LIBRAR THE PETROLEUM PRODUCTS INDUSTRY IN CAN.DA, 1927.

Cutput of petroleum products from Canadian plants in 1927 was valued at \$64,528,820, a decline of 6.7 million dollars from the figure reported for 1926, according to a statement just issued by the Dominion Bureau of Statistics at Ottawa. This production figure includes the output from 16 petroleum refineries valued at \$63,979,849 and the production from 7 plants which compounded lubricating oils and greases worth \$548,971.

Of the 16 refineries in operation, 4 were in Ontario, 4 in Alberta, 3 in British Columbia, 2 in Quebec and 1 in each of the provinces of Nova Scotia, Manitoba, and Saskatchewan. Capital employed was given at \$55,442,193; the average number of employees was 3,802; materials cost \$52,743,530 and the value added by manufacturing was \$11,236,319 Production of gasoline totalled 158,549,724 gallons of which 73,722,859 gallons were btained by the cracking process. Final output of fuel and gas oils totalled 286,525,733 gallons of which 239,272,246 gallons were for sale and 47,253,487 gallons for use as fuel in the reporting plants; in addition it was reported that 206,639,272 gallons were made for use in cracking processes.

Of the 7 concerns compounding lubricating oils and greases, 3 were in Quebea and 4 in Ontario. Capital invested was \$693,371; employees numbered 54; materials cost \$316,391, and the value added was \$232,580.

Considerable quantities of casinghead gasoline are imported into Canada each year for use in blending with the refinery gasoline; the amounts are shown in the import figures and are not included with the figures of refinery cutput.
