## NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: Volume I—The Primary Industries, including mining, forestry and fisheries; Volume II—Manufacturing; Volume III—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I—General Review of the Manufacturing Industries, \$1.50
- II—The Manufacturing Industries of Canada, (7 sections, as follows:)
  - Section A. Summary for Canada, 25¢
  - Section B. Atlantic Provinces, 25¢
  - Section C. Quebec, 25¢
  - Section D. Ontario, 25¢
  - Section E. Prairie Provinces, 25¢
  - Section F. British Columbia, 25¢
  - Section G. The Manufacturing Industries of Canada, Regional Distribution, 75¢
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textile Mills
- VIII—Knitting Mills
- IX—Clothing
  - X—Wood and Paper Products
  - XI—Printing Trades
- XII—Iron and Steel Products
- XIII—Transportation Equipment
- XIV—Non-ferrous Metal Products
- XV—Electrical Apparatus and Supplies
- XVI—Non-metallic Mineral Products
- XVII—Products of Petroleum and Coal
- XVIII—Chemicals and Allied Products
- XIX—Miscellaneous Manufactures

The present report belongs in Part XVII, Products of Petroleum and Coal. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A—General Review, 25¢
- B—The Coke and Gas Industry, 25¢
- C—The Petroleum Products Industry, 25¢
- D—The Miscellaneous Products of the Petroleum and Coal Industry, 25¢

# THE PETROLEUM PRODUCTS INDUSTRY

## 1954

Statistics for the Petroleum Products Industry cover all establishments in Canada which were occupied in (a) the refining of crude oil to produce gasoline, fuel oil, etc. and (b) the blending or compounding of lubricating oils and greases. In 1952 another industry, comprising at that time 5 absorption gasoline plants which recover the naphtha content of natural gas, was added to this group.

Forty refineries, 13 blending plants and 8 absorption gasoline plants, or a total of 61 works, reported under this category in 1954 and the aggregate value of production was \$909,252,514, an increase of 30.8 per cent over the 1953 total of

\$694,988,605. It should be noted however, that the 1954 figure is not exactly comparable with previous years due to a change in procedure used in reporting value of products by the petroleum refining industry—see footnote to Table 7.

Output figures for 1954 included \$890,997,017 for petroleum refineries, \$12,696,501 for concerns engaged in blending oils and greases and \$5,558,996 for absorption plants, against corresponding totals in 1953 of \$679,960,932, \$10,391,128 and \$4,636,545, respectively. The principal statistics for each of these groups and for the industry as a whole are tabulated in Tables 1 to 5, and the detailed figures for each division are recorded separately in succeeding pages of this report.

### (a) The Petroleum Refining Industry, 1954

The 40 petroleum refineries which operated in Canada during 1954 were distributed by provinces as follows: 4 in Quebec, 6 in Ontario, 4 in Manitoba 9 in Saskatchewan, 10 in Alberta, 4 in British Columbia and 1 each in Nova Scotia, New Brunswick and Northwest Territories. The refineries which were active at the end of the year had a capacity of 561,450 barrels of crude oil per day, of which Quebec had 180,000 barrels or 32.1 per cent; Ontario, 146,000 barrels or 26.0 per cent; Alberta, 72,900 barrels or 13.0 per cent; Saskatchewan, 66,000 barrels or 11.8 per cent; British Columbia, 56,500 barrels or 10.1 per cent; Manitoba, 20,500 barrels or 3.7 per cent; Nova Scotia, 18,000 barrels or 3.2 per cent; the Northwest Territories, 1,250 barrels and New Brunswick, 300 barrels. The location, type and capacity of each of these refineries are recorded in the directory at the end of this report.

