ANNUAL INDUSTRY REPORTMANUFACTURES OF THE NON-METALLIC MINERALS GROUPPETROLEUM PRODUCTS INDUSTRY, 1941

Statistics for the Petroleum Products Industry cover all establishments in Canada which were occupied chiefly in (a) the refining of crude oil to produce gasoline, fuel oil, etc., and (b) the blending or compounding of lubricating oils and greases.

Thirty-five refineries and 14 blending plants, or a total of 49 works, reported under this category in 1941 and the aggregate value of production was \$156,635,495, an increase of 28.2 per cent over the 1940 total of \$122,212,800.

Output figures for 1941 included \$155,389,872 for petroleum refineries and \$1,245,623 for concerns engaged in blending oils and greases, against corresponding totals in 1940 of \$121,012,497 and \$1,200,503, respectively. The principal statistics for each of these groups and for the industry as a whole are tabulated below and the detailed figures for each division are recorded separately in the succeeding pages of this report.

Table 1 - PRINCIPAL STATISTICS OF THE PETROLEUM PRODUCTS INDUSTRY, 1937 - 1941

Year	Number of plants	Capital employed	Average number of employees	Salaries and wages	Cost of fuel and electricity at works	Cost of materials at works	Gross selling value of products at works
		\$		\$		\$	\$
<u>PETROLEUM REFINING</u>							
1937	44	63,759,579	5,047	8,126,583	4,444,878	79,993,972	97,701,954

(a) THE PETROLEUM REFINING INDUSTRY, 1941

Thirty-five petroleum refineries operating in Canada during 1941 were distributed by provinces as follows: 9 in Saskatchewan, 7 in Alberta, 5 in Ontario, 4 in Quebec, 4 in Manitoba, 3 in British Columbia and 1 in each of Nova Scotia, New Brunswick and Northwest Territories. Compared with 1940, there was a loss of 2 refineries in Alberta and 1 in Saskatchewan. The operating refineries had a capacity of 232,290 barrels of crude oil per day, of which Ontario had 68,000 barrels or 29.5 per cent; Quebec, 67,000 barrels or 28.8 per cent; Nova Scotia, 34,000 barrels or 14.6 per cent; British Columbia, 24,500 barrels or 10.6 per cent; Saskatchewan, 17,800 barrels or 7.4 per cent; Alberta, 16,250 barrels or 7.0 per cent; Manitoba, 4,150 barrels or 1.8 per cent; the Northwest Territories, 840 barrels or .4 per cent, and New Brunswick, 250 barrels. Location, type and capacity for each of these refineries is recorded in the directory at the end of this report.

During the year, 1,831,038,473 gallons of imported crude oil and 682,929,374 gallons of crude oil and absorption gasoline from Canadian wells, or a total of 2,033,898,067 gallons was put through Canadian refineries, this amounting to about 67 per cent of the rated capacity. Of the total crude input, about 47 per cent was imported from the United States and nearly 35 per cent from other countries, while about 17 per cent came from Canadian wells. The total cost at the refineries of all crude oil and naphtha charged to stills during the year was \$115,574,954. Stocks of crude oil held at the refineries on December 31 amounted to 144,786,917 gallons.

Refinery production of gasoline in 1941 amounted to 857,924,454 gallons, and in addition the refineries used for blending about 47,501,143 gallons of imported casinghead gasoline which is not included in the Canadian production figures. The gallonage of gasoline made in 1941 was the highest on record, being 10 per cent over 1940, which in turn was 5 per cent over 1939. The refinery selling value of the gasoline made during the year was \$90,150,775. Stocks of gasoline held by the reporting firms on December 31 included 117,170,696 gallons of straight run or cracked gasoline and 4,249,650 gallons of imported casinghead gasoline. In 1941 there was an output of 10,282,175 gallons of natural gasoline from absorption plants in Alberta. This was practically all sold to refineries and is included with the gallonage charged to stills and the refined gasoline made therefrom is included in the refinery output figures.

