QUARTERLY REPORT
ON
**COAL AND COKE STATISTICS
FOR CANADA**

OCTOBER, NOVEMBER, DECEMBER, 1940

Published by authority of the Hon. James A. MacKinnon, M.P.,
Minister of Trade and Commerce

OTTAWA
EDMOND CLOUTIER
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1941

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH

DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS

- Preliminary Reports (semi-annual) on the Mineral Production of Canada.
- Monthly Reports on Canada's Leading Mineral Products.
- Annual Report on the Mineral Production of Canada. (In one volume).

COAL—

- Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.
- Annual Report on Coal Statistics for Canada

ANNUAL BULLETINS—

Metals—The Gold Mining Industry in Canada, which includes Alluvial Gold Mining, Auriferous Quartz Mining, Copper-Gold-Silver Mining, and tables showing Canadian and world production of Gold.—The Silver Mining Industry in Canada, which includes Silver-Cobalt-Arsenic Mining, Silver-Lead-Zinc Mining, and tables showing Canadian and world production of Arsenic, Cobalt, Lead, Silver and Zinc.—The Nickel-Copper Mining, Smelting and Refining Industry, which includes Canadian and world production of Nickel.—The Canadian and World Production of Copper.—Metals of the Platinum Group.—The Production of Miscellaneous Metals, including Antimony, Beryl, Bismuth, Cadmium, Chromite, Lithium, Manganese, Mercury, Molybdenite, Radium, Selenium, Tin, Titanium, Tungsten.—The Non-Ferrous Smelting and Refining Industry.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals, including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesian Dolomite, Bog Manganese, Mineral Waters, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur (Pyrites).

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Printed Reports—

- Iron and Steel and Their Products.**
- Manufactures of Non-Ferrous Metals.**
- Manufactures of Non-Metallic Minerals.**
- Chemicals and Allied Products.**

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Quarterly—

- Production and Sales of Radio Sets in Canada.**
- Sales of Electric Storage Batteries.**

Monthly—

- Production of Iron and Steel in Canada.**
- Automobile Statistics for Canada.**

SPECIAL REPORTS—

- Directory of Chemical Industries, in Canada, as of January 1, 1938.
- Consumption of Chemicals in Municipal Waterworks, 1938 and 1939.
- The Fertilizer Trade in Canada (annual).

DOMINION BUREAU OF STATISTICS

R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.), Dominion Statistician.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

October, November and December, 1940

FOREWORD.—During the past eighteen years the Bureau has published comprehensive monthly reports on coal statistics, and for the past fifteen years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published about the twentieth of the next following month.

A *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication about the fifteenth of the second following month after the end of the quarter.

Canadian coal mines produced 5,277,911 tons of coal during the last quarter of 1940 compared with 5,025,339 tons a year ago. Bituminous coal output during the three months under review totalled 3,365,841 tons, sub-bituminous coal, 213,467 tons and lignite coal, 1,698,603 tons.

Alberta's output rose 8 per cent to 2,169,004 tons and included 747,320 tons of bituminous coal, 213,467 tons of sub-bituminous coal and 1,208,217 tons of lignite coal. During October, November and December, 1939, this province produced 2,010,828 tons made up of 740,475 tons of bituminous coal, 184,292 tons of sub-bituminous coal and 1,086,061 tons of lignite coal. A decline of 2 per cent was recorded in Nova Scotia's output during the fourth quarter of 1940; the period's total was 2,022,097 tons as against 2,072,242 tons a year ago. Mines in British Columbia produced 453,931 tons compared with 455,899 tons during October, November and December, 1939. Saskatchewan's output was 35 per cent higher at 489,299 tons. New Brunswick operators reported an increase of 16 per cent in their output during the last quarter.

Importations of coal into Canada declined 23 per cent during the fourth quarter to 3,897,541 tons from the total of 5,055,133 tons for the corresponding months of 1939. Receipts of anthracite amounted to 982,301 tons while bituminous imports totalled 2,913,714 tons.

Canadian coal exported during the three months totalled 133,377 tons or 18 per cent above the tonnage exported a year ago. Ports in Nova Scotia, New Brunswick and Quebec cleared 80,801 tons of Canadian coal during October, November and December, while clearances through Manitoba, Saskatchewan, Alberta and British Columbia ports aggregated 52,576 tons.

Canada's coal supply during the months under review was computed at 9,042,075 tons or 9 per cent below the quantity made available during the fourth quarter of 1939.

Coal mines in Canada furnished employment to 26,664 men in October, 27,417 men in November and 26,974 men in December. On the average, these men produced 195.4 tons during the period or 2.9 tons per man-day.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, Imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 75 cents a ton; and general tariff, 75 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook, in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE STATISTICS FOR CANADA

October, November and December, 1940.

Production of coke in Canada during October, November and December of 1940 amounted to 788,529 tons compared with 767,719 tons produced in the previous quarter and 699,124 tons in the final quarter of a year ago. Imports during the quarter under review were reported at 186,796 tons and exports at 8,599 tons, leaving 966,726 tons for consumption in Canada.

During the calendar year 1940, Canada produced 3,015,557 tons of coke, imported 717,535 tons and exported 35,523 tons, leaving 3,697,569 tons for Canadian consumption. Corresponding consumption data for 1939 amounted to 2,797,852 tons.
