, 1961, 1965-1974

| Year and province — Année et province | Establishments — Établissements | Manufacturing activity — Activité manufacturière | | | | | | | | Total activity — Activité totale | | | | | | | | | | |
|--|------------------------------------|--|--|---------------------|---|--|---|---------------------------------|---|----------------------------------|---|---------------------------------|---|--|--|--|--|--|--|--|

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment — Smallest operating unit capable of reporting certain specified input and output data, usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity — Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture — Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added — Net output as measured by gross output less purchased commodity inputs used and contract work by others.

(a) **Value added, manufacturing activity**: Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

(b) **Value added, total activity**: Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages — Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use; beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories — Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output. Total activity, value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units — Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

Etablissement — Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Cout des matières et fournitures, du combustible et de l'électricité — De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication — Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fonderie intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée — Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

a) **Valeur ajoutée, activité manufacturière**: valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

b) **Valeur ajoutée, activité totale**: comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires — Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés, ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc. versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément, à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks — Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires — Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).
