NOTES

1. Imports of petroleum products, Canada

The discrepancy between the import figures in Table 3 and those contained in Table 4, (which are compiled from custom's entries by the External Trade Division of the Bureau of Statistics), is due in part to timeliness.

The influencing factors are:

- (a) The External Trade Division's monthly "cut off" date in the preparation of their material is the 25th of the reporting month while the import data in Table 3 is compiled on a calendar month basis.
- (b) The refiners responding to the Manufacturing and Primary Industries Division survey may base their reported imports on invoices received in a particular month, when in fact the product may be held in bond at the port facilities and only admitted through customs at a later date.

2. Companion publications

Following is a list of related publications which may be a benefit to the reader. Requests for copies of any of these should be addressed to Information Division, Dominion Bureau of Statistics, Ottawa.
