industry embodying historical and world data on production, imports and exports for Canada and mining industry on capital investment, employment, equipment arranged in 10 chapters, each of the industry. Statistics on production are given in detail in the appropriate chapters. A list of office and plant addresses is included. Fully covered—The Gold Mining Industry—The Silver Mining Industry—Miscellaneous Metal Mining—Smelting and Refining Industry—The Coal Mining Industry—Non-Metal Mining Industries—Products and Other Structural Materials Industries—Notes on the Methods of Computing Values.

Coal and Coke Statistics for Canada.

Imports and exports of coal and coke is issued about the twentieth of the next following month quarterly, showing statistics for each month, for each of the output by coal-mining districts and by ports and by kinds of coal, employment. There is also a section on coke showing production and consumption by months and by provinces.

Canada.

and for each of the coal-producing provinces, output, tonnage lost, disposition of coal from mines, exports and imports by ports, consumption, salaries and wages paid, power equipment, etc.

Canada which includes Alluvial Gold Mining, Gold-Silver Mining, and tables showing Canadian Silver Mining Industry in Canada, which includes Lead-Zinc Mining, and tables showing Canadian Cobalt, Lead, Silver and Zinc.—The Nickel Industry, which includes Canadian and world production of Nickel.—Metals of the Platinum Group including Copper.—Metals of the Non-Metals including Antimony, Beryllium, Bismuth, Germanium, Mercury, Molybdenite, Iridium, Selenite, Ferrous Smelting and Refining Industry.

COAL STATISTICS FOR CANADA

October, November, December

1932.

Foreword.—During the past ten years the Bureau has published comprehensive monthly reports on coal statistics, and for the past seven years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This monthly bulletin is now being published on the twentieth of the next following month.

A quarterly report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the monthly bulletin and the quarterly report are sent to the same mailing list.

Canada produced 3,703,989 tons of coal during October, November and December as compared with an output of 3,734,138 tons in the corresponding period of 1931. Bituminous coal output during the fourth quarter of 1932 totalled 1,973,845 tons, sub-bituminous coal, 211,054 tons, and lignite coal, 1,525,093 tons.

Alberta mines produced 1,777,900 tons of coal, an increase of 9 per cent over the output in October, November and December, 1931. In Nova Scotia, 1,059,703 tons were mined as against 1,205,721 tons, a year ago. The output from British Columbia mines declined 24 per cent to 400,808 tons from the total for the fourth quarter of 1931. Saskatchewan's production increased 27 per cent to 407,414 tons as compared with the output of 321,431 tons in the corresponding months of last year. An advance of 26 per cent was recorded in the tonnage of coal mined in New Brunswick during the fourth quarter of 1932 as compared with the corresponding period of 1931.

Imports of coal into Canada during the last three months of 1932 amounted to 3,733,612 tons or 5 per cent below the tonnage imported during October, November and December, 1931. Receipts from the United States declined 13 per cent, on the other hand imports from Great Britain rose 101 per cent. Importations from the United States included 469,722 tons of anthracite coal, 2,657,191 tons of bituminous coal, and 986 tons of lignite coal. Shipments from Great Britain consisted of 409,404 tons of anthracite coal and 162,341 tons of bituminous coal. Anthracite coal imports from Germany amounted to 33,266 tons and from the French West Indies, 700 tons. Exports of Canadian coal amounted to 81,513 tons, or 20 per cent below the tonnage exported in the corresponding period of 1931. Coal exported through Eastern Canada ports totalled 47,665 tons during October, November and December, 1932, as compared with 52,657 tons a year ago; and through Manitoba, Saskatchewan, Alberta and British Columbia ports, 33,848 tons as against 49,454 tons.

Canada's coal supply (computed on the basis of production plus imports less exports) totalled 7,362,088 tons or 2 per cent below the tonnage available for use in the last quarter of 1931.

Canadian coal mines showed the usual seasonal rising trend in employment in the last three months of 1932; in October, 27,173 men were on the mine payrolls, in November, 28,373 men and in December, 28,065 men. Output per man-day averaged 2.81 tons and the average wage raised per man during the period was 56.9 tons.

Mines in operation during the last quarter of 1932 produced 64 per cent of their possible output; the time lost was due principally to "lack of orders." Twelve labour disputes, involving 2,021 men, were responsible for the loss of 15,986 man-days' work during October, November and December, 1932. Five of these strikes were in Nova Scotia, five in Alberta, and two in British Columbia.

