## NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: **Volume I** — The Primary Industries, including mining, forestry and fisheries; **Volume II**—Manufacturing; **Volume III**—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I — General Review of the Manufacturing Industries, \$1.50
- II — The Manufacturing Industries, by Provinces
  - Section 1. Principal Statistics of Major Industrial Groups and Leading Industries, 50¢
  - Section 2. Principal Statistics of Individual Industries, 75¢
  - Section 3. Principal Statistics by Regional Distribution, 75¢
- III — Foods and Beverages
- IV — Tobacco and Tobacco Products
- V — Rubber Products
- VI — Leather Products
- VII — Textiles
- VIII — Wood and Paper Products
- IX — Printing Trades
- X — Iron and Steel Products
- XI — Transportation Equipment
- XII — Non-ferrous Metal Products
- XIII — Electrical Apparatus and Supplies
- XIV — Non-metallic Mineral Products
- XV — Products of Petroleum and Coal
- XVI — Chemicals and Allied Products
- XVII — Miscellaneous Manufactures

The present report belongs in Part XV, Products of Petroleum and Coal. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A — General Review, 25¢
- B — The Coke and Gas Industry, 25¢
- C — The Petroleum Products Industry, 25¢

# THE PETROLEUM PRODUCTS INDUSTRY

1952

Statistics for the Petroleum Products Industry cover all establishments in Canada which were occupied in (a) the refining of crude oil to produce gasoline, fuel oil, etc., and (b) the blending or compounding of lubricating oils and greases. In 1952 another industry comprising 5 absorption gasoline plants, which recover the naphtha content of natural gas, was added to this group.

Thirty-five refineries, 15 blending plants and 5 absorption gasoline plants, or a total of 55 works, reported under this category in 1952 and the aggregate value of production was \$660,356,584, an

increase of 10.2 per cent over the 1951 total of \$598,940,516.

Output figures for 1952 included \$643,151,105 for petroleum refineries and \$12,320,823 for concerns engaged in blending oils and greases, against corresponding totals in 1951 of \$587,852,999 and \$11,087,517 respectively. Absorption gasoline plants reported a value of \$4,884,656 in 1952. The principal statistics for each of these groups and for the industry as a whole are tabulated in Tables 1 and 2, and the detailed figures for each division are recorded separately in the succeeding pages of this report.

Note. Profits or losses cannot be calculated from above figures as data are not available for general expense items, such as interest, rent, depreciation, taxes, insurance, etc.

1. Data for this group, which in 1952 was made up of 5 plants in Alberta, are presented in this bulletin for the first time. These plants were not treated as a separate group prior to 1952 and, accordingly, earlier statistics are not available. Complete coverage for this group is given in Section (c), Tables 36-40.

## (a) The Petroleum Refining Industry, 1952

The 35 petroleum refineries which operated in Canada during 1952 (including one refinery in Ontario which discontinued operations in the spring of 1952) were distributed by provinces as follows: 4 in Quebec, 5 in Ontario, 4 in Manitoba, 7 in Saskatchewan, 9 in Alberta, 3 in British Columbia and 1 each in Nova Scotia, New Brunswick and Northwest Territories. The refineries which were active at the end of the year had a capacity of 448,400 barrels of crude oil per day of which Quebec had 165,000 barrels or 36.8 per cent; Ontario, 100,800 barrels or 22.5 per cent; Alberta, 61,300 barrels or 13.7 per cent; Saskatchewan, 47,400 barrels or 10.6 per cent; British Columbia, 29,350 barrels or 6.7 per cent; Nova Scotia, 22,000 barrels or 4.9 per cent; Manitoba, 20,500 barrels or 4.6 per cent; the Northwest Territories, 1,250 barrels and New Brunswick, 300 barrels. The location, type and capacity of each of these refineries are recorded in the directory at the end of this report.

