1930

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS.

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

A comprehensive record of the mining industry embodying historical and world data, detailed information on mineral production, imports and exports for Canada and general statistics relative to the mining industry on capital investment, employment, fuel consumption and power equipment arranged in 11 chapters each dealing with a particular branch of the industry. Statistics on production and trade in mineral products appear in detail in the appropriate chapters. A list of operating companies with their office and plant addresses is included. Fully indexed. Chapter titles are: Canada—The Provinces—The Gold Mining Industry—The Silver Mining Industry—The Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries—Directory of Reporting Firms—Notes on the Methods of Computing Values—Index.

Coal—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

A condensed report on production, imports and exports of coal and coke is issued monthly, publication being made about the fifteenth of the next following month.

A more general review is published quarterly, showing statistics for each month, for the quarter, and for the year to date on the output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal, employment in coal-mining, and tonnage lost. There is also a section on coke showing production, imports, exports, distribution and consumption by months and by provincial groups.

Annual Report on Coal Statistics for Canada.

Text and tables showing for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Annual Bulletins—

(a) **MINERAL PRODUCTION—**

Metals.—Arsenic—Cobalt—Copper—Gold—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Metals including Aluminium, Antimony, Chromite, Iron ore, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesite, Magnesium Sulphate, Mineral Waters, Natro-Alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) **MINERAL INDUSTRY.**—Each bulletin of this group shows in synopsis, material to be published subsequently as one chapter of the annual report on the *Mineral Production of Canada*. These bulletins are published in mimeograph form from time to time during the year as the necessary material becomes available.

By Industries.—Gold Mining Industry including Alluvial Gold Mining, Auriferous Quartz Mining and Copper-Gold-Silver Mining—Silver-Cobalt and Silver-Lead-Zinc Mining Industry—Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries.

By Provinces.—Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

COAL STATISTICS FOR CANADA

October, November, December,

1929.

FOREWORD.—During the past seven years the Bureau has published comprehensive monthly reports on coal statistics, and for the past four years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the *second* following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published on the fifteenth of the *next* following month.

A new *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the *second* following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

Output from Canadian coal mines during the three months ending December, 1929, amounted to 4,623,594 tons, a decrease of 8 per cent from the total of 4,987,802 tons produced in the corresponding quarter in 1928. Bituminous coal produced during the period totalled 2,919,367 tons, sub-bituminous, 164,413 tons, and lignite, 1,539,814 tons.

Imports of coal into Canada during the last three months of 1929 were 5,367,639 tons or 6 per cent lower than the 5,650,836 tons brought in during the last quarter of 1928. Receipts of coal from the United States totalled 5,060,734 tons; from Great Britain, 270,210 tons; from Russia, 36,542 tons; and minor tonnages were imported from Newfoundland and Japan. Imports from the United States consisted of 1,072,502 tons of anthracite coal, 3,982,936 tons of bituminous, and 5,296 tons of lignite. Shipments received from Great Britain included 248,043 tons of anthracite and 22,167 tons of bituminous. Some anthracite coal was also received from Russia and Japan.

Exports of Canadian coal during the last quarter of 1929 amounted to 235,357 tons as against 261,737 tons during the corresponding period in 1928. Exports through the ports of Nova Scotia, New Brunswick, Quebec and Ontario amounted to 97,038 tons as against 115,660 tons during the last quarter of 1928, while Manitoba, Saskatchewan, Alberta and British Columbia ports cleared 138,319 tons as against 146,077 tons during the fourth quarter of last year.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption in Canada during the three months ending December, 1929, was 9,755,876 tons or 6 per cent lower than the tonnage for the corresponding period of 1928.

Employment in Canadian coal mines showed the usual seasonal rising trend in the last three months of 1929; the average number of men employed in October was 30,220 and in December 30,953 men were on the payrolls. The average tonnage raised per man during the period was 151 tons and the average output per man-day was 2.45 tons.

The total output of coal from Canadian mines during the calendar year 1929 was 17,502,355 tons as compared with 17,564,293 tons produced in 1928. Imports during the year included 4,019,917 tons of anthracite, 14,585,275 tons of bituminous and 14,108 tons of lignite. Exports of Canadian coal were recorded at 842,972 tons, made up of 810,829 tons of bituminous coal and 32,143 tons of lignite. Coal made available for consumption in Canada in 1929 amounted to 35,278,683 tons, an increase of 2 per cent over the 1928 total of 34,414,648 tons.

EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

Imports—

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff 45 cents a ton; and general tariff, 50 cents a ton.

Exports—

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal made available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

COKE STATISTICS FOR CANADA

October, November and December, 1929

Production of coke in Canada reached a new high level during the last quarter of 1929 when the tonnage mounted to 679,109 tons, as compared with 672,445 tons in the three preceding months and 627,577 tons in the last quarter of 1928.

For the second year in succession a new yearly record for the industry was established, the tonnage of coke produced in Canada reaching 2,673,899 tons in 1929. During the previous best year, 1928, production totalled 2,308,127 tons; in 1927 the total output was 2,011,281 tons. The increase in 1929 was 16 per cent over 1928 and 33 per cent over 1927. Output from ovens in the eastern provinces rose 21 per cent over the figures for the previous year to 841,530 tons; tonnage from Ontario advanced 14 per cent to 1,631,069 tons, and in the western provinces the quantity was increased 13 per cent to 201,300 tons.

During 1929 three new monthly records were made. While production stood at 220,798 tons in January, monthly outputs rose quickly to a new high level at 228,118 tons in March, and this total was in turn surpassed by the 230,739 tons of May. Production declined during the summer months but rose again in the fall, the output in October marking a new peak for the industry at 233,024 tons. Slight recessions carried the figures downward to 221,863 tons in December.

Statements on the disposition of coke by the makers, showed that consumption in the producing plants during the year was 279,183 tons as against 244,086 tons in 1928; deliveries to associated metallurgical works increased to 1,302,008 tons from 1,197,041 tons, and sales of coke advanced to 1,028,435 tons from 772,008 tons in 1928.

Imports of coke into Canada during 1929 totalled 1,226,853 tons or 16 per cent more than in the previous year. Exports showed little change at 25,208 tons as against 25,058 tons last year. The apparent consumption of coke in Canada, computed by deducting the exports from the sum of production and imports, amounted to 3,875,544 tons in 1929 as compared with 3,341,098 tons in 1928.

Coke charged to iron blast furnaces in Canada during the twelve months totalled 1,179,710 tons, while the corresponding figures for other years were: 1,127,009 tons in 1928 and 798,288 tons in 1927.

Coke Production in Canada, by Months, 1929

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers, Tanks and Engines — Agricultural Implements — Machinery — Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Precious Metal Products—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement—Cement Products—Coke and By-Products—Gas, Illuminating and Fuel—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand—Lime Brick—Stone, Monumental and Ornamental—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Gypsum Products, (e) Mica Products, (f) Miscellaneous Non-Metallic Products, n.e.s.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

- Production of Iron and Steel in Canada.**
- Coal and Coke Statistics for Canada.**
- Automobile Statistics for Canada.**

SPECIAL REPORTS.—

- Report on the Consumption of Prepared Non-Metallic Minerals in Canada.
- Report on the Consumption of Mine and Mill Materials in Canada.
- Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.
- The Fertilizer Trade in Canada, July 1, 1926—June 30, 1927.

SEE INSIDE FRONT COVER FOR PUBLICATIONS ON THE MINERAL INDUSTRY.
