No. 2

QUARTERLY REPORT

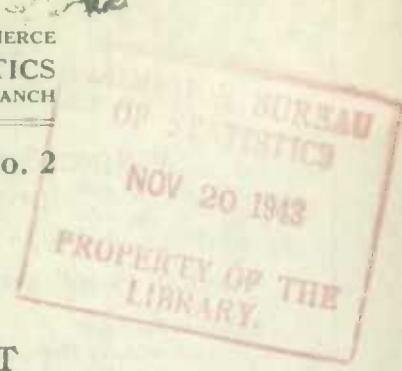

ON

COAL AND COKE STATISTICS
FOR CANADA

APRIL, MAY, JUNE, 1936

Published by authority of the Hon. W. D. Euler, M.P.,
Minister of Trade and Commerce

OTTAWA
J. O. PATENAUME, I.S.O.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1936

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

- Preliminary Reports (semi-annual) on the Mineral Production of Canada.
- Monthly Reports on Canada's Leading Mineral Products.
- Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

- Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.
- Annual Report on Coal Statistics for Canada.

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesitic Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

- Iron and Steel and Their Products.**
- Manufactures of Non-Ferrous Metals.**
- Manufactures of Non-Metallic Minerals.**
- Chemicals and Allied Products.**

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

- Production and Sales of Radio Sets in Canada.**
- Production and Imports of Galvanized Sheets.**
- Sales of Electric Storage Batteries.**

Monthly—

- Production of Iron and Steel in Canada.**
- Automobile Statistics for Canada.**

SPECIAL REPORTS—

- Directory of Chemical Industries, in Canada, as of July 1, 1932.
- Consumption of Chemicals in Municipal Waterworks, 1931 and 1932.
- The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

April, May and June, 1936

FORWARD.—During the past fourteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past eleven years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This monthly bulletin is now being published on the twentieth of the next following month.

A quarterly report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the monthly bulletin and the quarterly report are sent to the same mailing list.

The Canadian coal production during April, May and June advanced 8 per cent to 2,968,578 tons from the total of 2,749,482 tons for the corresponding period of 1935. Output during the second quarter of 1936 included 2,572,432 tons of bituminous coal, 83,950 tons of sub-bituminous coal and 312,196 tons of lignite coal.

Nova Scotia operators reported an output of 1,622,370 tons or 16 per cent above the production in April, May and June, 1935. Alberta mines produced 800,064 tons in the second quarter of 1936 as compared with 866,266 tons a year ago. The Alberta output during the months under review included 502,898 tons of bituminous coal, 83,950 tons of sub-bituminous coal and 213,216 tons of lignite coal. An increase of 19 per cent was shown in British Columbia's coal production when 368,815 tons were mined as against 308,726 tons a year ago. In Saskatchewan, 98,980 tons were produced as compared with 97,680 tons in the second quarter of 1935. Production from New Brunswick mines totalled 77,839 tons; during April, May and June, 1935, the output was lower at 71,826 tons.

A three per cent decline was recorded in the imports of coal into Canada in the period under review as compared with the corresponding months of 1935; the totals were 3,539,500 tons and 3,643,327 tons, respectively. Receipts of anthracite coal during the three months consisted of 505,756 tons from Great Britain, 401,139 tons from the United States, 48,546 tons from Germany, 17,566 tons from French Indo-China, and 8,175 tons from Belgium. Bituminous coal importations were drawn from the following sources: the United States, 2,509,658 tons; Great Britain, 48,113 tons, and Norway, 242 tons. Three hundred and five tons of lignite coal were brought into Canada from the United States during April, May and June.

Canada exported 71,068 tons of coal in the second quarter of 1936; a year ago 65,994 tons were exported. Exports through Nova Scotia, New Brunswick, Quebec and Ontario ports totalled 48,296 tons during the period under review and through Manitoba, Saskatchewan, Alberta and British Columbia ports, 22,772 tons.

The Canadian coal supply, computed on the basis of output plus imports less exports, amounted to 6,437,010 tons during April, May and June, 1936; in the corresponding period, a year ago, 6,326,815 tons were made available for consumption.

Canadian coal mines employed 23,540 men in April, 22,538 men in May and 25,543 men in June. The average output per man-day was 2.49 tons or an average of 124.3 tons per man during the three months.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE STATISTICS FOR CANADA

April, May and June, 1936

Production of coke in Canada during April, May and June, 1936, amounted to 589,116 tons, a decline of 4 per cent from the 612,022 tons made in the previous quarter and 8 per cent over the 544,722 tons made in the corresponding period of a year ago. For the six months ending June of this year the output of coke totalled 1,201,138 tons, the corresponding total for the first half of last year amounting to 1,123,856 tons.

Data for the second quarter of this year when compared with the figures for April, May and June of 1935, show that the imports of coke declined to 77,005 tons from 104,435 tons, while exports advanced to 4,314 tons from 2,901 tons. The apparent consumption of coke in Canada, as calculated by deducting the exports from the sum of the production and the imports, works out at 661,807 tons for the second quarter, 732,659 tons for the first quarter and 646,256 tons for the second quarter of 1935.
