## MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS.

---

### MINERAL PRODUCTION (Mining and Metallurgy).

#### *General Reports*

**Preliminary Reports (semi-annual) on the Mineral Production of Canada.**

**Monthly Report on Canada's Leading Mineral Products.**

**Annual Report on the Mineral Production of Canada. (In one volume).**

A comprehensive record of the mining industry embodying historical and world data, detailed information on mineral production, imports and exports for Canada and general statistics relative to the mining industry on capital investment, employment, fuel consumption and power equipment arranged in 11 chapters each dealing with a particular branch of the industry. Statistics on production and trade in mineral products appear in detail in the appropriate chapters. A list of operating companies with their office and plant addresses is included. Fully indexed. Chapter titles are: Canada—The Provinces—The Gold Mining Industry—The Silver Mining Industry—The Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries—Directory of Reporting Firms—Notes on the Methods of Computing Values—Index.

#### *Coal—*

**Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.**

A condensed report on production, imports and exports of coal and coke is issued monthly, publication being made about the twentieth of the next following month.

A more general review is published quarterly, showing statistics for each month, for the quarter, and for the year to date on the output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal, employment in coal-mining, and tonnage lost. There is also a section on coke showing production, imports, exports, distribution and consumption by months and by provincial groups.

**Annual Report on Coal Statistics for Canada.**

Text and tables showing for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

#### *Annual Bulletins—*

(a) **MINERAL PRODUCTION—**

*Metals.*—Arsenic—Cobalt—Copper—Gold—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Metals including Aluminiun, Antimony, Chromite, Iron ore, Manganese, Mercury, Molybdenum, Tin, Tungsten.

*Non-Metals.*—Abrasives—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesite, Magnesium Sulphate, Mineral Waters, Natro-Alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate.

*Structural Materials.*—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) **MINERAL INDUSTRY.**—Each bulletin of this group shows in synopsis, material to be published subsequently as one chapter of the annual report on the *Mineral Production of Canada*. These bulletins are published in mimeograph form from time to time during the year as the necessary material becomes available.

*By Industries.*—Gold Mining Industry including Alluvial Gold Mining, Auriferous Quartz Mining and Copper-Gold-Silver Mining—Silver-Cobalt and Silver-Lead-Zinc Mining Industry—Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries.

*By Provinces.*—Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

W. H. LOSEE, B.Sc., Chief of the Mining, Metallurgical and Chemical Branch.

# COAL STATISTICS FOR CANADA

October, November, December

1930.

**FOREWORD.**—During the past eight years the Bureau has published comprehensive monthly reports on coal statistics, and for the past five years, on both coal and coke statistics. These reports, similar in form to the present issue, have been printed on the fifteenth of the second following month. To expedite this service, it was decided, beginning with the issue for January, 1928, to restrict the monthly bulletin to a record of output, imports and exports data compiled by provinces and by kinds of coal; and to continue coke statistics as heretofore. This *monthly* bulletin is now being published on the twentieth of the next following month.

A new *quarterly* report, of which the present publication is an example, contains revised data on production for each of the three months under review. All the other tables shown in the monthly report as it was published in previous years, are continued in this quarterly report which is prepared for publication on the fifteenth of the second following month after the end of the quarter.

Both the *monthly* bulletin and the *quarterly* report are sent to the same mailing list.

Canadian coal output during October, November and December totalled 4,291,156 tons, a falling off 14·1 per cent from the average for the quarter during the past five years. Compared with the production during the corresponding period of 1929, mines in Nova Scotia recorded an output decline of 11 per cent; in New Brunswick, 1 per cent; in Alberta, 5 per cent, and in British Columbia, 14 per cent. Saskatchewan mines recorded an increase of 17 per cent in output.

Imports of anthracite during the three months under review amounted to 1,243,892 tons, or 8·3 per cent below the total for the same period of 1929. Shipments from the United States to Canadian points were recorded at 866,783 tons as compared with 1,072,502 tons in the last quarter of 1929. Receipts from Great Britain continued at a high level and amounted to 289,596 tons; in the corresponding months of last year 248,043 tons were received. An appreciable advance was shown in the imports of anthracite from Russia; the total for the period was 74,913 tons as against 36,542 tons in October, November and December, 1929. Imports of anthracite were also received from Germany and the French East Indies.

Bituminous coal imported during the last three months of 1930 declined 12·4 per cent and amounted to 3,507,018 tons as compared with 4,005,144 tons brought in during the same period of the previous year. Ports in Central Ontario cleared 81·1 per cent of this coal, in Quebec, 9·6 per cent; in the Maritimes, 1·0 per cent; and at the Head of Lakes and points west, 8·3 per cent. Imports of lignite coal totalled 9,631 tons, consisting of 9,529 tons cleared through British Columbia ports and 102 tons shipped to Saskatchewan.

Exports of Canadian coal declined 28 per cent to a total of 170,253 tons as compared with 235,357 tons exported during the last quarter of 1929. Nova Scotia, New Brunswick, Quebec and Ontario ports cleared 105,729 tons, while Manitoba, Saskatchewan, Alberta and British Columbia ports cleared 64,524 tons.

Based on figures of output, imports and exports, the tonnage of coal made available for consumption in Canada during the three months ending December, 1930, was 8,881,444 tons, or 9 per cent lower than the quantity available in the corresponding period of last year.

