THE PETROLEUM PRODUCTS INDUSTRY IN CANADA, 1930.

Output of petroleum products from Canadian plants was valued at \$91,787,205 in 1930, according to a statement issued by the Dominion Bureau of Statistics at Ottawa. This production was the second highest ever reported for the industry, being only 8 per cent under the record of \$99,408,314 in the previous year and 11 per cent over the total of \$83,123,172 reported for 1928, the third best year. These totals include data on the refining of crude oil and the compounding of lubricating oils and greases but this report also gives detailed information for each of these groups separately.

(a) Petroleum Refining.

In 1930 there were 15 petroleum refineries operating at strategic points across Canada as follows: 1 in Nova Scotia on the eastern coast; 2 in Quebec, both at Montreal; 4 in Ontario, 2 being at Toronto, 1 at Sarnia, and 1 at Petrolia; 1 in Manitoba at St. Boniface; 1 in Saskatchewan at Regina; 4 in Alberta, 2 being at Calgary, 1 at Coumbs and 1 at Wainwright; and 2 in British Columbia on the western coast.

These plants used 1,064,434,974 gallons of crude oil in 1930, including 592,894,949 gallons from United States, 320,017,161 gallons from South America, and 51,522,864 from Canadian wells. Only 1 refinery in Alberta operated entirely on Canadian crude, but the 3 others in that province and 2 of the Ontario plants used some Canadian oil while obtaining the bulk of their supply from United States fields. The other 2 Ontario refineries, the Manitoba works, 1 of the Quebec plants, and 1 of the British Columbia plants used only United States crude, and the remaining refineries obtained supplies from South America and United States.

Capital employed in the refining industry as represented by these 15 concerns was reported at \$69,077,982; the number of employees averaged 8,030 monthly and the cost of materials amounted to \$71,307,879. Gasoline production totalled 445,599,417 imperial gallons including 169,314,761 gallons made by the cracking process. Final sales of fuel and gas oils from the refineries amounted to 375,255,986 gallons and in addition to this the operating companies used 99,308,393 gallons for fuel purposes. Other sales included 43½ million gallons of kerosene, 37½ million gallons of asphalt, 18 million gallons of lubricating oils, 13½ million pounds of lubricating grease, 7 million gallons of solvent naphtha, and over 10 million pounds of paraffine wax and candles.

Considerable quantities of casinghead gasoline were imported into Canada during the year for use in blending with refinery gasoline; the amounts are separately shown in the import figures but are NOT included with the figures of refinery output.

(b) Lubricating Oils and Greases.

The 13 firms compounding lubricating oils and greases were located as follows:- 4 in Quebec, 4 in Ontario, 2 in British Columbia, and 1 in each of Manitoba, Saskatchewan and Alberta. Capital invested in these plants totalled \$1,256,399, the average number of employees was 104, the cost of materials amounted to \$492,550, and the sales value of the goods made was reported at \$977,494, including \$753,336 worth of lubricating oils.
