NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 4 volumes, as follows: Volume I—The Primary Industries, including mining, forestry and fisheries; Volume II—Manufacturing; Volume III—Construction; Volume IV—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I—General Review of the Manufacturing Industries, \$1.50.
- II—The Manufacturing Industries, by Provinces
 - Section 1. Principal Statistics of Major Industrial Groups and Leading Industries, 50¢.
 - Section 2. Principal Statistics of Individual Industries, 75¢.
 - Section 3. Principal Statistics by Regional Distribution, 75¢.
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textiles
- VIII—Wood and Paper Products
- IX—Printing Trades
- X—Iron and Steel Products
- XI—Transportation Equipment
- XII—Non-ferrous Metal Products
- XIII—Electrical Apparatus and Supplies
- XIV—Non-metallic Mineral Products
- XV—Products of Petroleum and Coal
- XVI—Chemicals and Allied Products
- XVII—Miscellaneous Manufactures

The present report belongs in Part XVI, Chemicals and Allied Products. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A—General Review, 25¢.
- B—The Acids, Alkalies and Salts Industry, 25¢.
- C—The Fertilizer Manufacturing Industry, 25¢.
- D—The Fertilizer Trade in Canada, 25¢.
- E—The Medicinal and Pharmaceutical Preparations Industry, 25¢.
- F—The Paints, Varnishes and Lacquers Industry, 25¢.
- G—The Primary Plastics Industry, 25¢.
- H—The Soaps, Washing Compounds and Cleaning Preparations Industry, 25¢.
- I—The Toilet Preparations Industry, 25¢.
- J—The Vegetable Oils Industry, 25¢.
- K—The Inks Industry, 25¢.
- L—The Adhesives Industry, 25¢.
- M—The Polishes and Dressings Industry, 25¢.
- N—The Compressed Gases Industry, 25¢.
- O—The Coal Tar Distillation Industry, 25¢.
- P—The Miscellaneous Chemical Products Industry, 25¢.

CHEMICALS AND ALLIED PRODUCTS

1951

General Review

Production of chemicals and allied products in Canada soared about 20 per cent in value in 1951 to a record total of \$776 millions. This total was double the corresponding figure for 1946 and about five times the pre-war high of \$159 millions in 1939. Higher prices for chemicals and chemical products, of course, accounted for a substantial share of the gains in output values in recent years, but in terms of physical volume it appears that the gain in 1951, compared with 1950, was about 6 per cent and with 1939 about 140 per cent.

All but one of the industries in the chemicals and allied products group showed substantial gains in output value in 1951 compared with the previous year. The percentage increases were as follows:—coal tar distillation, 20; heavy chemicals, 35; compressed gases, 21; fertilizers, 8; medicinals and pharmaceuticals, 17; paints and varnishes, 13; soaps and cleaning preparations, 12; toilet preparations, 8; inks, 4; vegetable oils, 28; adhesives, 18; primary plastics, 28; miscellaneous chemical products, 31. Output from the polishes and dressings industry was slightly less than in 1950.

In the entire group there were 1,037 plants in 1951 with approximately 46,000 employees and an aggregate pay roll of \$131 millions. The 513 works in Ontario accounted for 58 per cent of the production and 51 per cent of the employees, and the 339 establishments in Quebec accounted for 30 per cent of the total output and 38 per cent of the workers. British Columbia with 81 plants accounted for less than 8 per cent of the total Canadian production.

Exports of chemicals and allied products again showed a substantial increase, the value in 1951 amounting to \$131 millions compared with \$100 millions in 1950 and with \$71 millions in 1949. Gains were quite general throughout the list of items except for nitrogen fertilizers for which there was a decline of about 9 per cent. However, fertilizers at \$35.7 millions accounted for 27 per cent of the total export shipments. Sodium compounds totalled \$9.7 millions; polystyrene, \$6.8 millions; synthetic resins, \$3.5 millions; acids, \$5.8 millions; medicinals, including penicillin and streptomycin, \$5.5 millions; paints and pigments, \$8.0 millions; and calcium compounds, \$2.7 millions. Exports to the United States amounted to \$67 millions or nearly 52 per cent of the total shipped to all foreign countries.

Imports rose about 28 per cent to \$191.8 millions with substantial gains again in all of the principal classes. Drugs and pharmaceuticals increased 20 per cent to \$22 millions; pigments and paints jumped 14 per cent to \$21 millions; dyeing and tanning materials, 7 per cent to \$14 millions; inorganic chemicals, 16 per cent to \$27 millions and miscellaneous chemicals, 28 per cent to \$78 millions. About 86 per cent of the imports in 1951 came from the United States, and 8.4 per cent from the United Kingdom; Germany, Switzerland and France were the other principal suppliers.

TABLE 10. Alphabetical List of Products Made in the Industries in the Chemicals and Allied Products Group, 1950 and 1951

Note. This is simply a list of the principal products made for sale by concerns in the Chemicals and Allied Products group of industries with corresponding output figures where it is possible to publish them. It is not intended to be a complete list of chemicals made in Canada as numerous chemicals are made in other industries; similarly the production figures may not represent totals for Canada as there may have been a production in other industries.
