## LIST OF PUBLICATIONS

PREPARED IN THE

### MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS.

#### MINERAL PRODUCTION (Mining and Metallurgy).

##### GENERAL REPORTS

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

A comprehensive record of the mining industry embodying historical and world data, detailed information on mineral production, imports and exports for Canada and general statistics relative to the mining industry on capital investment, employment, fuel consumption and power equipment arranged in 9 chapters each dealing with a particular branch of the industry. Statistics on production and trade in mineral products appear in detail in the appropriate chapters. Fully indexed. Chapter titles are: Canada—The Gold Mining Industry—The Silver Mining Industry—The Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuel)—The Clay Products and Other Structural Materials Industries—Notes on the Methods of Computing Values—Index.

##### COAL—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

A condensed report on production, imports and exports of coal and coke is issued monthly, publication being made about the twentieth of the next following month.

A more general review is published quarterly, showing statistics for each month, for the quarter, and for the year to date on the output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal, employment in coal-mining, and tonnage lost. There is also a section on coke showing production, imports, exports, distribution and consumption by months and by provincial groups.

Annual Report on Coal Statistics for Canada.

Text and tables showing for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

##### ANNUAL BULLETINS—

*Metals*.—The Gold Mining Industry in Canada which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

*Non-Metals*.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesian Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

*Structural Materials*.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

## DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

## COAL STATISTICS FOR CANADA

October, November and December, 1934

**FOREWORD.**—During the past twelve years the Bureau has published comprehensive monthly reports on coal statistics, and for the past nine years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports (data compiled by provinces and by kinds of coal); and to continue coke statistics as heretofore. This *monthly* bulletin is now being published on the twentieth of the next following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

The Canadian coal output during October, November and December, 1934, totalled 4,268,741 tons, an advance of 1 per cent over the tonnage produced in the corresponding period of 1933. During the last quarter of 1934 bituminous coal production amounted to 2,687,355 tons, sub-bituminous coal, 196,332 tons and lignite coal, 1,385,054 tons.

Alberta mines produced 1,691,098 tons, a 5·2 per cent decline from the output in October, November and December, 1933. In Nova Scotia 1,679,319 tons were mined as compared with 1,520,878 tons in the fourth quarter of 1933. There was a slight increase in British Columbia's production in the last three months of 1934 over the corresponding period of the preceding year; the totals were 425,158 tons and 423,183 tons, respectively. Compared with the fourth quarter of 1933 Saskatchewan's output recorded an 8·1 per cent decline to 385,033 tons. New Brunswick's output totalled 86,593 tons as against 81,823 tons, a year ago. Manitoba produced 1,540 tons during October, November and December, 1934.

Canada imported 4,010,619 tons of coal during the period under review; this represented an increase of 13 per cent over the tonnage imported in the last three months of 1933. Receipts from the United States were 16 per cent higher at 3,373,162 tons, and consisted of 506,113 tons of anthracite coal, 2,865,655 tons of bituminous coal and 1,394 tons of lignite coal. Imports from Great Britain declined 9 per cent in the last quarter of 1934 to 517,217 tons, made up of 447,931 tons of anthracite coal and 123,286 tons of bituminous coal. Anthracite coal receipts from Germany in October, November and December, 1934, amounted to 54,301 tons. In addition, 11,620 tons of anthracite coal were received from Belgium. The following countries made small shipments of bituminous coal into Canada during November—Norway (280 tons); Newfoundland (24 tons), and Sweden, (15 tons).

Exports of Canadian coal were recorded at 120,884 tons as against 81,214 tons in the last quarter of 1933. Nova Scotia, New Brunswick, and Ontario ports cleared 88,542 tons of Canadian coal during October, November and December, 1934, while Manitoba, Saskatchewan, Alberta and British Columbia ports cleared 32,342 tons.

