QUARTERLY REPORT
ON
**COAL AND COKE STATISTICS
FOR CANADA**

OCTOBER, NOVEMBER, DECEMBER, 1939

Published by authority of the Hon. W. D. Euler,
Minister of Trade and Commerce

OTTAWA
J. O. PATENAUME, I.S.O.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1940

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

Annual Report on Coal Statistics for Canada

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesian Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

Iron and Steel and Their Products.

Manufactures of Non-Ferrous Metals.

Manufactures of Non-Metallic Minerals.

Chemicals and Allied Products.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

Production and Sales of Radio Sets in Canada.

Sales of Electric Storage Batteries.

Monthly—

Production of Iron and Steel in Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS—

Directory of Chemical Industries, in Canada, as of January 1, 1938

Consumption of Chemicals in Municipal Waterworks, 1936 and 1937.

The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

October, November and December, 1939

FOREWORD.—During the past seventeen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past fourteen years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published about the twentieth of the next following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication about the fifteenth of the second following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

Coal production in Canada during the fourth quarter of 1939 amounted to 4,968,998 tons or 13 per cent above the output in the corresponding period of 1938. Bituminous coal output during the months under review totalled 3,337,212 tons, sub-bituminous coal 184,292 tons, and lignite coal 1,447,494 tons.

A 39 per cent increase was recorded in the Nova Scotia output during October, November and December, when 2,072,341 tons were mined compared with 1,489,301 tons, a year ago. Alberta's production totalled 2,009,173 tons and included 740,475 tons of bituminous coal, 184,292 tons of sub-bituminous coal and 1,084,406 tons of lignite coal. In the fourth quarter of 1938, Alberta produced 637,992 tons of bituminous coal, 168,668 tons of sub-bituminous coal and 1,153,387 tons of lignite coal. British Columbia mines produced 412,347 tons of coal as against 381,608 tons during October, November and December, 1938. Saskatchewan operators reported an output of 362,260 tons or a 23 per cent decline from the total for the corresponding months of 1938. New Brunswick's production rose 4 per cent to 112,049 tons during the last quarter of 1939. Output from Manitoba amounted to 828 tons as against 1,074 tons, a year ago.

Imports of coal during the fourth quarter of 1939 aggregated 5,055,133 tons; this represented a 28 per cent advance over the tonnage imported, a year ago. Importations from the United States were made up of 653,414 tons of anthracite coal, 4,131,988 tons of bituminous coal and 1,564 tons of lignite coal. Receipts from Great Britain consisted of 226,104 tons of anthracite coal and 8,654 tons of bituminous coal. French Indo-China shipped 25,972 tons of anthracite coal to Canada. Imports from Germany consisted of anthracite coal only and amounted to 7,410 tons.

Canadian coal exported during the three months amounted to 112,977 tons compared with 103,037 tons, a year ago. Nova Scotia, New Brunswick, Quebec and Ontario exported 63,753 tons, while the western ports cleared 49,224 tons.

Canada's coal supply, computed on the basis of production plus imports less exports, totalled 9,911,154 tons or 20 per cent above the tonnage made available, a year ago.

Canadian coal mines furnished employment to 27,388 men in October, 27,679 men in November and 27,283 men in December. Each of these men produced, on the average, 181 tons during the period or 2.8 tons per man-day.

During the calendar year 1939, Canada produced 15,519,464 tons of coal, imported 13,884,816 tons and exported 376,203 tons. In 1938, the Canadian output was 14,294,718 tons, imports totalled 13,284,296 tons and exports aggregated 353,181 tons.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook, in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE—1939

During the calendar year 1939 the charges to coke ovens and gas retorts in Canada included 1,104,371 tons of Canadian coal and 2,207,707 tons of imported coal, all of which was carbonized to produce 2,388,027 tons of coke. This output represented a gain of 1.5 per cent over the 2,352,003 tons made in 1938, which in turn was 8.5 per cent less than the 2,570,385 tons reported for 1937.

Table 12.—Coke Statistics for Canada, by Months, 1939
(Exclusive of petroleum coke)

Months	Bituminous coal used in coke making			Coke made	Disposition of coke by makers					
	Can- adian	Im- ported	Total		Used		Sold		Total	
					In coke or gas plants	In makers' smelters	For do- mestic use	For other uses