During the year 2,892,977,452 gallons of imported crude oil and 1,983,050,133 gallons of crude oil and absorption gasoline from Canadian wells, or a total of 4,876,027,585 gallons, was put through Canadian refineries, this amounting to about 85 per cent of the rated year-end capacity. Of the total crude input about 14 per cent was imported from the United States and nearly 45 per cent from other countries while about 41 per cent came from Canadian wells. The total cost at refineries of all crude oil and naphtha charged to stills during the year was \$416,687,222. Stocks of crude oil held at the refineries on December 31st amounted to 376,471,902 gallons.

Refinery production of gasoline amounted to 2,043,029,453 gallons, and, in addition, the refineries used for blending about 25,509,583 gallons of imported casinghead gasoline which is not in-

cluded in the Canadian production figures. The gallonage of gasoline made in 1952 was 11 per cent over 1951 which, in turn, was 15 per cent over 1950. The refinery selling value of the gasoline made during the year was \$327,477,329. Stocks of gasoline held by the refineries on December 31st, included 162,944,072 gallons of motor or aviation gasoline and 743,855 gallons of imported casinghead gasoline. In 1952 there was an output of 20,027,066 gallons of natural gasoline from absorption plants in Alberta. This was practically all sold to refineries and is included with the gallonage charged to stills, and the refined gasoline made therefrom is included in the refinery output figures.

Imports of gasoline, including casinghead, amounted to 250,206,488 gallons during 1952, while exports, including re-exports, totalled 32,088,970 gallons. Sales, as reported to the Bureau on a monthly basis, amounted to 2,343,660,000 gallons, this figure being compiled from returns made to provincial governments in connection with tax payments.

Production of fuel and gas oils (excluding any made and used for cracking processes) totalled 2,294,470,999 gallons of which 2,122,638,719 gallons were made for sale and 171,832,230 gallons for use as fuel in the producing plants. Imports amounted to 792,946,342 gallons and exports, including re-exports, totalled 195,838 gallons. Producers' stocks of all fuel oils increased by 44,343,826 gallons to 335,935,748 gallons at the end of the year. Consumption of fuel oils and distillate in Canada, as reported by distributors and refiners, amounted to 2,925,647,174 gallons in 1952.

Employment in the refining industry totalled 11,228 persons who received \$44,699,608 in salaries and wages. Expenditures for fuel and electricity amounted to \$27,666,652 and \$442,917,146 were paid out for crude oil and other processing materials.

## (b) Manufacture of Lubricating Oils and Greases, (other than in Refineries), 1952

Fifteen factories were occupied chiefly in compounding lubricating oils and greases in Canada during 1952. Eight of these plants were located in Ontario, 4 in Quebec, 2 in British Columbia and 1 in Saskatchewan. They gave work to a total of 334 people who were paid \$1,088,527 as salaries and wages. Purchases of processing materials and containers cost \$8,913,243. Included in the year's output were lubricating oils at \$9,972,901, lubricating greases at \$2,255,045 and soaps or soap powders at \$62,961.

Total Canadian output of lubricating oils, including production from the refineries, amounted to 72,143,859 gallons in 1952 against 79,123,562 gallons in 1951. Corresponding figures for lubricating greases totalled 50,476,080 pounds in 1952 and 49,330,954 pounds in 1951. Sales of lubricating oils, as reported by principal dealers, amounted to 81,928,000 gallons in 1952, while sales of lubricating greases totalled 97,457,000 pounds.

## (c) Absorption Gasoline Plants, 1952

Data for this group, which in 1952 was made up of 5 plants in Alberta, are presented in this bulletin for the first time. Absorption plants are designed to recover the naphtha content of natural gas. In addition, large quantities of propane, butane and dry gas are recovered. These plants were not treated as a separate group prior to 1952 and, accordingly, earlier statistics are not available.

Five plants, all in Alberta, operated in this group in 1952. Value of production amounted to

\$4,884,656. Output included 32,192,859 M cubic feet of dry gas valued at \$2,030,911, 20,027,066 gallons of natural gasoline at \$2,054,441, 11,969,060 gallons of liquefied petroleum gases at \$576,246 and 8,671 tons of sulphur at \$173,058. Employees numbered 99 persons who received \$357,287 in salaries and wages. Expenditures for fuel and electricity amounted to \$143,648 and the raw gas and other materials used in processing cost \$2,124,299.
