THE MISCELLANEOUS PRODUCTS OF PETROLEUM AND COAL INDUSTRY, 1952

The Standard Industrial Classification adopted by the Dominion Bureau of Statistics in 1949 provides for a new group, the Miscellaneous Products of Petroleum and Coal Industry, for the first time; however, because of the small number of firms involved, no attempt was made to develop an industry grouping for statistical purposes until 1952. The group as now established includes firms, formerly classified in the Miscellaneous Non-Metallic Mineral Products Industry, which are primarily engaged in manufacturing products of petroleum and coal, not elsewhere classified, including fuel briquettes,

asphalt and tar paving materials and roofing coatings. The current review carries data for just one year as there was no comparable grouping before 1952.

In 1952 there were 17 operating plants in this miscellaneous industry. Production from these works was valued at \$6,089,393. Employment was afforded to 324 people who were paid \$1,052,415 in salaries and wages. Materials for use in manufacturing processes cost \$2,567,460, while fuel and electricity cost \$139,673.
