SHIPMENTS OF PREFABRICATED BUILDINGS OF OWN MANUFACTURE

LIVRAISONS DE CONSTRUCTIONS PRÉFABRIQUÉES DE PROPRE FABRICATION

1972

The total value of shipments of prefabricated buildings of Canadian manufacture increased about 35 % from \$164,811,000 in 1971 to \$222,969,000 in 1972. The value of housing units alone, both sectional and component, increased 33 % from \$105,860,000 in 1971 to \$140,792,000 in 1972. The number of units shipped increased approximately 17 % from 16,822 in 1971 to 19,661 in 1972 resulting in an average unit value increase of about 14 %. Cottages also showed a continuation of this trend to higher prices as average unit prices increased some 27 % to \$5,261 in 1972.

La valeur totale des livraisons de constructions préfabriquées de production canadienne a augmenté d'environ 35 %, passant de \$164,811,000 en 1971 à \$222,969,000 en 1972. À elle seule, la valeur des livraisons de maisons (sectionnelles et élémentisées) a connu une hausse de 33 %, passant de \$105,860,000 en 1971 à \$140,792,000 en 1972. Le nombre d'unités livrées s'est accru de 17 % environ (19,661 en 1972 contre 16,822 en 1972), ce qui représente une augmentation d'environ 14 % de la valeur unitaire moyenne. Cette tendance à l'augmentation s'est également manifestée dans les chalets, dont le prix unitaire moyen a atteint \$5,261 en 1972 (+ 27 %).

Year to year figures, as has been the case since the start of this survey, are not strictly comparable as some firms reporting in 1971 did not report in 1972 and new firms reporting for the first time in 1972 did not give comparable information for 1971. It is interesting to note however that the number of reporting firms increased 30 % from 126 in 1971 to 164 in 1972.

Comme cela a été le cas depuis le début de l'enquête, les chiffres ne sont pas comparables d'une année à l'autre, vu que certaines entreprises ont envoyé une déclaration en 1971-72 et que les entreprises qui ont participé à l'enquête pour la première fois en 1972 n'ont pas fourni les chiffres comparatifs pour 1971. Il est intéressant, toutefois, de noter que le nombre d'entreprises fournissant des chiffres a augmenté de 30 % (164 en 1972 contre 126 en 1971).

House values as given in the publication include primary erection and/or value f.o.b. plant. Values given for cottages do not include the cost of erection.

Les prix donnés ici comprennent la mise en place initiale et/ou la valeur f.o.b. départ usine. Les valeurs données pour les chalets ne comprennent pas le coût de la mise en place.

Users of these statistics are reminded of the fact that this survey deals only with premanufactured units (in one piece or in sections) and complete component packages defined as "complete packages and those that include the superstructure only to the closing in stage". Some builders use pre-manufactured components to a considerable extent but not complete component packages as defined above and as a consequence of this definition such buildings are not included in this report.

Le lecteur voudra bien noter que cette enquête concerne seulement les unités préfabriquées (d'un seul tenant ou en sections) et les constructions élémentisées complètes qui sont définies comme les "ensembles complets et ceux qui incluent la superstructure seulement jusqu'à la phase de la fermeture de la construction". Certains constructeurs utilisent des ensembles préfabriqués dans une large mesure, mais pas des ensembles complets suivant la définition ci-haut. Par suite de cette définition, leurs constructions ne sont pas prises en compte ici.
