QUARTERLY REPORT
ON
**COAL AND COKE STATISTICS
FOR CANADA**

OCTOBER, NOVEMBER, DECEMBER, 1938

Published by authority of the Hon. W. D. Euler, M.P.,
Minister of Trade and Commerce

OTTAWA
J. O. PATENAUME, I.S.O.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1939

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

- Preliminary Reports (semi-annual) on the Mineral Production of Canada.
- Monthly Reports on Canada's Leading Mineral Products.
- Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

- Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.
- Annual Report on Coal Statistics for Canada.

ANNUAL BULLETINS—

- Metals**—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Aiferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.
- Non-Metals**.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesian Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).
- Structural Materials**.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone.

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

- Iron and Steel and Their Products.**
- Manufactures of Non-Ferrous Metals.**
- Manufactures of Non-Metallic Minerals.**
- Chemicals and Allied Products.**

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

- Production and Sales of Radio Sets in Canada.**
- Sales of Electric Storage Batteries.**

Monthly—

- Production of Iron and Steel in Canada.**
- Automobile Statistics for Canada.**

SPECIAL REPORTS—

- Directory of Chemical Industries, in Canada, as of July 1, 1932.
- Consumption of Chemicals in Municipal Waterworks, 1934 and 1935.
- The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

October, November and December, 1938

FOREWORD.—During the past sixteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past thirteen years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This monthly bulletin is now being published on the twentieth of the next following month.

A quarterly report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the monthly bulletin and the quarterly report are sent to the same mailing list.

The Canadian output of coal during the fourth quarter of 1938 totalled 4,383,728 tons or 12 per cent below the production a year ago. Bituminous coal output during the period under review amounted to 2,598,282 tons, sub-bituminous coal, 168,668 tons and lignite coal, 1,616,778 tons.

Nova Scotia mines produced 1,485,542 tons compared with 2,028,814 tons in October, November and December, 1937. Alberta's output totalled 1,951,060 tons and included 629,702 tons of bituminous coal, 168,668 tons of sub-bituminous coal and 1,152,690 tons of lignite coal. During the last quarter of 1937, Alberta produced 657,751 tons of bituminous coal, 183,733 tons of sub-bituminous coal and 1,198,296 tons of lignite coal. British Columbia's output was 5 per cent lower at 381,608 tons. Saskatchewan mined 462,844 tons or 2 per cent below the tonnage produced during October, November and December, 1937. New Brunswick's production totalled 101,430 tons compared with 43,593 tons during the last quarter, a year ago.

Imports of coal into Canada during the period under review totalled 3,983,056 tons; a year ago, 4,473,971 tons were imported. Receipts from the United States were 13 per cent lower at 3,471,101 tons; this total included 484,727 tons of anthracite coal, 2,984,655 tons of bituminous coal and 1,719 tons of lignite coal. Imports from Great Britain increased one per cent to 336,770 tons, made up of 328,651 tons of anthracite coal, 8,119 tons of bituminous coal. An eight per cent increase was recorded in Germany's exports to Canada; the total for the fourth quarter was 120,731 tons as against 111,582 tons, a year ago. Imports from Morocco rose to 4,203 tons from the total of 78 tons for the corresponding period of 1937. The following quantities of anthracite coal were received during the last quarter from countries that did not ship any coal to Canada during October, November and December, 1937; from French Indo-China, 20,512 tons, from Belgium, 16,688 tons and from the Netherlands, 13,051 tons.

Canadian coal exported during the three months totalled 103,037 tons compared with 88,811 tons, a year ago. Nova Scotia, New Brunswick, Quebec and Ontario ports cleared 52,840 tons and Manitoba, Saskatchewan, Alberta and British Columbia, 50,197 tons.

Canada's coal supply, based on production plus imports less exports totalled 8,263,747 tons or 12 per cent below the tonnage made available, a year ago.

Canadian coal mines furnished employment to 27,691 men in October, 28,224 men in November and 27,813 men in December. Each of these men produced, on the average, 157 tons during the period, or 2.92 tons per man-day.

During the calendar year 1938 Canada produced 14,247,783 tons of coal, imported 13,464,060 tons and exported 353,181 tons. In 1937, the Canadian output totalled 15,835,954 tons, imports amounted to 16,023,147 tons and exports, 355,268 tons.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE STATISTICS FOR CANADA

October, November and December, 1938

During the calendar year 1938 coke oven charges included 1,064,302 tons of Canadian coal and 2,215,469 tons of imported coal, or a total of 3,279,771 tons of bitumous coal. From these charges, 2,356,055 tons of coke were produced for an average yield of 1,437 pounds of coke for each ton of coal carbonized. The 1938 coke total of 2,356,055 tons compares with 2,570,385 tons in 1937, 2,404,793 tons in 1936, and 2,257,604 tons in 1935.

Sales of coke by the producers totalled 1,289,962 tons during 1938, including 924,618 tons for domestic use and 365,344 tons for other uses. In addition to sales, 221,711 tons were used in coke or gas plants and 707,248 tons were shipped to the associated metallurgical works of the producers, making a total of 2,218,921 tons disposed of during the twelve-months period.

A calculation to show the apparent consumption of coke in Canada may be made by deducting the exports from the sum of the production and the imports. Customs' figures for 1938 show imports of 414,682 tons which, with the Canadian production, makes an available supply of 2,770,770 tons, but, as 30,537 tons were exported, there was a balance of 2,740,200 tons available for use in Canada. Corresponding figures in other years were: 2,950,607 tons in 1937, 2,999,436 tons in 1936, and 2,769,881 tons in 1935.
