NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.
2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.
3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.
2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.
3. Il suffit au lecteur qui désire connaître la valeur de la production (activité manufacturière) d'additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

Pour obtenir les chiffres "toutes industries", nous vous prions de consulter les rapports annuels du groupe des industries du papier, principalement le rapport "Transformations diverses du papier", numéro de catalogue 36-206.

SECTION 1

COMMERCIAL PRINTING

S.I.C. 286

IMIMERIE COMMERCIALE
C.A.E. 286

1974

Commercial printing is one of the four industries in the Printing, Publishing and Allied Industries Group. Other industries in the group are: Platemaking, Typesetting and Trade Bindery Industry; Publishing Only; Publishing and Printing. Refer to the beginning of the publication for the definition of these industries.

In 1974, the manufacturing revenue realized by the establishments classified to this industry amounted to \$1,214.7 million or 23.0% greater than the 1973 revenue of \$987.6 million.

This industry is characterized by its large number of small establishments as only 175 of the 2,208 included in this 1974 census had more than 50 employees but they accounted for approximately 64% of the revenue or \$781.1 million.

The following summarizes this revenue by type for the period 1970 to 1974:

Au cours de l'année observée, le coût de ces cinq matières s'est élevé à \$304.3 millions, soit 59 % de toutes les matières et fournitures utilisées.

The preliminary estimate of manufacturing revenue for this industry in 1975 was \$1,362.6 million according to data published by the Inventories, Shipments and Orders Section (Refer to Catalogue 31-001). This represents an increase of 12.2% over 1974.

L'estimation préliminaire des recettes de fabrication touchées par cette branche d'activité en 1975 a été de \$1,362.6 millions, selon les données publiées par la Section des stocks, livraisons et commandes (voir no 31-001 au catalogue). Ce chiffre représente une augmentation de 12.2 % par rapport à 1974.

Note: "Manufacturing activity" in this report refers mainly to the printing activity, and "Shipments of goods of own manufacture" consist of revenue from printing and/or shipments of printed products. The Census of Commercial Printing is part of the Census of Manufactures and the terminology used in this report has been kept in conformity with that used for manufacturing.

Note: L'"Activité manufacturière" dans le présent rapport, vise principalement l'imprimerie, et les "livraisons de produits de propre fabrication" comprennent le revenu de l'imprimerie et (ou) des livraisons de matières imprimées. Le recensement de l'imprimerie commerciale fait partie du recensement des manufactures et la terminologie employée dans le présent rapport a été adaptée à celle de la fabrication.

SECTION 2

PLATEMAKING, TYPESETTING AND TRADE BINDERY INDUSTRY S.I.C. 287

INDUSTRIE DU CLICHAGE, DE LA COMPOSITION ET DE LA RELIURE COMMERCIALE C.A.E. 287

1974

This industry is one of the four industries in the Printing, Publishing and Allied Industries Group. The other industries in the group are: Commercial Printing; Publishing Only; Publishing and Printing.

The definition of the industry "Platemaking, Typesetting and Trade Bindery Industry" is as follows: Establishments (trade shops) primarily engaged in providing specialized services to the printing and publishing trades, advertising agencies or other: the making of image bearing photographic films, plates and printers' dies of all types; doing typesetting; making binders or covers; doing hand or machine bindery work and allied postprinting converting or finishing operations.

Establishments primarily engaged in the manufacture of non-image bearing printing plates, which become the raw materials of the platemaking plants, are included elsewhere according to the kind of plate made.

Establishments primarily engaged in engraving jewellery are classified in Industry No. 695 - Watch and Jewellery Repair Shops, and those primarily engaged in engraving on base metals for purposes other than printing are classified in Industry 392 - Jewellery and Silverware Industry.

In 1974, the value of shipments of goods of own manufacture by this industry was \$134.5 million or 13.8% greater than the \$118.2 million of 1973.

There are a large number of small establishments as indicated by Table 3 on page 15 of the publication. It is indicated that of the 432 establishments included in the 1974 census, only 9 had more than 100 employees.

This industry is very labour intensive and the total salaries and wages paid equalled \$72.6 million in 1974, an increase of 13.0% over the \$64.2 million paid in 1973. The average hourly earnings of the production and related workers climbed from \$4.54 in 1973 to \$5.09 in 1974.