The usual seasonal trend in employment was shown during the last three months of 1930; the average number of men employed in October was 30,167, in November, 30,625, and in December, 30,558. The average tonnage raised per man during this period was 140 tons and the average output per man day was 2·3 tons.

Canadian mines produced 14,878,728 tons of coal during the calendar year 1930 as compared with an output of 17,496,557 tons in 1929. Imports during 1930 included 4,256,090 tons of anthracite, 13,345,308 tons of bituminous, and 18,676 tons of lignite. Exports of coal amounted to 624,512 tons, consisting of 594,490 tons of bituminous coal and 30,022 tons of lignite. Coal made available for consumption in Canada in 1930 totalled 31,874,290 tons, a decrease of 9·6 per cent from the 1929 total of 35,272,885 tons.

## EXPLANATORY NOTES ON THE TABLES

The figures in this report are the latest available at time of printing, for each month in the quarter, on production, imports and exports of coal and coke, for Canada. Preliminary figures are published monthly. Finally revised data for the year are given in the *Annual Report on Coal Statistics*.

### **Output—**

The output of coal from each district or county is shown for each month of the quarter under review; the total output during the calendar year to date and the output during the corresponding period of the previous year are also given.

### **Imports—**

Imports of anthracite, bituminous and lignite coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during each month, the quarter, and the calendar year to date, with totals for the corresponding quarter in the preceding year. With regard to the table of imports, it is to be noted that the data given are not comparable with the imports statistics published in the *Reports of the Trade of Canada*. The quantity of coal shown herein as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs, while the *Reports of the Trade of Canada* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use, owing to the fact that there is a duty on all bituminous coal imported—preferential tariff, 35 cents a ton; intermediate tariff, 45 cents a ton; and general tariff, 50 cents a ton.

### **Exports—**

Exports of Canadian coal by ports of exit are shown; these data do not necessarily show the province of origin. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

### **Coal made available for Consumption in Canada—**

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

### **Tonnage Lost—**

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of day's work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportion produced and lost, are computed from these figures. The tonnage lost during the quarter is analyzed in percentages according to the cause of loss.

# COKE STATISTICS FOR CANADA

1930

Production of coke in Canada during 1930 at 2,354,026 short tons was the second best year in the history of the industry, being only exceeded by the total of 2,677,581 tons produced in the previous year. In 1930, the daily output of Canadian coke plants amounted to 6,449 tons as compared with 7,336 tons a day in 1929 and an average of 3,937 tons per day in 1924. Daily outputs for other years amounted to 6,323 tons in 1928; 5,552 tons in 1927; 5,554 tons in 1926 and 4,238 tons in 1925.

Included in the production for 1930 were 204,145 tons of breeze of which 52,359 tons were made by eastern ovens, 140,059 tons in Ontario, and 11,727 tons in the west. Sales of breeze totalled 61,652 tons including 6,140 tons from the east, 45,388 tons from Ontario, and 10,124 tons from western producers.

During the year, when production totalled 2,354,026 tons, the apparent consumption of coke in Canada, as calculated by deducting the exports of 29,801 tons from tonnage made in Canada plus the imports of 1,061,433 tons, amounted to 3,385,658 tons. In the previous year the apparent consumption, thus computed, was 3,879,226 tons, and in 1928 it amounted to 3,343,098 tons.

Statements on the disposition of coke by the makers showed an increase in coke sales to 1,063,112 tons from 1,028,435 tons in 1929, a gain in the quantity used in coke plants to 301,740 tons from 279,183 tons, but a decline in the tonnage transferred to the metallurgical works of the producing companies to 951,748 tons from 1,302,008 tons in the previous year.

In 1930 charges to coke ovens included 735,275 tons of Canadian coal and 2,489,352 tons of imported coal, or a total of 3,224,627 tons of bituminous coal to produce 2,354,026 tons of coke, an average yield of 1,451 pounds of coke for each short ton of coal carbonized. Yields per ton of coal charged in other years amounted to 1,443 pounds in 1929, 1,447 pounds in 1928, and an average of 1,414 pounds in 1927.

Coke charged to iron blast furnaces in Canada during the twelve months totalled 795,829 tons, while the corresponding figures for other years were 1,179,710 tons in 1929; 1,127,009 tons in 1928 and 798,288 tons in 1927.

## LIST OF PUBLICATIONS

PREPARED IN THE

### MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

#### STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

##### *Annual Printed Reports*—

**Iron and Steel and Their Products:** Pig Iron and Ferro-Alloys—Steel and Rolled Products—Castings and Forgings—Boilers, Tanks and Engines—Agricultural Implements—Machinery—Automobiles—Auto Accessories—Bicycles—Railway Rolling Stock—Wire and Wire Goods—Sheet Metal Products—Hardware and Tools—Miscellaneous Iron and Steel Products.

**Manufactures of Non-Ferrous Metals:** Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Precious Metal Products—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

**Manufactures of Non-Metallic Minerals:** Aerated Waters—Asbestos and Allied Products—Cement—Cement Products—Coke and Gas—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand-Lime Brick—Stone Dressing—Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Abrasives and Abrasive Products, (b) Artificial Graphite and Electrodes, (c) Gypsum Products, (d) Mica Products.

**Chemicals and Allied Products:** Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

**Annual Bulletins.**—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

##### *Monthly*—

Production of Iron and Steel in Canada.

Coal and Coke Statistics for Canada.

Automobile Statistics for Canada.

#### SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Report on the Consumption of Coke in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.

The Fertilizer Trade in Canada, July 1, 1928—June 30, 1929.