During the year 2,722,901,936 gallons of imported crude oil, and 3,263,312,419 gallons of crude oil and absorption gasoline from Canadian wells, or a total of 5,986,214,355 gallons, was put through Canadian refineries, this amounting to about 84 per cent of the rated year-end capacity. Of the total crude input about 5.1 per cent was imported from the United States and nearly 40.4 per cent from other countries while about 54.5 per cent came from Canadian wells. The total cost at refineries of all crude oil and naphtha charged to stills during the year was \$531,219,910. Stocks of crude oil held at the refineries on December 31st amounted to 254,147,928 gallons.

Refinery production of gasoline amounted to 2,416,031,141 gallons, and, in addition, the refineries used for blending about 19,695,661 gallons of imported casinghead gasoline which is not included in the Canadian production figures. The gallonage made in 1954 was 7.3 per cent over 1953 which, in turn, was 10 per cent over 1952. The refinery selling

value of the gasoline made during the year was \$444,892,139. Stocks of gasoline held by the refineries on December 31st, included 246,656,217 gallons of motor or aviation gasoline and 735,840 gallons of imported casinghead gasoline. In 1954 there was an output of 22,623,000 gallons of natural gasoline from absorption plants in Alberta. This was practically all sold to refineries and is included with the gallonage charged to stills, and the refined gasoline made therefrom is included in the refinery output figures.

Imports of gasoline, including casinghead, amounted to 216,579,552 gallons during 1954, while exports, including re-exports, totalled 15,854,731 gallons. Sales as reported to the Bureau amounted to 2,698,001,000 gallons, this figure being compiled from returns made to provincial governments in connection with tax payments.

Production of fuel and gas oils (excluding any made and used for cracking processes) totalled 2,934,344,232 gallons, of which 2,729,945,115 gallons were made for sale and 204,399,117 gallons for use as fuel in the producing plants. Imports amounted to 849,323,493 gallons and exports, including re-exports, totalled 1,905,002 gallons. Producers' stocks of all fuel oils increased by 94,100,040 gallons to 678,120,526 gallons at the end of the year. Consumption of fuel oils and distillate in Canada, excluding consumption under refinery boilers, as reported by distributors and refiners, amounted to 3,389,660,820 gallons in 1954.

Employment in the refining industry totalled 12,048 persons who received \$50,796,930 in salaries and wages. Expenditures for fuel and electricity amounted to \$30,973,211 and \$558,856,312 were paid out for crude oil and other processing materials.

## (b) Manufacture of Lubricating Oils and Greases, (other than in Refineries), 1954

Thirteen factories were occupied chiefly in compounding lubricating oils and greases in Canada during 1954. Seven of these plants were located in Ontario, 4 in Quebec, 1 in Manitoba and 1 in Saskatchewan. They gave work to a total of 294 people who were paid \$1,007,140 as salaries and wages. Purchases of processing materials and containers cost \$7,630,956. Included in the year's output were lubricating oils at \$10,910,496, lubricating greases at \$1,432,243 and soaps or soap powders at \$9,319.

Total Canadian output of lubricating oils, including production from the refineries, amounted to 68,563,701 gallons in 1954 against 69,120,056 gallons in 1953. Corresponding figures for lubricating greases totalled 37,330,229 pounds in 1954 and 48,477,566 pounds in 1953. Sales of lubricating oils, as reported by principal dealers, amounted to 80,430,000 gallons in 1954, while sales of lubricating greases totalled 78,952,000 pounds.

## (c) Absorption Gasoline Plants, 1954

Eight plants, all in Alberta, operated in this group in 1954. Value of shipments amounted to \$5,558,996. Output included 22,342,569 M cubic feet of dry gas valued at \$1,912,526, 22,623,229 gallons of natural gasoline at \$1,976,452, 24,513,495 gallons of liquefied petroleum gases at \$1,295,709 and 18,558 tons of sulphur at \$350,044. Employees numbered 134 persons who received \$512,138 in salaries and wages. Expenditures for fuel and

electricity amounted to \$120,738 and the raw gas and other materials used in processing cost \$2,054,409.

