1933

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS.

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

A comprehensive record of the mining industry embodying historical and world data, detailed information on mineral production, imports and exports for Canada and general statistics relative to the mining industry on capital investment, employment, fuel consumption and power equipment arranged in 9 chapters each dealing with a particular branch of the industry. Statistics on production and trade in mineral products appear in detail in the appropriate chapters. A list of operating companies with their office and plant addresses is included. Fully indexed. Chapter titles are: Canada—The Gold Mining Industry—The Silver Mining Industry—The Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries—Notes on the Methods of Computing Values—Index.

COAL—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

A condensed report on production, imports and exports of coal and coke is issued monthly, publication being made about the twentieth of the next following month.

A more general review is published quarterly, showing statistics for each month, for the quarter, and for the year to date on the output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal, employment in coal-mining, and tonnage lost. There is also a section on coke showing production, imports, exports, distribution and consumption by months and by provincial groups.

Annual Report on Coal Statistics for Canada.

Text and tables showing for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

COAL STATISTICS FOR CANADA

January, February, March

1933.

FOREWORD.—During the past eleven years the Bureau has published comprehensive monthly reports on coal statistics, and for the past eight years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published on the twentieth of the next following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

The Canadian production of coal during January, February and March totalled 2,905,272 tons, a 16 per cent decline from the output of 3,469,213 tons in the corresponding period of 1932. Bituminous coal output during the first quarter of 1933 amounted to 1,676,182 tons, sub-bituminous coal, 145,026 tons, and lignite coal, 1,084,064 tons.

Declines were recorded in all producing provinces except New Brunswick and Manitoba. Alberta produced 1,325,619 tons or 46 per cent of the total Canadian output. Mines in Nova Scotia accounted for 28 per cent of the total production; in British Columbia, 12 per cent; in Saskatchewan, 11 per cent; and in New Brunswick, 3 per cent.

Imports of coal into Canada during the first three months of 1933 amounted to 1,439,386 tons or 22 per cent below the total for the first quarter of 1932. Anthracite coal importations totalled 451,449 tons, made up of 358,036 tons from the United States and 93,413 tons from Great Britain. Receipts of bituminous coal during the first quarter consisted of 948,227 tons from the United States and 38,805 tons from Great Britain. The United States shipped 905 tons of lignite coal into Canada during the first quarter.

Exports of Canadian coal during January, February and March amounted to 82,915 tons, a 6 per cent falling off from the total for the first three months of 1932. Nova Scotia and New Brunswick exported 47,538 tons of bituminous coal as compared with 40,050 tons exported from Eastern Canada in the first quarter of the previous year, while Manitoba, Saskatchewan, Alberta and British Columbia ports cleared 35,377 tons as against 48,295 tons in the corresponding period of 1932.

Coal made available for consumption in Canada (computed as the total output plus imports less exports) amounted to 4,261,743 tons, or 18 per cent below the tonnage available a year ago.

The average number of men employed in Canadian coal mines during January was 27,977, in February, 27,023, and in March, 25,288. Output per man during the first quarter totalled 108.6 tons, making an average output per man-day of 2.68 tons.

Mines in operation during the period produced 55 per cent of their possible output; the time lost was due principally to "lack of orders". Five labour disputes, involving 555 men, were responsible for the loss of 10,485 man-days' work during the first three months of 1933. Three of these strikes were in Alberta, one in Nova Scotia and one in British Columbia.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

Table 1.—Summary of the Principal Coal Statistics for Canada

COKE STATISTICS FOR CANADA

January, February and March, 1933

Production of by-product coke and gas-house coke in Canada during the three months ending March 31 amounted to 417,392 tons, a decline of 8 per cent from the 451,134 tons made during the first quarter of a year ago. Figures for the corresponding periods of other years were 515,265 tons in 1931, 652,975 tons in 1930, and 650,617 tons in 1929.

Compared with the first quarter of last year, production for the current year to date showed declines in all producing areas. Output in the eastern provinces dropped to 86,807 tons from 99,868 tons, in Ontario to 293,988 tons from 307,035 tons, and in the western provinces to 36,597 tons from 44,231 tons. Statements by the producers on the disposition of coke showed that coke sales for domestic use advanced to 418,205 tons as against 379,668 tons, but this gain was more than offset by lower sales to foundries, lower consumption by the associated smelters and a slight falling-off in the quantity consumed in coke plants. Sales to foundries dropped to 28,831 tons from 29,714, associated smelters of the producers used only 29,995 tons as against 87,749 tons and coke plants used 63,810 tons as compared with 67,943 tons in the first quarter of 1932.

Charges to coke ovens during the period under review included 114,453 tons of Canadian coal and 463,127 tons of imported coal, or a total of 577,580 tons of bituminous coal. During the first three months of last year the oven charges totalled 607,958 tons of bituminous coal from which 451,134 tons of coke were produced.

Imports of coke into Canada during January, February and March, 1933, as compared with the first quarter of 1932, advanced in the eastern provinces to 2,754 tons from 2,090 tons, and in the western provinces to 2,722 tons from 785 tons, but Ontario showed an appreciable drop to 88,438 tons from 106,625 tons. Total imports for the first quarter amounted to 93,914 tons as against 109,500 tons during the same period in the preceding year, and exports also fell off 2,511 tons from 5,133 tons.

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products—Castings and Forgings—Boilers, Tanks and Engines—Agricultural Implements—Machinery—Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock—Wire and Wire Goods—Sheet Metal Products—Hardware and Tools—Bridge Building and Structural Steel—Miscellaneous Iron and Steel Products

Manufactures of Non-Ferrous Metals: Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Jewellery and Silverware—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos Products—Cement—Cement Products—Coke and Gas—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand-Lime Brick—Dressed Stone—Artificial Abrasives and Abrasive Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Graphite and Electrodes, (b) Gypsum Products, (c) Mica Products, (d) Magnesite Products, (e) Non-Metallic Mineral Products, n.e.s.

Chemicals and Allied Products: Coal Tar Distillation—Acids, Alkalies and Salts—Compressed Gases—Explosives, Ammunition and Fireworks—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps and Washing Compounds—Toilet Preparations—Inks, Adhesives—Polishes and Dressings—Flavouring Extracts—Wood Distillation—Miscellaneous Chemical Products, including (a) Baking Powder, (b) Boiler Compounds, (c) Celluloid Products, (d) Insecticides, (e) Sweeping Compounds, (f) Disinfectants, (g) Matches, (h) Dyes and Colours, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

Analysis of the Radio Industry in Canada.

Monthly—

Production of Iron and Steel in Canada.

Coal and Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Report on the Consumption of Coke in Canada.

The Fertilizer Trade of Canada.
