NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: **Volume I** – The Primary Industries, including mining, forestry and fisheries; **Volume II** – Manufacturing; **Volume III** – Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I – General Review of the Manufacturing Industries
- II – The Manufacturing Industries of Canada, (7 sections, as follows:)
 - Section A. Summary for Canada
 - Section B. Atlantic Provinces
 - Section C. Quebec
 - Section D. Ontario
 - Section E. Prairie Provinces
 - Section F. British Columbia
 - Section G. The Manufacturing Industries of Canada, Regional Distribution
- III – Foods and Beverages
- IV – Tobacco and Tobacco Products
- V – Rubber Products
- VI – Leather Products
- VII – Textile Mills
- VIII – Knitting Mills
- IX – Clothing
- X – Wood and Paper Products
- XI – Printing Trades
- XII – Iron and Steel Products
- XIII – Transportation Equipment
- XIV – Non-ferrous Metal Products
- XV – Electrical Apparatus and Supplies
- XVI – Non-metallic Mineral Products
- XVII – Products of Petroleum and Coal
- XVIII – Chemicals and Allied Products
- XIX – Miscellaneous Manufactures

The present report belongs in Part XVIII, Chemicals and Allied Products. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A – General Review
- B – The Acids, Alkalies and Salts Industry
- C – The Fertilizers Industry
- D – The Fertilizer Trade in Canada
- E – The Medicinal and Pharmaceutical Preparations Industry
- F – The Paints, Varnishes and Lacquers Industry
- G – The Primary Plastics Industry
- H – The Soaps, Washing Compounds and Cleaning Preparations Industry
- I – The Toilet Preparations Industry
- J – The Vegetable Oils Industry
- K – The Inks Industry
- L – The Adhesives Industry
- M – The Polishes and Dressings Industry
- N – The Compressed Gases Industry
- O – The Coal Tar Distillation Industry
- P – The Miscellaneous Chemical Products Industry

Prices of most reports released after January 1, 1959 have been increased. Information on the new prices of particular issues is available on request from the Information Services Division of the Dominion Bureau of Statistics.

CHEMICALS AND ALLIED PRODUCTS

1957

General Review

Production of chemicals and allied products totalled \$1,203.4 millions in 1957 compared with \$1,111.2 millions in 1956, an increase of about 8.3 per cent. The net value of production, or the value added by manufacturing, also advanced, the \$605.3 millions in 1957 being 8.8 per cent higher than the \$556.2 millions in 1956.

Factory shipments by industries were as follows, in millions of dollars; Acids, alkalies and salts, \$215.8; fertilizers, \$83.8; medicinals and pharmaceuticals, \$140.1; paints and varnishes, \$131.1; primary plastics, \$91.8; soaps, washing compounds and cleaning preparations, \$118.9; toilet preparations, \$49.8; vegetable oils, \$61.0; inks, \$16.9; adhesives, \$13.7; polishes and dressings, \$22.3; compressed gases, \$24.3; coal tar distillation, \$13.7; miscellaneous chemical products, \$220.2.

In the entire group there were 1,137 plants in 1957 with approximately 55,000 employees and an aggregate payroll of \$222 millions. The 554 plants in Ontario accounted for 58 per cent of the production and 49 per cent of the employees and the 372 plants in Quebec accounted for about 30 per cent of the total output and 33 per cent of the workers. The other provinces with 211 plants accounted for about 12 per cent of the total Canadian

production. Materials used in manufacturing processes cost \$565.7 millions and fuel and electricity cost \$42.1 millions.

The exports of chemicals and allied products showed an increase in 1957, the value of \$195.3 millions being about 7 per cent higher than the \$182.9 millions in 1956. The latter has been adjusted to accommodate a change in classification which transferred uranium ores and concentrates out of the chemical group. Exports to the United States amounted to \$78.0 millions or 40 per cent of the total shipped to all foreign countries.

Imports at \$293.8 millions increased about 10 per cent over the \$288.6 millions reported in 1956. About 86 per cent of the imports came from the United States while the United Kingdom accounted for about 8 per cent.

Note: Due to the lack of inventory data, figures for value added by manufacture prior to 1954 were obtained by subtracting the cost of materials used, including fuel and electricity, from the total value of factory shipments. In 1954 and 1955 the "Value added" adjustment incorporated the increase or decrease to shipments values resulting from changes in the value of inventories over the period. For these two years, the adjustments that were made used only the change in finished product inventory owned by manufacturers. Beginning with 1956 the calculation of the "Value added" figure was further adjusted to take into account the "Goods in process" as well as the finished goods held at plant or plant warehouses.

¹ The opening inventory for the current year may not necessarily agree with the closing inventory published the previous year because of changes in the composition of the industry such as: the addition of new establishments, the disappearance of old ones, or the transfer of establishments to other industries for statistical purposes. The figure for value added by manufacture for the previous year does not need to be altered because of such changes in the composition of the industry.

TABLE 12. Alphabetical List of Products Made in the Industries in the Chemicals and Allied Products Group, 1956 and 1957

Note: This is simply a list of the principal products made for sale by concerns in the Chemicals and Allied Products group of industries with corresponding output figures where it is possible to publish them. It is not intended to be a complete list of chemicals made in Canada as numerous chemicals are made in other industries; similarly, the production figures may not represent totals for Canada as there may have been a production in other industries.
