LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH

DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

- Preliminary Reports (semi-annual) on the Mineral Production of Canada.
- Monthly Reports on Canada's Leading Mineral Products.
- Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

- Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.
- Annual Report on Coal Statistics for Canada.

ANNUAL BULLETINS—

Metals.—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesite, Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

- Iron and Steel and Their Products.
- Manufactures of Non-Ferrous Metals.
- Manufactures of Non-Metallic Minerals.
- Chemicals and Allied Products.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

- Production and Sales of Radio Sets in Canada.
- Production and Imports of Galvanized Sheets.
- Sales of Electric Storage Batteries.

Monthly—

- Production of Iron and Steel in Canada.
- Automobile Statistics for Canada.

SPECIAL REPORTS—

- Directory of Chemical Industries, in Canada, as of July 1, 1932.
- Consumption of Chemicals in Municipal Waterworks, 1931 and 1932
- The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

October, November and December, 1936

FOREWORD.—During the past fourteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past eleven years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This monthly bulletin is now being published on the twentieth of the next following month.

A quarterly report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the monthly bulletin and the quarterly report are sent to the same mailing list.

Canadian coal mines produced 4,758,642 tons during October, November and December, 1936, an increase of 6 per cent over the tonnage mined in the corresponding months of 1935. In the last quarter of 1936 bituminous coal output totalled 3,017,867 tons, sub-bituminous coal, 202,085 tons, and lignite coal, 1,538,690 tons.

Production from Alberta mines amounted to 1,992,338 tons or a 2 per cent decrease when compared with the last three months of 1935. Nova Scotia mines produced 1,878,951 tons, an increase of 21 per cent; British Columbia's output at 374,340 tons was down 2 per cent and the output from Saskatchewan coal mines at 409,042 tons was approximately 1,000 tons greater than for October, November and December of the preceding year. New Brunswick production at 102,451 tons was 7 per cent greater. Manitoba had an output of 1,520 tons during the last three months of the year.

Imports of coal into Canada during the last quarter of the year totalled 4,364,717 tons, an increase of 26 per cent over the corresponding period of a year ago. Receipts from the United States were 33 per cent higher at 3,794,053 tons and consisted of 462,534 tons of anthracite coal, 3,329,940 tons of bituminous coal and 1,579 tons of lignite coal. A 26 per cent falling off was recorded in the imports from Great Britain during the last three months of 1936 when 343,290 tons were brought to Canada; these imports included 299,525 tons of anthracite and 43,765 tons of bituminous. In addition to the above, the following tonnages of anthracite coal were brought into Canada: from Germany, 168,004 tons; from Belgium, 14,140 tons; from French Indo-China 34,793 tons; Netherlands, 8,951 tons, and China, 1,120 tons.

A decrease of 9 per cent was recorded in the exports of coal from Canada during the last three months of 1936 when 133,916 tons were exported as against 147,701 tons during the corresponding period of a year ago. Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario cleared 93,275 tons, while 40,641 tons were cleared from ports in Manitoba, Saskatchewan, Alberta, British Columbia, and the Yukon.

Canada's coal supply (production plus imports less exports) during the three months ending December, 1936 was computed at 8,989,443 tons as compared with 7,801,381 tons during the corresponding period of 1935.

Employment was furnished by Canadian coal mines to 27,966 men in October, 28,052 men in November and 28,174 men in December. The average output per man during the period was 169 tons and the average production per man-day was 2.8 tons.

Canada produced 15,209,700 tons of coal during the calendar year 1936 as compared with 13,888,006 tons in 1935. The 1936 imports consisted of 3,536,500 tons of anthracite coal; 10,202,438 tons of bituminous coal, and 4,747 tons of lignite coal. Exports of Canadian coal included 401,130 tons of bituminous coal and 10,444 tons of lignite coal. Coal made available for consumption during the year totalled 28,541,811 tons or 8 per cent above the 1935 level.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE—1936

During the year 1,072,107 tons of Canadian coal and 2,288,275 tons of imported coal were carbonized in Canada to make 2,412,160 tons of coke. Imports during the period amounted to 612,858 tons and 18,215 tons were exported, leaving 3,006,803 tons available for Canadian consumption. In 1935 the apparent consumption amounted to 2,769,881 tons when exports were reported at 20,649 tons, imports at 532,926 tons and production at 2,257,604 tons.

Of the 1936 total 774,026 tons were produced in the Eastern provinces, 1,452,525 tons in Ontario, and 185,609 tons in the West.

Coke Statistics for Canada, by months, 1936

| Months | Bituminous coal used in coke making | | | Coke made | Disposition of coke by makers | | | | |
