COKE STATISTICS FOR CANADA

July 1926

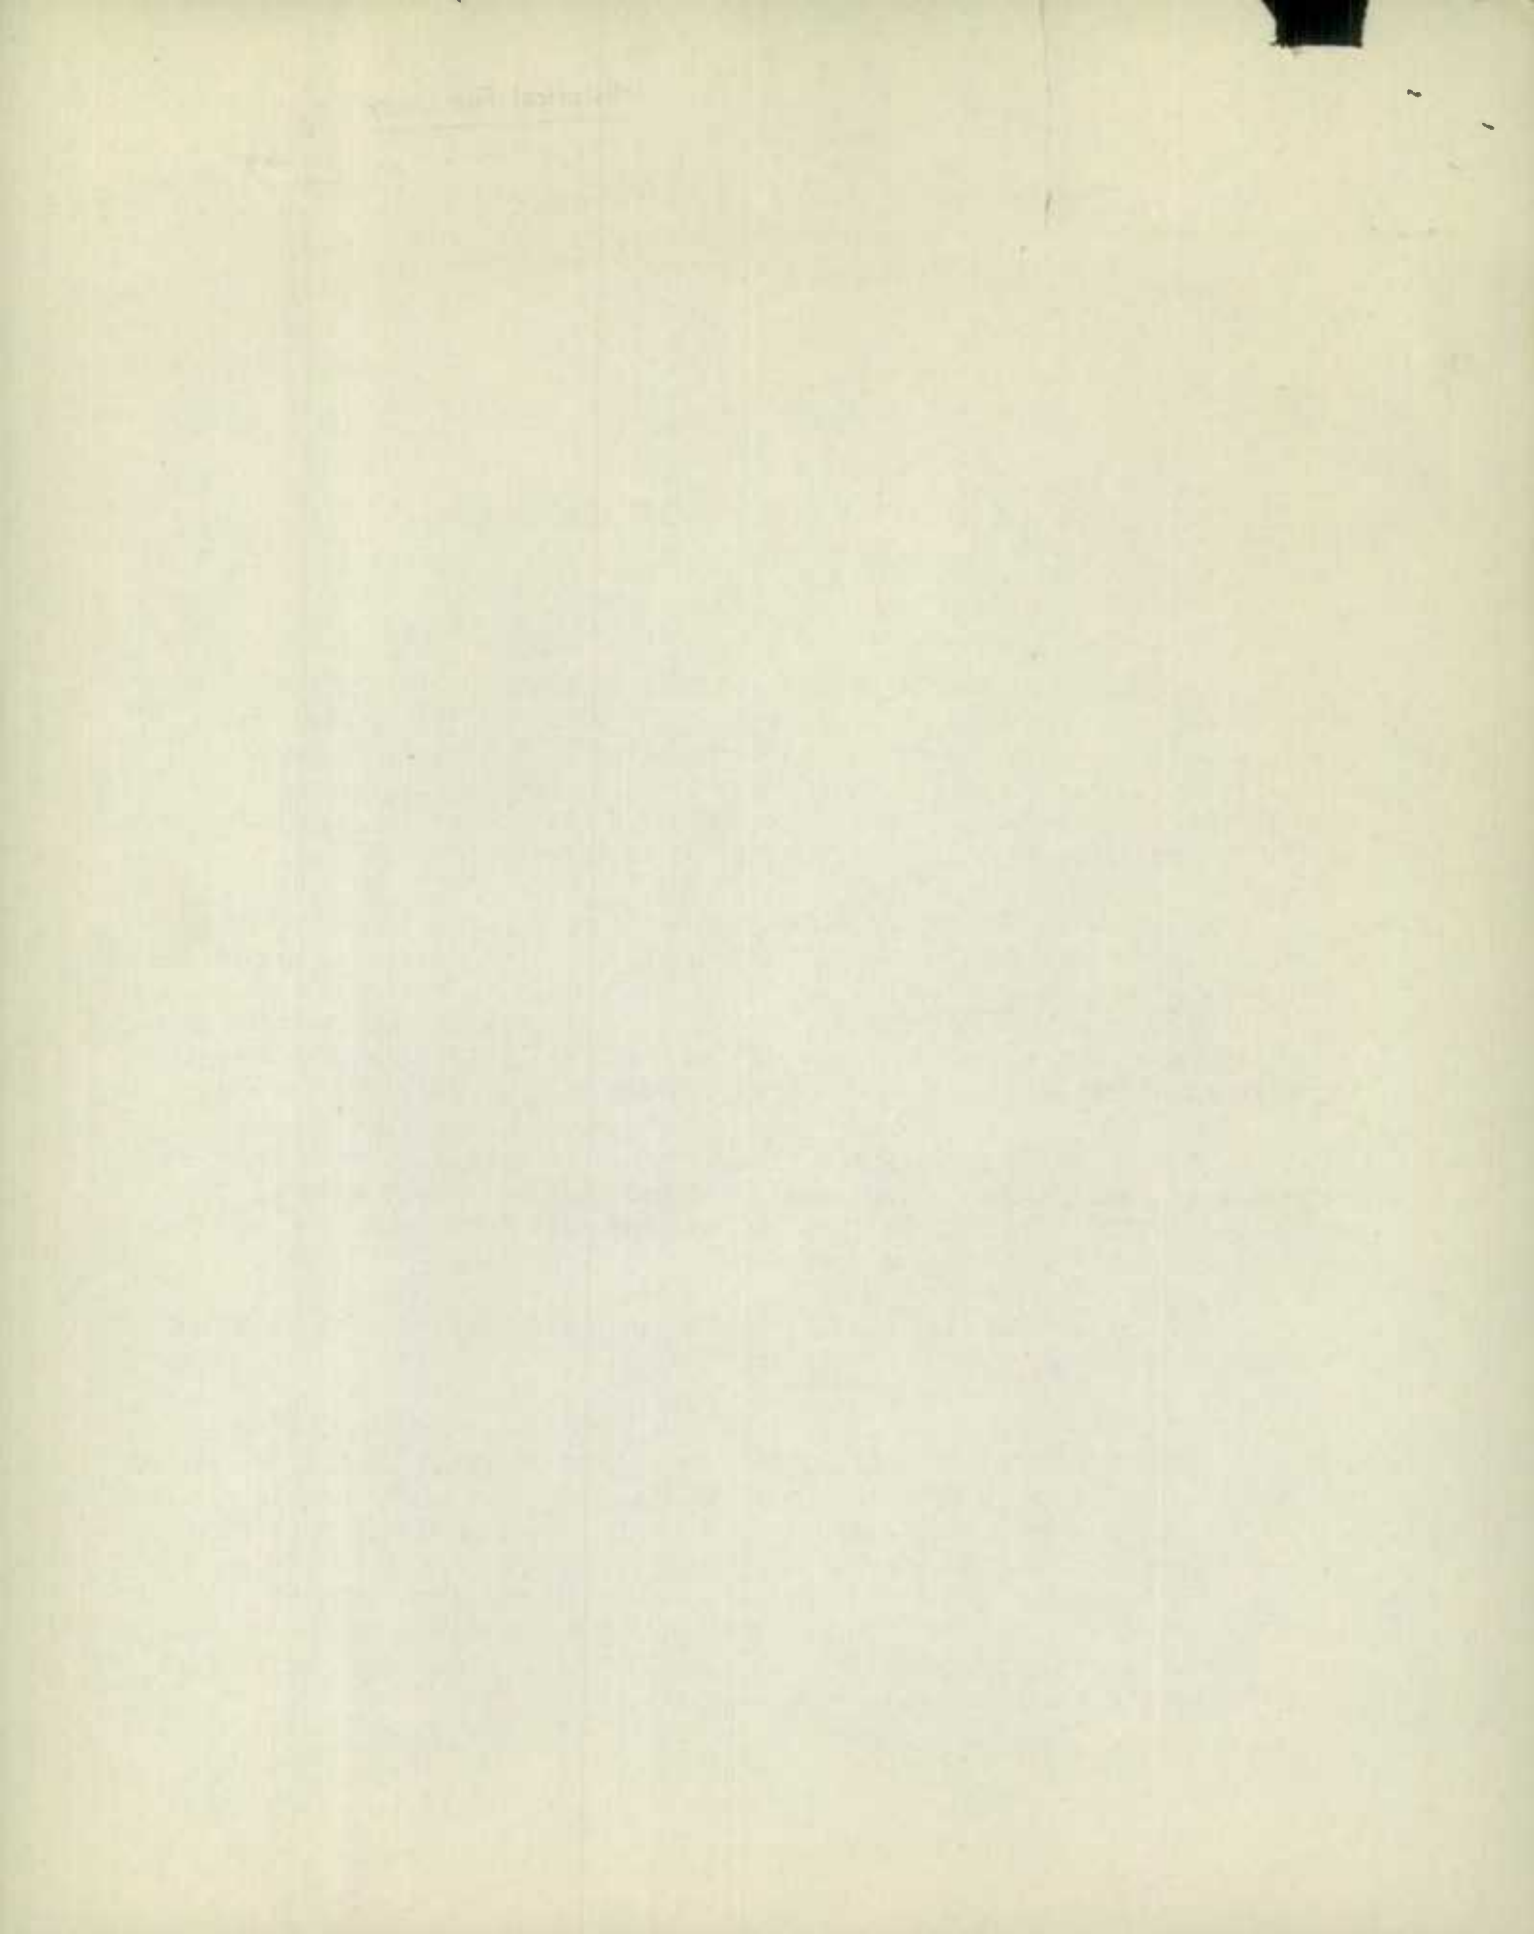

Production of coke in Canada during July amounted to 157,960 tons as compared with 151,564 tons in June, and 89,221 tons in July of last year. Coke plants in eastern Canada had an output of 48,284 tons as compared with 46,785 tons in June; Ontario ovens yielded 93,165 tons as against 87,528 tons in the previous month, while the production from western plants declined to 16,511 tons from 17,251 tons in June and 19,025 tons in May.

Imports of coke into Canada during July amounted to 79,214 tons as compared with 89,632 tons in June, and exports totalled 3,880 tons as against 5,250 tons in the previous month. Adding the tonnage of coke imported to the Canadian production and deducting the exports, the apparent consumption of coke in Canada during the month was 233,294 tons as compared with corresponding figures of 235,946 tons in June and 143,080 tons in July of last year.

Disposition of coke by the producing plants showed that 18,772 tons of coke were used in the coking plants, 82,389 tons were delivered to associated metallurgical works, and 45,146 tons were sold, making a total disposition of 146,317 tons for the month.

Coke charged to iron blast furnaces in Canada during July totalled 73,857 tons as compared with 76,444 tons in June.

During the first seven months of the year 589,263 tons of Canadian coal and 1,079,475 tons of imported coal were carbonized to produce 1,092,463 tons of coke giving an average yield of 65.5 per cent or 1,309 pounds of coke for each short ton of coal charged to the ovens. During the same period there was imported into Canada, 577,569 tons of coke making a total supply of 1,670,032 tons, but exports totalled 30,794 tons leaving 1,639,238 tons available for use in Canada. In the same period last year production totalled 803,068 tons, imports stood at 396,598 tons and exports amounted to 27,735 tons, the apparent consumption amounting to 1,171,931 tons.

COKE PRODUCTION IN CANADA BY MONTHS, 1926
