NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: Volume I — The Primary Industries, including mining, forestry and fisheries; Volume II — Manufacturing; Volume III — Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I — General Review of the Manufacturing Industries, \$1.50
- II — The Manufacturing Industries of Canada, (7 sections, as follows:)
 - Section A. Summary for Canada, 25¢
 - Section B. Atlantic Provinces, 50¢
 - Section C. Quebec, 25¢
 - Section D. Ontario, 25¢
 - Section E. Prairie Provinces, 40¢
 - Section F. British Columbia, 25¢
 - Section G. The Manufacturing Industries of Canada, Regional Distribution, 75¢
- III — Foods and Beverages
- IV — Tobacco and Tobacco Products
- V — Rubber Products
- VI — Leather Products
- VII — Textile Mills
- VIII — Knitting Mills
- IX — Clothing
- X — Wood and Paper Products
- XI — Printing Trades
- XII — Iron and Steel Products
- XIII — Transportation Equipment
- XIV — Non-ferrous Metal Products
- XV — Electrical Apparatus and Supplies
- XVI — Non-metallic Mineral Products
- XVII — Products of Petroleum and Coal
- XVIII — Chemicals and Allied Products
- XIX — Miscellaneous Manufactures

661.071

The present report belongs in Part XVI, Non-metallic Mineral Products. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A — General Review, 25¢
- B — The Artificial Abrasives Industry, 25¢
- C — The Asbestos Products Industry, 25¢
- P — The Cement Manufacturing Industry (also in Mining), 25¢
- D — The Concrete Products Industry, 25¢
- E — The Glass and Glass Products Industry, 25¢
- K — The Gypsum Industry (also in Mining), 25¢
- Q — The Clay and Clay Products Industry (also in Mining), 25¢
- R — The Lime Industry (also in Mining), 25¢
- M — The Salt Industry (also in Mining), 25¢
- T — The Stone Industry (also in Mining), 25¢
- G — The Miscellaneous Non-metallic Mineral Products Industry, 25¢

CHEMICALS AND ALLIED PRODUCTS

1955

General Review

Production of chemicals and allied products totalled \$1,044.1 millions in 1955 compared with \$935.7 millions in 1954, an increase of about 11.6 per cent. The net value of production, or the value added by manufacturing, also advanced, the \$528.9 millions in 1955 being 11 per cent higher than the \$476.1 millions in 1954.

The gross values of production by industries were as follows, in millions of dollars: Acids, alkalies and salts, \$172.3; fertilizers, \$92.5; medicinals and pharmaceuticals, \$108.1; paints and varnishes, \$117.2; primary plastics, \$75.1; soaps, washing compounds and cleaning compounds, \$100.1; toilet preparations, \$36.8; vegetable oils, \$50.3; inks, \$14.7; adhesives, \$10.9; polishes and dressings, \$19.6; compressed gases, \$16.5; coal tar distillation, \$11.9; and miscellaneous chemical products, \$218.0.

In the entire group there were 1,126 plants in 1955 with approximately 52,000 employees and an aggregate payroll of \$185 millions. The 553 works in Ontario accounted for 55 per cent of the production and 48 per cent of the employees and the 371 plants in Quebec accounted for 32 per cent of the total output and 41 per cent of the workers. The other provinces with 202 plants accounted for about 13 per cent of the total Canadian production. Materials used in manufacturing processes cost \$480.1 millions and fuel and electricity cost \$33.1 millions.

The exports of chemicals and allied products showed an increase in 1955, the value of \$210.0 being about 30 per cent higher than the \$161.3 millions in 1954. Exports to the United States amounted to \$111.7 millions or 53 per cent of the total shipped to all foreign countries.

Imports at \$260.5 millions increased about 18 per cent over the \$220.6 reported in 1954. About 85 per cent of the imports came from the United States while the United Kingdom accounted for about 10 per cent.

Note: Figures for value added by manufacture prior to 1952 were obtained by subtracting the cost of materials used, including fuel and electricity, from the value of production. In 1952, the gross value of production was replaced by value of factory shipments, f.o.b. plant. As no information on inventory change is available for 1953, value added figures for the latter year were obtained by subtracting from the value of shipments the cost of materials, fuel and electricity. In 1954, and 1955 information on the value of year-end inventory holdings at plant and plant warehouses was collected as part of the annual Census of Industry and information thus made available was taken into account in calculating the value added figures.

1. The opening inventory for the current year may not necessarily agree with the closing inventory published the previous year because of changes in the composition of the industry such as; the addition of new establishments, the disappearance of old ones, or the transfer of establishments to other industries for statistical purposes. The figure for value added by manufacture for the previous year does not need to be altered because of such changes in the composition of the industry.

CHEMICALS AND ALLIED PRODUCTS

TABLE 12. Alphabetical List of Products Made in the Industries in the Chemicals and Allied Products Group, 1954 and 1955

Note. This is simply a list of the principal products made for sale by concerns in the Chemicals and Allied Products group of industries with corresponding output figures where it is possible to publish them. It is not intended to be a complete list of chemicals made in Canada as numerous chemicals are made in other industries; similarly, the production figures may not represent totals for Canada as there may have been a production in other industries.
