QUARTERLY REPORT

ON

COAL AND COKE STATISTICS
FOR CANADA

JULY, AUGUST, SEPTEMBER, 1939

Published by authority of the Hon. W. D. Euler, M.P.,
Minister of Trade and Commerce

OTTAWA
J. O. PATENAUME, I.S.O.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1939

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

Annual Report on Coal Statistics for Canada

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesian Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

Iron and Steel and Their Products.

Manufactures of Non-Ferrous Metals.

Manufactures of Non-Metallic Minerals.

Chemicals and Allied Products.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

Production and Sales of Radio Sets in Canada.

Sales of Electric Storage Batteries.

Monthly—

Production of Iron and Steel in Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS—

Directory of Chemical Industries, in Canada, as of January 1, 1938

Consumption of Chemicals in Municipal Waterworks, 1936 and 1937.

The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

July, August and September, 1939

FOREWORD.—During the past seventeen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past fourteen years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published about the twentieth of the next following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication about the fifteenth of the second following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

The Canadian output of coal during the third quarter of 1939 rose 26 per cent to 3,725,289 tons from the production, a year ago. Bituminous coal output during the period under review amounted to 3,075,942 tons, sub-bituminous coal, 93,602 tons and lignite coal, 555,745 tons.

Nova Scotia operators produced 1,892,485 tons compared with 1,486,198 tons in July, August and September, 1938. Mines in Alberta produced 1,188,893 tons made up of 675,483 tons of bituminous coal, 93,602 tons of sub-bituminous coal and 419,808 tons of lignite coal. During the third quarter of 1938, Alberta mined 532,644 tons of bituminous coal, 61,207 tons of sub-bituminous coal and 337,454 tons of lignite coal. An increase of 24 per cent was recorded in the British Columbia production during the period under review, when 413,280 tons were mined compared with 332,997 tons a year ago. Saskatchewan producers reported an output of 135,899 tons or one per cent below the production in the corresponding period of 1938. The New Brunswick output advanced to 94,694 tons from the July, August and September, 1938, total of 68,519 tons. Thirty-eight tons were produced in Manitoba.

A ten per cent increase was shown in the imports of coal during the months under review, compared with the tonnage imported a year ago; the totals were 4,963,737 tons and 4,503,273 tons respectively. Receipts from the United States consisted of 690,506 tons of anthracite coal, 3,647,887 tons of bituminous coal and 340 tons of lignite coal. Importations from Great Britain included 403,126 tons of anthracite coal and 17,854 tons of bituminous coal. Anthracite coal to a total of 186,434 tons was brought into Canada from Germany during the period. French Indo-China supplied Canada with 17,565 tons of anthracite coal. Twenty-five tons of lignite coal were imported from Alaska.

Exports of Canadian coal were 2 per cent higher at 86,552 tons during the third quarter. Nova Scotia, New Brunswick, Quebec and Ontario ports cleared 52,890 tons and the western ports, 33,662 tons.

Coal made available for consumption in July, August and September totalled 8,602,474 tons; during the corresponding quarter of the previous year 7,374,827 tons were made available.

Employment was furnished by the coal mining industry to 22,312 men in July, 23,824 men in August and 25,517 men in September. During the three months the output per man was 155.9 tons or 2.6 tons per man-day.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook, in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE PRODUCTION—THIRD QUARTER, 1939

Production of coke during the third quarter of this year at 566,621 tons represented a gain of 3 per cent over the 549,734 tons made during the corresponding period of 1938. This improvement from a year ago was accounted for by the tonnage in the eastern provinces going to 204,507 from 166,305, while the output in Ontario dropped to 312,216 tons from 329,891 tons and in the western provinces to 49,538 tons from 53,538 tons.