Based on output, imports and exports, the tonnage of coal made available for consumption in Canada during the three months ending December, 1934, was computed at 8,158,476 tons or 6 per cent above the quantity available in the corresponding period of 1933.

Canadian coal mines furnished employment to 26,931 men in October, 27,678 men in November and 27,164 men in December. The average output per man during this period was 157 tons and the average production per man-day was 2·7 tons.

During the calendar year 1934 Canada produced 13,795,649 tons as compared with 11,903,344 tons in the preceding year. Imports during 1934 totalled 13,813,657 tons made up of 3,537,309 tons of anthracite coal, 10,273,557 tons of bituminous coal and 2,791 tons of lignite coal. Exports of Canadian coal consisted of 294,886 tons of bituminous coal and 11,449 tons of lignite coal. Canada's coal supply in 1934 totalled 27,302,971 tons or 18 per cent above the 1933 level.

## EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

### **Output—**

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

### **Imports—**

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

### **Exports—**

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

### **Coal made available for Consumption in Canada—**

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

### **Tonnage Lost—**

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

## COKE STATISTICS FOR CANADA

**October, November and December, 1934**

Production of coke in Canada during October, November and December of 1934, amounted to 599,809 tons as compared with an output of 561,068 tons in the previous quarter and 512,548 tons in the corresponding three month period of a year ago.

Compared with the figures for the final three months of last year data for the present quarter showed an improvement in output by Ontario and the eastern provinces while tonnage in the west fell off slightly to 51,166 tons from 52,846 tons. In the eastern provinces the tonnage rose to 190,506 tons from 154,582 tons and in Ontario to 358,117 tons from 305,320 tons.

The apparent consumption of coke in Canada during 1934 was calculated at 3,189,582 tons by adding the imports of 930,221 tons to the 2,266,757 tons produced and deducting from this sum the exports of 7,396 tons. Corresponding figures for last year showed a consumption of 2,411,040 tons when imports amounted to 641,075 tons, Canadian production was 1,772,164 tons and exports 5,199 tons.

## LIST OF PUBLICATIONS

PREPARED IN THE

### MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

#### STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

##### *Printed Reports*—

**Iron and Steel and Their Products:** Pig Iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers, Tanks and Engines — Agricultural Implements — Machinery — Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Bridge Building and Structural Steel — Miscellaneous Iron and Steel Products.

**Manufactures of Non-Ferrous Metals:** Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Jewellery and Silverware—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

**Manufactures of Non-Metallic Minerals:** Aerated Waters—Asbestos Products—Cement—Cement Products—Coke and Gas—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand-Lime Brick—Dressed Stone—Artificial Abrasives and Abrasive Products—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Graphite and Electrodes, (b) Gypsum Products, (c) Mica Products, (d) Non-Metallic Mineral Products, n.e.s.

**Chemicals and Allied Products:** Coal Tar Distillation—Acids, Alkalies and Salts—Compressed Gases—Explosives, Ammunition and Fireworks—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Cleaning Preparations and Washing Compounds—Toilet Preparations—Inks—Adhesives—Polishes and Dressings—Wood Distillation—Miscellaneous Chemical Products, including (a) Boiler Compounds, (b) Cellulose Products, (c) Insecticides, (d) Sweeping Compounds, (e) Disinfectants, (f) Matches, (g) Dyes and Colours, (h) Chemical Products, n.e.s.

**Annual Bulletins.**—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

##### *Quarterly*—

Analysis of the Radio Industry in Canada.

Production and Imports of Galvanized Sheets.

Sales of Electric Storage Batteries.

##### *Monthly*—

Production of Iron and Steel in Canada.

Coal and Coke Statistics for Canada.

Automobile Statistics for Canada.

#### SPECIAL REPORTS.—

Directory of Chemical Industries, in Canada, as of July 1, 1932.

Consumption of Chemicals in Municipal Waterworks, 1931 and 1932.

The Fertilizer Trade in Canada (annual).
