QUARTERLY REPORT

ON

COAL AND COKE STATISTICS
FOR CANADA

APRIL, MAY, JUNE, 1933

Published by authority of the Hon. H. H. Stevens, M.P.,
Minister of Trade and Commerce

OTTAWA
J. O. PATENAUME.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1933

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS.

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

A comprehensive record of the mining industry embodying historical and world data, detailed information on mineral production, imports and exports for Canada and general statistics relative to the mining industry on capital investment, employment, fuel consumption and power equipment arranged in 9 chapters each dealing with a particular branch of the industry. Statistics on production and trade in mineral products appear in detail in the appropriate chapters. Fully indexed. Chapter titles are: Canada—The Gold Mining Industry—The Silver Mining Industry—The Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries—Notes on the Methods of Computing Values—Index.

COAL—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

A condensed report on production, imports and exports of coal and coke is issued monthly, publication being made about the twentieth of the next following month.

A more general review is published quarterly, showing statistics for each month, for the quarter, and for the year to date on the output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal, employment in coal-mining, and tonnage lost. There is also a section on coke showing production, imports, exports, distribution and consumption by months and by provincial groups.

Annual Report on Coal Statistics for Canada.

Text and tables showing for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

April, May and June, 1933

FOREWORD.—During the past eleven years the Bureau has published comprehensive monthly reports on coal statistics, and for the past eight years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published on the twentieth of the next following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

Canadian mines produced 2,048,195 tons of coal during the second quarter of 1933, a decline of 8·2 per cent from the output of 2,231,166 tons in the corresponding period of 1932. The production of bituminous coal during April, May and June, 1933, totalled 1,702,016 tons, of sub-bituminous coal, 89,231 tons and of lignite coal, 256,948 tons.

Nova Scotia produced 946,875 tons of coal as compared with 993,945 tons a year ago. Alberta's output of 688,445 tons was 0·8 per cent above the total for the second quarter of 1932. A considerable decline was recorded in British Columbia's production; the total for the period was 263,390 tons as against 443,011 tons in April, May and June, 1932. New Brunswick produced 74,686 tons, and Saskatchewan, 74,380 tons; a year ago these provinces mined 41,848 tons and 69,315 tons, respectively.

Canada's imports during the period of 2,491,108 tons of coal were 1·96 per cent below the tonnage imported in the corresponding months of 1932. Anthracite coal imports totalled 712,034 tons, made up of 515,565 tons from Great Britain, 196,463 tons from the United States and 6 tons from China. Compared with April, May and June, 1932, anthracite imports from Great Britain in 1933 increased 37·6 per cent, while imports from the United States decreased 47·4 per cent. Importations of bituminous coal during the period amounted to 1,779,018 tons, consisting of 1,712,621 tons from the United States, 66,253 tons from Great Britain and 144 tons from Germany. Lignite coal to a total of 56 tons was obtained from the United States in the second quarter of 1933.

A decline of 20·4 per cent was recorded in the exports of Canadian coal during April, May and June. The exportations during the period totalled 35,526 tons, as compared with 44,616 tons exported a year ago. During the month under review Nova Scotia and New Brunswick ports cleared 23,791 tons of Canadian coal and Manitoba, Alberta and British Columbia ports 11,735 tons.

Canada's coal supply (computed on the basis of production plus imports less exports) amounted to 4,503,777 tons, or 4·7 per cent below the tonnage made available during the second quarter of 1932.

In April, the average number of men employed in Canadian coal mines was 22,586, in May, 20,408, and in June, 21,812. The average production per man-day during the three months was 94·8 tons or 2·43 tons per man-day, as compared with 95 tons, or 2·38 tons per man-day a year ago.

Eight labour disputes, involving 1,835 men, were responsible for the loss of 13,470 man-days' work during the second quarter of 1933. Three of these disputes were in Nova Scotia; three in Alberta; one in New Brunswick, and one in British Columbia.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE STATISTICS FOR CANADA

April, May and June, 1933

Production of coke in Canada during the three months ending June 30, 1933, amounted to 391,418 tons, a slight increase over the total of 390,519 tons made during the second quarter a year ago. Figures for the corresponding periods of 1931 and 1930 were 493,318 tons and 616,000 respectively.

Compared with the second quarter of last year, production for the period under review showed advances in all producing areas excepting the eastern provinces. In Ontario output advanced to 264,654 tons from 256,117 tons and in the west to 43,149 tons from 38,176 tons, while it dropped in the east to 83,615 tons from 96,226 tons. Statements on the disposition of coke by the makers showed that coke sales advanced to 145,195 tons from 136,347 tons, but the tonnage used in coke or gas plants fell off to 61,788 from 64,856, and transfers to associated smelters declined to 29,533 tons from 85,529 tons.

Charges to coke ovens during April, May and June of this year included 118,652 tons of coal from Canadian mines and 415,829 tons of imported coal. This total of 534,481 tons of bituminous coal was carbonized to produce 391,418 tons of coke, an average yield of 1,465 pounds of coke for each short ton of coal charged. In 1932 the average yield amounted to 1,432 pounds and in 1931 to 1,467 pounds.

Imports of coke into Canada during the second quarter of this year dropped to 104,637 tons from 112,831 tons, and exports also were lower at 1,345 tons as against 3,944 tons, when compared with the figures for April, May and June of 1932. The apparent consumption of coke in Canada, calculated by deducting the exports from the sum of the production and the imports, was 494,710 tons, a slight decline from the 499,405 tons consumed in the same period of last year.

Coke Production in Canada, by Months, 1933

Month	Bituminous Coal used for coke making			Coke made	Disposition of coke by makers					
	Canadian	Imported	Total		Used		Sold		Total	
					In coke or gas plants	In makers' smelters	For domestic use	For other uses

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products—Castings and Forgings—Boilers, Tanks and Engines—Agricultural Implements—Machinery—Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock—Wire and Wire Goods—Sheet Metal Products—Hardware and Tools—Bridge Building and Structural Steel—Miscellaneous Iron and Steel Products

Manufactures of Non-Ferrous Metals: Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Jewellery and Silverware—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos Products—Cement—Cement Products—Coke and Gas—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand-Lime Brick—Dressed Stone—Artificial Abrasives and Abrasive Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Graphite and Electrodes, (b) Gypsum Products, (c) Mica Products, (d) Magnesite Products, (e) Non-Metallic Mineral Products, n.e.s.

Chemicals and Allied Products: Coal Tar Distillation—Acids, Alkalies and Salts—Compressed Gases—Explosives, Ammunition and Fireworks—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps and Washing Compounds—Toilet Preparations—Inks—Adhesives—Polishes and Dressings—Flavouring Extracts—Wood Distillation—Miscellaneous Chemical Products, including (a) Baking Powder, (b) Boiler Compounds, (c) Celluloid Products, (d) Insecticides, (e) Sweeping Compounds, (f) Disinfectants, (g) Matches, (h) Dyes and Colours, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

Analysis of the Radio Industry in Canada.

Monthly—

Production of Iron and Steel in Canada.

Coal and Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Report on the Consumption of Coke in Canada.

The Fertilizer Trade of Canada.