Absorption plants are designed to recover the naphtha content of natural gas. In addition, large quantities of propane, butane and dry gas are recovered. These plants were not treated as a separate group prior to 1952 and, accordingly, data for earlier years are not available.

TABLE 1. Principal Statistics of the Petroleum Products Industry, Significant Years 1929-1954, and by Provinces, 1953 and 1954

Year and province	Establishments	Employees	Earnings	Cost of fuel and electricity at plant	Cost of materials at plant	Value added by manufacture <sup>1</sup>	Gross selling value of products <sup>1</sup>

1. (a) Book value of all manufacturing inventories owned and held at plant and plant warehouses.

(b) Beginning with 1954, information on the value of year-end inventory holdings at plant and plant warehouses is being collected as part of the annual Census of Industry. These data were formerly collected by a separate survey. The summarized results for the Petroleum Products Industry for the year under review are shown in the above table.

1. The apparent advance shown in gross selling value of products at works in 1954 over 1953 by the Petroleum Refining Industry was due, in part, to an actual gain in physical volume of output but the major factor contributing to this increase was a change in accounting procedure used by some firms in calculating the value of products made. Prior to 1954 several different methods were used in arriving at a selling value of products at works; however, in 1954 all firms reported on a uniform basis, namely, "tank wagon prices, f.o.b. refinery" for all products except heavy fuel oil for which pipeline price was used. The net result of this change in reporting procedure was to exaggerate the gain in gross selling value of products in 1954 over 1953 beyond that which would have been normal had the old basis been in effect. It is estimated that the 1954 gross selling value at works for this industry, using the old basis, would have been about \$752 millions instead of the \$891 millions indicated above. On the other hand, the 1953 total, using the new basis, would have been \$807 millions instead of \$680 millions actually reported. Naturally, these changes have affected the figure for "value added by manufacture". The latter varies directly with the gross selling value of products; accordingly, any change in method for deriving the gross value of products is directly reflected in the "value added by manufacture", as indicated in the above table.

1954 .....	3,263,312,419	2,722,901,936	5,986,214,355

1. Includes the crude naphtha and absorption gasoline from the Turner Valley field, which was run to refinery stills.

2. Includes reduced crude.

**TABLE 15. Casinghead Gasoline Imported and Used for Blending at the Refineries, 1954  
(These items not included in previous tables)**

Imported natural casinghead gasoline received at the refinery during the year .....	Imp. gal.	17,352,411
	\$	2,167,824
Imported natural casinghead gasoline used for blending during year .....	Imp. gal.	19,695,661
Total stocks of imported natural casinghead gasoline at the end of the year .....	"	735,840

**TABLE 16. Stocks on Hand at the Refineries at the End of 1954**

	Stocks on hand at refineries on December 31, 1954	Increase or decrease compared with December 31, 1953
Imperial gallons		
Crude oil and naphtha, in its natural state, from Canadian wells .....	147,550,028	+ 31,779,311
Absorption gasoline, etc., from Canadian wells .....	1,158,357	- 82,305
Crude oil, imported:		
In its natural state .....	104,697,143	- 35,565,463
Not in its natural state .....	742,400	+ 196,371
Total crude .....	254,147,928	- 3,672,086
Naphtha specialties .....	5,766,925	+ 1,110,246
Aviation gasoline .....	17,041,010	+ 2,544,168
Motor gasoline .....	239,615,207	+ 34,338,557
Tractor fuel .....	892,372	- 620,733
Aviation turbine fuel .....	9,208,371	+ 4,140,643
Kerosene .....	7,205,313	+ 2,376,777
Stove oil (No. 1 fuel oil) .....	54,239,681	- 1,548,226
Diesel fuel .....	70,042,265	+ 13,857,314
Light fuel oils (Nos. 2 and 3) - Furnace fuel oil .....	157,229,283	+ 41,061,752
Other light fuel oil .....	7,619,145	+ 988,500
Heavy fuel oils (Nos. 4, 5 and 6) .....	97,612,025	- 8,335,597
Lubricating oils .....	11,648,929	+ 4,186,639
Total refined .....	678,120,526	+ 94,100,040

Note: 1. Amounts recorded respectively for domestic, industrial, and tractor purposes were for actual Consumption within the areas indicated; those recorded under railways and bunkering were taken from or accepted at delivery points within these areas, but were consumed by carriers where required.

