LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH

DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

- Preliminary Reports (semi-annual) on the Mineral Production of Canada.
Monthly Reports on Canada's Leading Mineral Products.
Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

- Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.
Annual Report on Coal Statistics for Canada.

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesian Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:

Printed Reports—

- Iron and Steel and Their Products.
Manufactures of Non-Ferrous Metals.
Manufactures of Non-Metallic Minerals.
Chemicals and Allied Products.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

- Production and Sales of Radio Sets in Canada.
Sales of Electric Storage Batteries.

Monthly—

- Production of Iron and Steel in Canada.
Automobile Statistics for Canada.

SPECIAL REPORTS—

- Directory of Chemical Industries, in Canada, as of July 1, 1932.
Consumption of Chemicals in Municipal Waterworks, 1934 and 1935.
The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

April, May and June, 1938

FOREWORD.—During the past sixteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past thirteen years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the *second* following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published on the twentieth of the *next* following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the *second* following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

The Canadian output of coal during the second quarter of 1938 amounted to 2,818,250 tons compared with 3,141,926 tons produced a year ago. The production during the three months under review consisted of 2,477,226 tons of bituminous coal, 50,076 tons of sub-bituminous coal and 290,948 tons of lignite coal.

Nova Scotia's output totalled 1,590,408 tons; this represented a decline of 8 per cent from the production in the corresponding months of 1937. Alberta operators produced 744,837 tons compared with 840,309 tons a year ago. Mines in British Columbia recorded an output of 320,605 tons; during April, May and June, 1937, these mines produced 381,302 tons. An advance of 2.8 per cent was shown in the output in Saskatchewan when 94,673 tons were mined. New Brunswick's production declined 31.5 per cent to 67,727 tons.

Imports of coal into Canada during April, May and June totalled 3,514,224 tons or 23 per cent below the total for the corresponding period of 1937. Receipts from the United States were 27 per cent lower at 3,026,478 tons and consisted of 563,514 tons of anthracite coal, 2,462,809 tons of bituminous coal and 155 tons of lignite coal. Importations from Great Britain were 8 per cent higher at 362,037 tons. A 45 per cent increase was recorded in the imports from Germany; the period's total was 118,359 tons. Canada received 7,350 tons of anthracite coal from Morocco during the second quarter of 1938.

Canadian coal to a total of 60,716 tons was exported; this was ten per cent below the tonnage exported a year ago. Prince Edward Island, Nova Scotia and New Brunswick ports cleared 39,784 tons during April, May and June. Manitoba, Saskatchewan, Alberta and British Columbia ports cleared 20,932 tons.

Canada's coal supply during the second quarter was 18 per cent below the tonnage made available a year ago; the total for the months under review was 6,271,758 tons compared with 7,638,163 tons in the corresponding period of 1937.

Employment was furnished by Canadian coal mines to 23,603 men in April, 23,193 men in May and 23,106 men in June. The average output per man during these three months was 120.9 tons or an average of 2.4 tons per man-day.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

Table 1.—Summary of the Principal Coal Statistics for Canada

COKE STATISTICS FOR CANADA

April, May and June, 1938

Production of coke in Canada during April, May and June, 1938, amounted to 607,379 tons compared with an output of 641,481 tons in the previous quarter and 642,143 tons in the corresponding period of a year ago.

Compared with the figures for the second quarter of last year, data for the period under review show that tonnage in the western provinces advanced to 54,641 tons from 51,713 tons, fell off in the eastern provinces to 207,282 tons from 209,041 tons, and declined in Ontario to 345,456 tons from 381,389 tons.

Charges to iron blast furnaces during the second quarter included 197,858 tons of coke, making a total for the first half of this year of 400,791 tons. During the six months ending June 30, 1937, coke charges for iron making amounted to 423,715 tons.
