PRINTING TRADES IN CANADA, 1926 AND 1927.

Ottawa, March 7th, 1929.- A report on the printing trades in Canada for 1926 and 1927 has been completed by the Forest Products Branch of the Dominion Bureau of Statistics. This group of industries includes printing and publishing, job printing and bookbinding, lithographing and engraving, stereotyping and electrotyping, and blue printing. These five groups are considered separately as far as possible but a complete separation of statistics cannot be made as one establishment often carries on two or more of these types of printing work.

Table 1 which accompanies this report gives a summary of the principal statistics of the printing trades.

Under printing and publishing are included newspapers and periodicals which print their own publications. There were 777 such establishments in 1927. The total number of employees in this group was 15,028 and the total payroll \$22,040,170. The capital invested in 1927 amounted to \$55,831,150. The total amount received for subscriptions and sales was \$14,151,672 and for advertising \$37,519,304. In addition to printing their own publications, many of these establishments carry on job printing which amounted to \$8,613,581 in 1927. They also do various other kinds of printing, bookbinding and allied work.

Details concerning this group of industries will be found in Tables 2, 3 and 4 which accompany this report.

Under printing and bookbinding are included the details concerning 862 establishments. Job printing forms the greatest part of their activities representing over half the total amount received for sales and work done. Bookbinding, loose-leaf and blank books and stationery goods are the next most important sources of revenue in this group of industries. The total number of employees in this group was 11,043 with a payroll of \$13,982,039. The capital invested in 1927 was \$35,263,910.

Details concerning distribution of establishments, materials used and production in the printing and bookbinding group will be found in Tables 5, 6 and 7 herewith.

Those firms which specialize in lithographing and engraving are dealt with in the next section, although this work is also done in the other groups of printing trades. Firms included in this group derived over half their revenue from lithographing and engraving, amounting in 1927 to over eleven million dollars. Other principal sources of revenue are job printing and electrotyping and stereotyping. The total number of employees in 1927 was 4,971 and the total for salaries and wages \$7,438,028. The capital invested was \$17,007,373.

Tables 8, 9 and 10 cover the details of this group.

Tables 11, 12, 13, 14 and 15 deal with stereotyping and electrotyping and blue printing as parts of the printing trade.

At the request of several interested trade organizations, lithographing, photo-engraving, electrotyping and stereotyping will be considered as four separate classes rather than as two groups in the 1928 census of this industry.

PRINTING TRADES IN CANADA, 1926 AND 1927.