Note: "Manufacturing activity" in this report refers mainly to specialized services to the printing trade industries. "Shipments of goods of own manufacture" consist of revenue from the above mentioned activities and/or shipments of manufactured products. The census of Platemaking, Typesetting and Trade Bindery Industry is part of the Census of Manufactures and the terminology used in this report has been kept in conformity with that used for manufacturing.

Cette industrie est une des quatre industries du groupe: Imprimerie, édition et activités annexes. Les autres industries du groupe sont: Imprimerie commerciale; Édition seulement; Édition et impression.

La définition de l'"Industrie du clichage, de la composition et de la reliure commerciale", est la suivante: Établissements (ateliers) qui s'occupent principalement de fournir des services spécialisés aux commerces d'imprimerie et d'édition, aux agences de publicité ou autres; production de pellicules photographiques impressionnées, de clichés et de matrices d'impression de tous genres; composition; fabrication d'auto-reliures et de couvertures; reliure à la main ou à la machine; et autres travaux de transformation et de finissage de matières imprimées.

Les établissements qui s'occupent principalement de la fabrication de clichés non impressionnés, qui deviennent la matière première des ateliers de clichage, sont classés selon le genre de clichés fabriqués.

Les établissements qui s'occupent principalement de gravure sur bijoux sont classés dans l'Industrie 695 - Ateliers de réparation de montres et de bijoux, et ceux qui s'occupent principalement de gravure sur métaux communs pour d'autres fins que l'imprimerie sont classés dans l'industrie 392 - Fabrication de bijouterie et d'orfèvrerie.

La valeur des livraisons de produits de propre fabrication de cette industrie est passée de \$118.2 millions en 1973 à \$134.5 millions en 1974, marquant une hausse de 13.8 %.

Cette industrie présente un grand nombre de petits établissements, comme l'indique le tableau 3 à la page 15 de la publication. Des 432 établissements pris en compte au recensement de 1974, 9 seulement comptaient plus de 100 salariés.

Cette industrie présente une main-d'œuvre abondante et les traitements et salaires versés ont totalisé \$72.6 millions en 1974, soit une hausse de 13.0 % sur les \$64.2 millions enregistrés l'année précédente. Les gains horaires moyens des ouvriers de la production et assimilés sont passés de \$4.54 en 1973 à \$5.09 en 1974.

Note: L'"Activité manufacturière" dans la présente publication vise principalement les services spécialisés se rapportant aux industries, Édition et imprimerie, et Imprimeries commerciales. Les "Livraisons de produits de propre fabrication" comprennent le revenu provenant des activités ci-dessus et (ou) des livraisons de produits manufacturés. Le recensement de l'Industrie du clichage, de la composition et de la reliure commerciale est classé dans le recensement des manufactures et la terminologie employée dans la présente publication est adaptée à celle de la fabrication.

C.A.E. 288

1974

This industry is one of the four industries in the Printing, Publishing and Allied Industries Group. Other industries in the group are: Commercial Printing; Platemaking, Typesetting and Trade Bindery Industry; Publishing and Printing.

The "Publishing Only" industry includes establishments primarily engaged in publishing, which do no printing. The term "publishing", as applied in this industry, includes publishing of books, newspapers, periodicals, almanacs, maps, guides and similar products.

In 1974, the total revenue for this industry equaled \$322.5 million, an increase of 12.0% over the \$287.8 million of 1973.

Note: "Manufacturing activity" in this report refers to the publishing activity and "Shipments of goods of own manufacture" consist of revenue from the above-mentioned activity, including the advertising revenue derived from the publication of newspapers and periodicals. The census of the Publishing Only industry is part of the Census of Manufactures and the terminology used in this report has been kept in conformity with that used for manufacturing.

Cette industrie est une des quatre industries du groupe: Imprimerie, édition et activités annexes. Les autres industries du groupe sont: Imprimerie commerciale; Industrie du clichage, de la composition et de la reliure commerciale; Édition et impression.

L'industrie Édition seulement, comprend les établissements qui s'occupent principalement d'édition et n'impriment pas. Le terme "édition", propre à cette industrie, comprend l'édition de livres, journaux, périodiques, almanachs, cartes, guides et autres produits du genre.

Les recettes totales de cette industrie en 1974 se chiffraient à \$322.5 millions comparativement aux \$287.8 millions de 1973, soit une augmentation de 12.0 %.