Imports of gasoline, including casinghead, amounted to 88,522,581 gallons during 1941, which, added to the production of 857,924,454 gallons plus the decline in stocks of 7,712,547 gallons and less the exports

of 15,845,229 gallons, made an apparent Canadian consumption of 938,516,103 gallons. Actual sales reported to the Provincial Governments under the Gasoline Tax Acts amounted to 980,426,059 gallons.

Production of fuel and gas oils (excluding any made and used for cracking processes) totalled 834,848,910 gallons, of which 771,897,171 gallons were made for sale and 62,951,759 gallons for use as fuel in the producing plant. Imports amounted to 63,585,706 gallons and exports to 18,469,619 gallons. Refinery stocks at the end of the year stood at 95,705,708 gallons, or about 995,000 gallons more than in 1940. The apparent consumption of fuel and gas oils in Canada, as calculated from the above figures, amounted to 868,595,460 gallons.

Output of tractor and engine distillates was 40,810,126 gallons in 1941, imports amounted to 965,827 gallons, and producers' stocks increased 1,259,674 gallons. The apparent Canadian consumption was 40,536,279 gallons.

Capital employed in the petroleum refining industry in 1941 was reported at \$1,910,057, of which \$37,781,957 was the value placed on land, buildings, machinery and equipment; \$39,862,266 represented inventories of finished products and processing materials, and \$4,265,854 were for operating capital, such as, cash, bills and accounts receivable. The monthly employment averaged 5,517 persons who received \$10,186,582 in salaries and wages. Expenditures for fuel and electricity amounted to \$7,265,685 and \$125,258,514 were paid out for crude oil and other processing materials.

Table 3 - NUMBER AND TOTAL CAPACITY OF PETROLEUM REFINERIES IN OPERATION IN CANADA, 1938 - 1941

Province	1938		1939		1940		1941	
	Number	Capacity in barrels of crude per day						
Nova Scotia	1	20,000	1	32,500	1	32,500	1	54,000

(a) Import figures for fuel oil include amounts brought in "ex-warehouse for ships' stores". This item covers fuel oil imported in bond for use in fueling vessels at Canadian ports and, as there is no corresponding export item, such quantities might properly be omitted when compiling figures of Canadian consumption. In 1940 the amount under this item was 54,453,217 gallons, and in 1941 it was 52,242,767 gallons.

(b) Exclusive of fuel oil for cracking operations but including fuel oil used by refineries for power or heating purposes.

(c) Allows for changes in stocks at points other than refineries.

Fuel oil includes all oils heavier than 42° A.P.I. processed from petroleum. Amounts recorded respectively for domestic, industrial, and tractor purposes were for actual CONSUMPTION within the areas indicated; those recorded under railways and bunkering were taken from, or accepted at delivery points within these areas, but were consumed by carriers where required. Fuel oil used as a material in manufacturing is omitted.

(b) MANUFACTURE OF LUBRICATING OILS AND GREASES (OTHER THAN IN REFINERIES) - 1941

Fourteen Canadian factories were occupied chiefly in compounding lubricating oils and greases in Canada during 1941. Ten of these plants were located in Ontario, 3 in Quebec and 1 in British Columbia.

They employed a fixed and working capital of \$565,471 and gave work to a monthly average of 89 people who were paid \$140,464 as salaries or wages. Purchases of processing materials and containers cost \$723,923 and the selling value of products totalled \$1,245,623. Included in the year's output were lubricating oils at \$976,182, lubricating greases at \$185,523 and soaps or soap powders at \$52,629.

Total Canadian output of lubricating oils, including production from the refineries, amounted to 38,008,499 gallons in 1941 against 30,006,720 gallons in 1940. Corresponding figures for lubricating greases totalled 16,668,438 pounds in 1941 and 10,521,173 pounds in 1940. By taking account of changes in producers' stocks and adding the imports to the Canadian production, the consumption of lubricating oils in Canada during 1941 amounted to 52,981,705 gallons.
