QUARTERLY REPORT

ON

COAL AND COKE STATISTICS FOR CANADA

APRIL, MAY, JUNE, 1935

Published by authority of the Hon. R. B. Hanson, K.C., M.P.,
Minister of Trade and Commerce

OTTAWA
J. O. PATENAUME, I.S.O.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1935

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH

DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

- Preliminary Reports (semi-annual) on the Mineral Production of Canada.
Monthly Reports on Canada's Leading Mineral Products.
Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

- Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.
Annual Report on Coal Statistics for Canada.

ANNUAL BULLETINS—

Metals.—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnetite Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyritus).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

- Iron and Steel and Their Products.
Manufactures of Non-Ferrous Metals.
Manufactures of Non-Metallic Minerals.
Chemicals and Allied Products.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

- Production and Sales of Radio Sets in Canada.
Production and Imports of Galvanized Sheets.
Sales of Electric Storage Batteries.

Monthly—

- Production of Iron and Steel in Canada.
Automobile Statistics for Canada.

SPECIAL REPORTS—

- Directory of Chemical Industries, in Canada, as of July 1, 1932.
Consumption of Chemicals in Municipal Waterworks, 1931 and 1932.
The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

April, May and June, 1935

Foreword.—During the past thirteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past ten years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This monthly bulletin is now being published on the twentieth of the next following month.

A quarterly report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the monthly bulletin and the quarterly report are sent to the same mailing list.

Canadian mines produced 2,748,129 tons of coal during April, May and June, 1935; this represented a 2 per cent falling off from the tonnage mined in the corresponding months of 1934. Compared with the second quarter of 1934, the three months under review showed a 6.2 per cent decline in the production of bituminous coal, a 4.2 per cent increase in the output of sub-bituminous coal and a 36.3 per cent increase in lignite coal production.

Mines in Nova Scotia produced 1,398,469 tons as against 1,597,979 tons in the corresponding period of 1934. Alberta operators reported a production of 866,363 tons or 17 per cent above the output in the second quarter of 1934. A 5 per cent decline was recorded in British Columbia's production; the April, May and June output totalled 308,242 tons as compared with 324,226 tons, a year ago. Saskatchewan produced 104,277 tons during the second quarter of 1935; in the corresponding months of the preceding year, 81,367 tons were mined. An increase of 15 per cent was shown in New Brunswick's output; the period's total was 70,397 tons while in April, May and June a year ago, 61,328 tons were produced. Three hundred and sixty-one tons of bituminous coal were mined in the Yukon during the second quarter of 1935.

Canada imported 3,643,327 tons of coal during April, May and June, 1935; during the corresponding period of 1934 imports totalled 3,532,005 tons. Receipts from the United States were 4 per cent higher at 3,046,753 tons and were made up of 431,115 tons of anthracite coal, 2,615,371 tons of bituminous coal and 267 tons of lignite coal. Imports from Great Britain declined 10 per cent to 546,066 tons and consisted of 439,264 tons of anthracite coal and 106,802 tons of bituminous coal. Shipments of German anthracite coal to the Canadian market amounted to 43,140 tons and of Belgian anthracite coal, 7,202 tons. Minor tonnages of bituminous coal were received from Norway and Poland.

An increase of 21 per cent was recorded in the exports of Canadian coal during the second quarter of 1935, when 65,994 tons were shipped from Canada as against 54,267 tons, a year ago. Prince Edward Island, Nova Scotia, New Brunswick and Ontario ports cleared 49,067 tons during April, May and June, while clearances through Manitoba, Saskatchewan, Alberta and British Columbia ports totalled 16,927 tons.

Canada's coal supply during the three months under review (computed on the basis of output plus imports less exports) amounted to 6,325,462 tons; in the corresponding period of 1934 the available supply was 6,280,926 tons.

Employment was furnished by Canadian coal mines to 23,092 men in April, 22,297 men in May and 21,110 men in June. The mines operating during the period produced approximately 67 per cent of their possible output. The average production per man during the second quarter of 1935 was 124 tons or 2.5 tons per man day.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

Table 1.—Summary of the Principal Coal Statistics for Canada

COKE STATISTICS FOR CANADA

April, May and June, 1935

Production of coke in Canada during April, May and June 1935, amounted to 544,722 tons, a decline of 6 per cent from the 579,134 tons made in the previous quarter and 1 per cent from the 549,941 tons made in the corresponding period of a year ago. For the six months ending June of this year the output of coke totalled 1,123,856 tons, the corresponding total for the first half of last year amounting to 1,105,880 tons.

Imports of coke into Canada during the second quarter advanced to 107,435 tons from 78,338 tons in the first quarter while exports fell off 2,901 tons from 7,052 tons. The apparent consumption of coke in Canada, as calculated by deducting the exports from the sum of the production and the imports, works out at 649,256 tons for the second quarter, 650,420 tons for the first quarter and 688,775 tons for the second quarter of 1934.