2. Consumption of Heavy and Medium Fuel Oils (Nos. 6, 5 and 4) used under refinery boilers is not included in above totals.

TABLE 31. Principal Statistics of the Lubricating Oils and Greases Industry, 1950-1954

Year	Estab-	Em-	Earnings	Cost of fuel and electricity at plant	Cost at plant of materials used	Value added by manufacture <sup>1</sup>	Gross selling value of products <sup>1</sup>
	lish- ments						
	No.	No.	\$	\$	\$	\$	\$
1950 .....	14	328	849,511	28,914	6,489,520	1,476,861	7,995,295
1951 .....	16	331	972,773	48,527	8,163,903	2,875,087	11,087,517
1952 .....	15	334	1,088,527	68,014	8,913,243	3,339,566	12,320,823
1953 .....	13	286	988,784	57,529	7,215,941	3,117,658	10,391,128
1954 .....	13	294	1,007,140	121,431	7,630,956	5,186,097	12,696,501

1. Figures for value added by manufacture shown in Table 31, prior to 1952, were obtained by subtracting the cost of materials used, including fuel and electricity, from the value of production. In 1952, the gross value of production was replaced by value of factory shipments, f.o.b. plant. As no information on inventory change is available for 1952 and 1953, value added figures for these years were obtained by subtracting from the value of shipments the cost of materials, fuel and electricity. In 1954, information on the value of year-end inventory holdings at plant and plant warehouses was collected as part of the annual Census of Industry and information thus made available was taken into account in calculating the the value added figure for 1954.

TABLE 39. Principal Statistics of the Absorption Gasoline Industry, 1952-1954

Year	Estab-	Em-	Earnings	Cost of fuel and electricity at plant	Cost at plant of materials used	Value added by manufacture <sup>1</sup>	Value of factory shipments
	lish-	ployees					
	No.	No.	\$	\$	\$	\$	\$
1952 .....	5	99	357,287	143,648	2,124,299	2,616,709	4,884,656
1953 .....	5	96	374,309	115,954	1,922,553	2,598,038	4,636,545
1954 .....	8	134	512,138	120,738	2,054,409	3,441,650	5,558,996

1. Due to lack of inventory data, figures for value added by manufacture prior to 1954 were obtained by subtracting the cost of materials used, including fuel and electricity, from the total value of factory shipments. In 1954, information not previously available on the value of year-end inventory holdings at plant and plant warehouses was taken into account in calculating the "value added" figure.

TABLE 40. Products Made in the Absorption Gasoline Industry, 1953 and 1954

Product	Unit of measure	1953		1954	
		Quantity	Selling value at works	Quantity	Value of shipments
Dry gas <sup>1</sup> .....	M cu. ft.	19,641,851	\$ 1,648,455	22,342,569	\$ 1,912,526
Natural gasoline .....	Imp. gal.	20,419,820	1,740,931	22,623,229	1,976,452
Liquefied petroleum gases (propane and butane)	Imp. gal.	18,645,058	956,488	24,513,495	1,295,709
Sulphur .....	ton	16,192	290,671	18,558	350,044
All other products .....	-	-	-	-	24,265
<b>Total</b> .....	-	-	<b>4,636,545</b>	-	<b>5,558,996</b>

1. Figures for this item should not be added to the production data shown for natural gas in the mineral production statistics for Canada. The latter compilation includes the wet gas transferred to absorption plants.

TABLE 41. Production of Natural Gasoline in Alberta, 1950-1954

	1950	1951	1952	1953	1954
