CHEMICALS AND ALLIED PRODUCTS

1952

GENERAL REVIEW

Production of chemicals and allied products in Canada totalled \$796.6 millions in 1952 compared with \$776.5 millions in 1951, an increase of about 2.3 per cent. The net value of production, or the value added by manufacturing, also advanced, the \$414.1 millions in 1952 being 7.8 per cent higher than the \$384.0 millions in 1951.

The gross values by industries for 1952 were as follows, in millions of dollars: Acids, alkalies and salts, \$114.2; fertilizers, \$78.7; medicinal and pharmaceutical preparations, \$88.0; paints and varnishes, \$107.4; primary plastics, \$34.6; soaps, washing compounds and cleaning preparations, \$84.5; toilet preparations, \$27.1; vegetable oils, \$51.9; inks, \$10.9; adhesives, \$10.8; polishes and dressings, \$16.0; compressed gases, \$16.2; coal tar distillation, \$12.6; and miscellaneous chemical products, \$143.5.

In the entire group there were 1,075 plants in 1952 with approximately 47,000 employees and an aggregate pay roll of \$147 millions. The 538 works in Ontario accounted for 59 per cent of the production and 49 per cent of the employees, and the 346 establishments in Quebec accounted for 29 per cent of the total output and 41 per cent of the workers. The other provinces with 191 plants accounted for about 12 per cent of the total Canadian production. Materials used in manufacturing processes cost \$357.8 millions and fuel and electricity cost \$24.7 millions.

Exports of chemicals and allied products showed a decline in 1952, the value of \$124.6 millions being about 6 per cent less than the \$131.7 millions in 1951. Exports to the United States amounted to \$75.1 millions or nearly 60 per cent of the total shipped to all foreign countries.

Imports at \$187.7 millions were about 2 per cent lower than the total of \$191.8 millions, in 1951. About 89 per cent of the imports in 1952 came from the United States while the United Kingdom accounted for about 6 per cent.

CHEMICALS AND ALLIED PRODUCTS

TABLE 10. Alphabetical List of Products Made in the Industries in the Chemicals and Allied Products Group
1951 and 1952

Note. This is simply a list of the principal products made for sale by concerns in the Chemicals and Allied Products group of industries with corresponding output figures where it is possible to publish them. It is not intended to be a complete list of chemicals made in Canada as numerous chemicals are made in other industries; similarly, the production figures may not represent totals for Canada as there may have been a production in other industries.
