QUARTERLY REPORT

ON

COAL AND COKE STATISTICS
FOR CANADA

OCTOBER, NOVEMBER, DECEMBER, 1931

Published by authority of the Hon. H. H. Stevens, M.P.,
Minister of Trade and Commerce

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1932

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS.

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

A comprehensive record of the mining industry embodying historical and world data, detailed information on mineral production, imports and exports for Canada and general statistics relative to the mining industry on capital investment, employment, fuel consumption and power equipment arranged in 10 chapters each dealing with a particular branch of the industry. Statistics on production and trade in mineral products appear in detail in the appropriate chapters. A list of operating companies with their office and plant addresses is included. Fully indexed. Chapter titles are: Canada—The Gold Mining Industry—The Silver Mining Industry—The Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries—Directory of Reporting Firms—Notes on the Methods of Computing Values—Index.

Coal—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

A condensed report on production, imports and exports of coal and coke is issued monthly, publication being made about the twentieth of the next following month.

A more general review is published quarterly, showing statistics for each month, for the quarter, and for the year to date on the output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal, employment in coal-mining, and tonnage lost. There is also a section on coke showing production, imports, exports, distribution and consumption by months and by provincial groups.

Annual Report on Coal Statistics for Canada.

Text and tables showing for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Annual Bulletins—

(a) MINERAL PRODUCTION—

Metals.—Arsenic—Cobalt—Copper—Gold—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Metals including Aluminium, Antimony, Chromite, Iron ore, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesite, Magnesium Sulphate, Mineral Waters, Natro-Alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) MINERAL INDUSTRY.—Each bulletin of this group shows in synopsis, material to be published subsequently as one chapter of the annual report on the *Mineral Production of Canada*. These bulletins are published in mimeograph form from time to time during the year as the necessary material becomes available.

By Industries.—Gold Mining Industry including Alluvial Gold Mining, Auriferous Quartz Mining and Copper-Gold-Silver Mining—Silver-Cobalt and Silver-Lead-Zinc Mining Industry—Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

October, November, December

1931.

Foreword.—During the past nine years the Bureau has published comprehensive monthly reports on coal statistics, and for the past six years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published on the twentieth of the next following month.

A new *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

Canadian coal mines produced 3,725,589 tons during the last quarter of 1931, a decline of 13 per cent from the total for the corresponding period of 1930. Bituminous coal output during the three months ending December, 1931, totalled 2,234,176 tons, sub-bituminous coal, 153,954 tons, and lignite coal, 1,337,450 tons. Increases were recorded in the output from Saskatchewan and British Columbia mines but production declined in Nova Scotia, New Brunswick and Alberta. During the quarter under review, Nova Scotia mines accounted for 32.3 per cent of the total output; Alberta mines, 43.7 per cent; British Columbia mines, 14.1 per cent; Saskatchewan mines, 8.6 per cent; and New Brunswick mines, 1.3 per cent.

Imports of coal into Canada during the last three months of 1931 amounted to 3,914,942 tons or 17.8 per cent lower than the total of 4,769,541 tons brought in during the last quarter of 1930. Receipts from the United States totalled 3,612,235 tons and consisted of 596,406 tons of anthracite coal and 3,014,106 tons of bituminous coal. Imports from Great Britain consisted of 231,686 tons of anthracite coal and 53,189 tons of bituminous coal; from Germany, 13,249 tons of anthracite coal and from the French East Indies, 4,592 tons of anthracite coal. Lignite importations amounted to 1,723 tons cleared through British Columbia ports.

Exports of Canadian coal continued at a low level and totalled 102,111 tons or 40 per cent below the tonnage exported in the corresponding period of last year. Coal exported through Eastern Canada ports amounted to 52,657 tons as compared with 105,729 tons exported in the last three months of 1930; and through Manitoba, Saskatchewan, Alberta and British Columbia ports, 49,454 tons as against 48,988 tons.

Coal made available for consumption in Canada (computed on the basis of production plus imports less exports) reached a total of 7,538,420 tons, a decline of 15.1 per cent from the tonnage available during the corresponding months of last year.

Employment in Canadian coal mines showed the usual seasonal rising trend in the last three months of 1931; in October 27,585 men were on the mine payrolls, in November, 28,795 men and in December, 28,548 men. The average production per man-day was 2.6 tons and the average tonnage raised per man during the period was 141 tons.

