DOMINION BUREAU OF STATISTICS  
MINING, METALLURGICAL AND CHEMICAL BRANCH

Vol. 17

No. 1

QUARTERLY REPORT

ON

COAL AND COKE STATISTICS  
FOR CANADA

JANUARY, FEBRUARY, MARCH  
1938

Published by authority of the Hon. W. D. Euler, M.P.,  
Minister of Trade and Commerce

OTTAWA  
J. O. PATENAUME, I.S.O.  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY  
1938

# LIST OF PUBLICATIONS

PREPARED IN THE

## MINING, METALLURGICAL AND CHEMICAL BRANCH

## DOMINION BUREAU OF STATISTICS

### MINERAL PRODUCTION (Mining and Metallurgy).

#### GENERAL REPORTS

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

#### COAL—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

Annual Report on Coal Statistics for Canada.

#### ANNUAL BULLETINS—

**Metals**—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

**Non-Metals**.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesitic Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

**Structural Materials**.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

#### STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

##### *Printed Reports*—

**Iron and Steel and Their Products.**

**Manufactures of Non-Ferrous Metals.**

**Manufactures of Non-Metallic Minerals.**

**Chemicals and Allied Products.**

**Annual Bulletins**.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g., Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

##### *Quarterly*—

**Production and Sales of Radio Sets in Canada.**

**Sales of Electric Storage Batteries.**

##### *Monthly*—

**Production of Iron and Steel in Canada.**

**Automobile Statistics for Canada.**

#### SPECIAL REPORTS—

Directory of Chemical Industries, in Canada, as of July 1, 1932.

Consumption of Chemicals in Municipal Waterworks, 1934 and 1935.

The Fertilizer Trade in Canada (annual).

## DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

## COAL STATISTICS FOR CANADA

January, February and March, 1938

**FORWARD.**—During the past sixteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past thirteen years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This monthly bulletin is now being published on the twentieth of the next following month.

A quarterly report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the monthly bulletin and the quarterly report are sent to the same mailing list.

Coal production in Canada during the first quarter of 1938 totalled 4,080,798 tons; this represented an increase of 4 per cent over the tonnage produced a year ago. Output during the three months consisted of 2,791,051 tons of bituminous coal, 209,005 tons of sub-bituminous coal, and 1,080,742 tons of lignite coal.

Nova Scotia operators reported an output of 1,668,908 tons, or 18 per cent above the production during January, February and March, 1937. Alberta's output amounted to 1,602,506 tons compared with 1,594,389 tons, a year ago. A decline of 4 per cent was recorded in British Columbia's output during the first quarter when 402,507 tons were mined; during the corresponding months, a year ago, 418,912 tons were produced. Saskatchewan's output was 7 per cent lower at 320,097 tons. Production from New Brunswick mines totalled 85,659 tons as against 125,347 tons in the first quarter of 1937. Manitoba produced 1,121 tons during January, February and March, 1938.

A 13 per cent falling-off was recorded in the importations of coal during the three months under review when 1,472,467 tons were brought into Canada compared with 1,684,476 tons a year ago. Receipts from the United States were 13 per cent lower at 1,402,601 tons and included 505,225 tons of anthracite coal, 896,490 tons of bituminous coal and 886 tons of lignite coal. Imports from Great Britain declined 6 per cent to 59,579 tons. Forty-three per cent less German coal was imported during the first three months of 1938 than in the first quarter of 1937.

Exports of coal from Canada during the period under review totalled 104,872 tons or 9 per cent below the tonnage exported a year ago. Nova Scotia, New Brunswick, Quebec and Ontario ports cleared 60,474 tons of Canadian coal during January, February and March, 1938, while Manitoba, Saskatchewan, Alberta and British Columbia ports cleared 44,398 tons.

Coal made available for consumption in Canada during the first quarter totalled 5,448,393 tons compared with 5,461,563 tons a year ago.

Canadian coal mines furnished employment to 28,145 men in January, 27,738 men in February and 25,562 men in March. The average output per man during the period was 150·3 tons and the average production per man-day was 2·7 tons.

## EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

### **Output—**

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

### **Imports—**

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

### **Exports—**

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

### **Coal made available for Consumption in Canada—**

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

### **Tonnage Lost—**

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

## COKE STATISTICS FOR CANADA

January, February and March, 1938

Production of coke in Canada during the first quarter of 1938 totalled 641,481 tons, compared with outputs of 636,926 tons and 612,022 tons during the first three months of 1937 and 1936, respectively. By months the current year's output started at 223,908 tons in January, fell off to 199,340 tons in February and then advanced to 218,233 tons in March.

Compared with the figures for the first quarter of last year, data for the period under review show that tonnage in the western provinces advanced to 60,425 from 55,742 and in the eastern provinces to 211,093 from 210,634, while the Ontario output fell off slightly to 369,963 tons from 370,550 tons.

Charges to iron blast furnaces in Canada during the first three months of this year included 202,933 tons of coke as against coke charges for iron making during the corresponding periods of 1937 and 1936 of 195,603 tons and 169,533 tons respectively.