Note: L'"Activité manufacturière" dans la présente publication vise l'édition, et les "Livraisons de produits de propre fabrication" comprennent le revenu provenant des activités ci-dessus, y compris le revenu provenant de la publicité dans les journaux et périodiques. Le recensement de l'industrie de l'édition seulement est classé dans le recensement des manufactures et la terminologie employée dans la présente publication est adaptée à celle de la fabrication.

EDITION ET IMPRESSION
C.A.É. 289

1974

This industry is one of the four industries in the Printing, Publishing and Allied Industries Group. Other industries in the group are: Commercial Printing; Platemaking, Typesetting and Trade Bindery Industry and Publishing Only. Please refer to Section 1 for industry definitions.

In 1974, the total revenue for the 614 establishments classified to this industry was \$878.8 million. This represented an increase of 14.6% over the 1973 total of \$766.8 million. The revenue from daily newspapers in 1974 was \$630.4 million and accounted for 72% of the total.

The decrease in revenue indicated in Tables 7 and 8 for national weekend newspapers is mainly because revenue detail from small establishments was not collected effective with the 1974 census.

The cost of materials and supplies equalled \$211.1 million in 1974 which was 23.5% greater than the \$170.9 million spent in the previous year. Newsprint paper is the most significant of the materials used and in both years the cost of this paper accounted for approximately 60% of the total.

The number of production and related workers decreased to 15,311 in 1974 compared to 15,406 in 1973. Their average hourly earnings climbed to \$5.41 from \$4.78.

The preliminary estimate for 1975 of total revenue for this industry, published by the Inventories, Shipments and Orders Section, (refer to Catalogue 31-001) was \$966.1 million or a gain of close to 10%.

Note: "Manufacturing activity" in this report refers mainly to the publishing and printing activity and "Shipments of goods of own manufacture" consist mainly of revenue from publishing and printing including the advertising revenue derived from the publication of newspapers or periodicals. The census of the Publishing and Printing industry is part of the Census of Manufactures and the terminology used in this report has been kept in conformity with that used for manufacturing.

Cette industrie est une des quatre industries du groupe: Imprimerie, édition et activités annexes. Les autres industries du groupe sont: Imprimerie commerciale; Industrie du clichage, de la composition et de la reliure commerciale; et Édition seulement. Prière de consulter la Section 1 pour les définitions des industries.

Les recettes totales des 614 établissements de cette industrie sont passées de \$766.8 millions en 1973 à \$878.8 millions en 1974, marquant une hausse de 14.6 %. En 1974, les ventes des quotidiens sont intervenues pour 72 % du total (\$630.4 millions).

La baisse des recettes présentée aux tableaux 7 et 8 et qu'a enregistrée les grands journaux de fin de semaine provient surtout du fait que le détail des recettes des petits établissements n'a pas été recueilli à compter du recensement de 1974.

Le coût des matières et des fournitures s'est chiffré à \$211.1 millions en 1974, soit 23.5 % de plus que les \$170.9 millions enregistrés l'année précédente. Le papier journal constitue la matière la plus utilisée puisque, au cours de ces deux années, il a représenté 60 % des coûts totaux.

Le nombre de travailleurs de la production et assimilés est passé de 15,406 en 1973 à 15,311 en 1974, et leurs gains horaires moyens, de \$4.78 à \$5.41.

L'estimation préliminaire des recettes totales de cette industrie pour 1975, publiée par la Section des stocks, livraisons et commandes, (consulter le no 31-001 au catalogue), s'est établie à \$966.1 millions, un gain de près de 10 %.

Nota: L'"Activité manufacturière" dans le présent rapport vise principalement l'édition et l'impression et les "Livraisons de produits de propre fabrication" comprennent en majeure partie le revenu provenant de l'édition et de l'impression, y compris le revenu provenant de la publicité dans les journaux et périodiques. Le recensement de l'industrie: édition et impression, est classé dans le recensement des manufactures et la terminologie employée dans le présent rapport a été adaptée à celle de la fabrication.

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment – Smallest operating unit capable of reporting certain specified input and output data, usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity – Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture – Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added – Net output as measured by gross output less purchased commodity inputs used and contract work by others.

(a) Value added, manufacturing activity: Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

(b) Value added, total activity: Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages – Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use: beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories – Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units – Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

Etablissement – Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Cout des matières et fournitures, du combustible et de l'électricité – De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication – Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités^a enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignación au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fonderie intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée – Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

a) **Valeur ajoutée, activité manufacturière:** valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

b) **Valeur ajoutée, activité totale:** comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires – Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc. versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks – Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignación.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires – Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).
