QUARTERLY REPORT

ON

COAL AND COKE STATISTICS FOR CANADA

APRIL, MAY, JUNE, 1940

Published by authority of the Hon. James A. MacKinnon, M.P.,
Minister of Trade and Commerce

OTTAWA
J. O. PATERNAUDE, I.S.O.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1940

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH

DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

- Preliminary Reports (semi-annual) on the Mineral Production of Canada.
- Monthly Reports on Canada's Leading Mineral Products.
- Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

- Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.
- Annual Report on Coal Statistics for Canada

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesian Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

- Iron and Steel and Their Products.
- Manufactures of Non-Ferrous Metals.
- Manufactures of Non-Metallic Minerals.
- Chemicals and Allied Products.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

- Production and Sales of Radio Sets in Canada.
- Sales of Electric Storage Batteries.

Monthly—

- Production of Iron and Steel in Canada.
- Automobile Statistics for Canada.

SPECIAL REPORTS—

- Directory of Chemical Industries, in Canada, as of January 1, 1938.
- Consumption of Chemicals in Municipal Waterworks, 1938 and 1939.
- The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

April, May and June, 1940

FOREWORD.—During the past eighteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past fifteen years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the *second* following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published about the twentieth of the *next* following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication about the fifteenth of the *second* following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

A 17 per cent increase was recorded in the output of coal from Canadian mines during April, May and June; the quarter's production totalled 3,670,885 tons compared with 3,139,649 tons, a year ago. Bituminous coal production during the period under review aggregated 3,236,189 tons, sub-bituminous coal, 104,120 tons and lignite coal, 330,576 tons.

Production from Nova Scotia mines amounted to 1,941,426 tons or 9 per cent above the tonnage produced in the corresponding period of 1939. Alberta operators reported an output of 1,030,823 tons, made up of 716,247 tons of bituminous coal, 104,120 tons of sub-bituminous coal and 210,456 tons of lignite coal. During April, May and June, 1939, Alberta produced 543,930 tons of bituminous coal, 86,708 tons of sub-bituminous coal and 170,174 tons of lignite coal. British Columbia's output totalled 458,088 tons; a year ago, 363,920 tons were produced. Mines in New Brunswick produced 120,428 tons or 7 per cent above the total for the second quarter of 1939. Saskatchewan mined 120,075 tons compared with 79,839 tons during April, May and June, 1939.

Canada imported 5,381,816 tons of coal during the second quarter of the current year; in the corresponding months a year ago, 2,429,383 tons were imported.

Canadian coal exported during April, May and June amounted to 90,465 tons; this represented an increase of 19 per cent over the quantity exported a year ago. Ports in Nova Scotia, New Brunswick, Quebec and Ontario cleared 50,588 tons and those in Western Canada, 39,877 tons.

Canada's coal supply (computed on the basis of production plus imports less exports) totalled 8,962,236 tons; during the second quarter of the previous year, 5,492,994 tons were made available for use.

The coal mining industry in Canada furnished employment to 23,515 men in April, 22,881 men in May and 22,610 men in June. During the three months, the output per man averaged 159.6 tons or 2.6 tons per man day.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook, in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

Table 1.—Summary of the Principal Coal Statistics for Canada
(Short tons)

COKE STATISTICS FOR CANADA

April, May and June, 1940

Production of coke in Canada during April, May and June, 1940, amounted to 738,182 tons compared with 721,127 tons made in the previous three months and 556,063 tons in the second quarter a year ago.

Compared with the figures for the second quarter of last year data for the period under review showed an increase in the Ontario output to 420,443 tons from 303,789 tons, in the eastern provinces to 260,742 tons from 197,381 and in the west to 56,997 tons from 54,893 tons.

Table 12.—Coal Used in Coke-making and Coke Produced, by Months, 1940
(Short tons)

Month	Bituminous coal used in coke making			Coke made
	Canadian	Imported	Total	
January.....	137,743	225,591	363,334	257,269