Mines in operation during the period produced 65 per cent of their possible output; the time lost was due principally to "lack of orders." In October, a strike at Estevan, Saskatchewan, which involved 600 miners caused a loss in working time of 3,000 man-days. During the last quarter of 1931, three strikes in Alberta were responsible for the loss of 1,260 man-days' work.

Output during the calendar year 1931 amounted to 12,230,616 tons as against 14,881,324 tons in 1930 and 17,496,557 tons in 1929. Imports into Canada totalled 13,531,831 tons made up of 3,178,141 tons of anthracite coal, 10,347,280 tons of bituminous coal and 6,410 tons of lignite coal. Exports during the year included 336,302 tons of bituminous coal, and 23,551 tons of lignite coal. Canada's coal supply for the year was computed at 25,402,591 tons; in 1930 the total was 31,876,886 tons.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE STATISTICS FOR CANADA

October, November, December, 1931

Production of coke in Canada during the last quarter of 1931 at 430,583 tons showed an increase of 9 per cent over the 396,456 tons made in the next preceding quarter but was 26 per cent under the 583,063 tons reported for the final three months of 1930.

Output of by-product and gas house coke during the calendar year 1931 amounted to 1,835,622 net tons. This output represented a decline of 23 per cent from the 2,385,994 tons of last year which in turn was only exceeded by the record year 1929 when a total of 2,667,581 tons was reported.

During the year, when production totalled 1,835,622 tons, the apparent consumption of coke in Canada as calculated by deducting the exports of 20,980 tons from the tonnage made in Canada and adding the imports of 733,274 tons, amounted to 2,547,916 tons. In the previous year the apparent consumption, thus computed, was 3,417,233 tons and in 1929 it was 3,879,226 tons.

Statements on the disposition of coke during 1931 by the makers showed an increase in coke sales to 1,171,929 tons from 1,063,112 tons in 1930 while declines were registered in the quantities transferred to coke plants and associated metallurgical works. The tonnage used in coke plants dropped to 290,523 tons from 301,740 tons and transfers to smelters were also lower at 545,934 tons as against 951,748 tons in the previous year.

In 1931, charges to coke ovens included 561,547 tons of Canadian coal and 1,972,854 tons of imported coal, or a total of 2,534,401 tons of bituminous coal produced 1,835,622 tons of coke. This represented an average yield of 1,449 pounds of coke for each short ton of coal carbonized and compares with a yield of 1,451 pounds in 1930, 1,443 in 1929, and 1,447 pounds in 1928.

During October, November and December of this year 39,788 tons of coke were charged to iron blast furnaces in Canada, to make a total of 437,013 for the twelve months of 1931.

Coke Production in Canada, by Months, 1931

Month	Bituminous coal used for coke making			Coke made	Disposition of coke by makers					
					Used in		Sold to other smelters	Sold for domestic use, etc.	Total

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products—Castings and Forgings—Boilers, Tanks and Engines—Agricultural Implements—Machinery—Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock—Wire and Wire Goods—Sheet Metal Products—Hardware and Tools—Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Jewellery and Silverware—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos Products—Cement—Cement Products—Coke and Gas—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand-Lime Brick—Stone Dressing—Artificial Abrasives and Abrasive Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Graphite and Electrodes, (b) Gypsum Products, (c) Mica Products, (d) Magnesite Products, (e) Non-Metallic Mineral Products, n.e.s.

Chemicals and Allied Products: Coal Tar Distillation—Acids, Alkalies and Salts—Compressed Gases—Explosives, Ammunition and Fireworks—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps and Washing Compounds—Toilet Preparations—Inks, Adhesives—Polishes and Dressings—Flavouring Extracts—Wood Distillation—Miscellaneous Chemical Products, including (a) Baking Powder, (b) Boiler Compounds, (c) Plastics, (d) Insecticides, (e) Sweeping Compounds, (f) Disinfectants, (g) Matches, (h) Dyes and Colours, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

Analysis of the Radio Industry in Canada.

Monthly—

Production of Iron and Steel in Canada.

Coal and Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Report on the Consumption of Coke in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.

The Fertilizer Trade of Canada.