Coal output during the calendar year 1932 amounted to 11,723,411 tons as compared with 12,243,211 tons in 1931 and 14,881,324 tons in 1930. Imports into Canada were recorded at 3,573,428 tons, made up of 3,138,157 tons of anthracite coal, 8,532,318 tons of bituminous coal, and 2,953 tons of lignite coal. Exports during the year included 270,293 tons of bituminous coal and 15,194 tons of lignite coal. Coal made available for consumption during the year totalled 23,111,352 tons; in 1931, the available supply was 25,415,189 tons.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportion produced and lost are computed from these figures. The tonnage lost during the quarter is arrived at percentage according to the cause of loss.

COKE STATISTICS FOR CANADA

October, November, December, 1932

Production of coke in Canada during the last quarter of 1932 at 424,341 tons showed an increase of 13 per cent over the 374,743 tons made in the next preceding quarter but was slightly under the 430,583 tons reported for the final three months of 1931.

During the year when production totalled 1,640,737 tons, the apparent consumption of coke in Canada as calculated by deducting the exports of 15,469 tons from the tonnage made in Canada and adding the imports of 651,802 tons, amounted to 2,277,163 tons. In the previous year the apparent consumption, thus computed, was 2,545,129 tons.

In 1932, 453,113 tons of Canadian coal and 1,793,288 tons of imported coal, or a total of 2,246,401 tons of bituminous coal were charged to coke ovens to produce 1,640,737 tons of coke. This represented an average yield of 1,461 pounds of coke for each short ton of coal carbonized and compares with corresponding yields of 1,449 pounds in 1931, 1,451 pounds in 1930, 1,447 pounds in 1929, and 1,447 pounds in 1928.

During October, November and December of this year 56,541 tons of coke were charged to iron blast furnaces in Canada, to make a total of 156,900 tons for the twelve months of 1932.

**Production in Canada, Imports, Exports and Apparent Consumption of Coke,
by Provinces, 1931 and 1932**

FOR CANADA

ember, 1932

arter of 1932 at 424,341 tons showed a slight increase over the next preceding quarter but was slightly below the months of 1931.

737 tons, the apparent consumption of which was 15,469 tons from the tonnage imported, amounted to 2,277,163 tons. In the previous year 2,545,129 tons.

3,288 tons of imported coal, or a total of 1,640,737 tons of coke ovens to produce 1,640,737 tons of coke for each short ton of coal carbonized, stands in 1931, 1,451 pounds in 1930, 1,480 in 1929.

This year 56,541 tons of coke were charged into blast furnaces for the twelve months of 1932, 56,900 tons for the twelve months of 1931.

LIST OF PUBLICATIONS

PREPARED IN THE
MINING, METALLURGICAL AND CHEMICAL BRANCH
DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products—Castings and Forgings—Boilers, Tanks and Engines—Agricultural Implements—Machinery—Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock—Wire and Wire Goods—Sheet Metal Products—Hardware and Tools—Bridge Building and Structural Steel—Miscellaneous Iron and Steel Products

Manufactures of Non-Ferrous Metals: Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Jewellery and Silverware—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos Products—Cement—Cement Products—Coke and Gas—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand-Lime Brick—Dressed Stone—Artificial Abrasives and Abrasive Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Graphite and Electrodes, (b) Gypsum Products, (c) Mica Products, (d) Magnesite Products, (e) Non-Metallic Mineral Products, n.e.s.

Chemicals and Allied Products: Coal Tar Distillation—Acids, Alkalies and Salts—Compressed Gases—Explosives, Ammunition and Fireworks—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps and Washing Compounds—Toilet Preparations—Inks, Adhesives—Polishes and Dressings—Flavouring Extracts—Wood Distillation—Miscellaneous Chemical Products, including (a) Baking Powder, (b) Boiler Compounds, (c) Celluloid Products, (d) Insecticides, (e) Sweeping Compounds, (f) Disinfectants, (g) Matches, (h) Dyes and Colours, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

Analysis of the Radio Industry in Canada.

Monthly—

Production of Iron and Steel in Canada.

Coal and Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Report on the Consumption of Coke in Canada.

The Fertilizer Trade of Canada.
