## DEPARTMENT OF TRADE AND COMMERCE DOMINION BUREAU OF STATISTICS CENSUS OF INDUSTRY MINING, METALLURGICAL AND CHEMICAL BRANCH OTTAWA - CANADA

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.) Chief - Mining, Metallurgical and Chemical Branch: W. H. Losee, B.Sc. Statistician - Metal and Chemical Products: H. McLeod, B.Sc.

## ANNUAL INDUSTRY BULLETIN

CHEMICALS AND ALLIED PRODUCTS GROUP

THE COMPRESSED GASES INDUSTRY, 1936.

Production from the manufacturing plants in Canada which were occupied chiefly in making compressed gases was valued at \$3,360,220 in 1936 compared with \$3,077,765 in 1935.and \$2,803,840 in 1934.

The same 28 factories were in operation as in 1935; 13 were in Ontario, 5 in Quebec, 3 in Manitoba, 2 in Nova Scotia, 2 in Alberta, 2 in British Columbia, and 1 in Saskatchewan. An average of 568 workers were employed in these works during 1936.

The chief products were oxygen, acetylene, carbon dioxide and hydrogen and each of these was made in greater quantity than in 1935. The output of oxygen increased 11 per cent to 151,500,660 cubic feet; acetylene, 3.5 per cent to 41,315,830 cubic feet; carbon dioxide in cylinders, 10 per cent to 5,318,656 pounds, and hydrogen, 0.4 per cent to 40,313,740 cubic feet. Aqua and anhydrous ammonia, solid carbon dioxide, nitrogen, and nitrous oxide were the other products of this industry.

The Compressed Gases Industry, as reviewed in this report, includes only those factories which made industrial gases as their main products. In addition, liquid chlorine and synthetic ammonia were manufactured in the Sandwich plant of Canadian Industries Limited but data pertaining to these departments were not shown separately from the general plant operations and so have been included in the Acids, Alkalies and Salts Industry. Synthetic ammonia (and the hydrogen and nitrogen for its manufacture) was made also at Trail, B.C., by the Consolidated Mining and Smelting Company of Canada but as all of the output was used in making ammonia fertilizers, the statistics relating thereto have been included in the Fertilizers Industry. Similarly, acetylene was made by Shawinigan Chemicals Limited at Shawinigan Falls for use in their own works in making acetic acid, etc., and nitrogen was produced as an intermediate by the North American Cyanamid Company at Niagara Falls for use in the manufacture of calcium cyanamide. for lighting railway coaches was made at several divisional points but these plants have always been classified to the artificial gas industry and again have been included in that group.

Names of Firms	Location of Plants	Products Made
guardingeneralizabilitatida and angla and a representar angla final	Conference of the property of	processor of the second
Cheney Chemical Limited	180 Duke St., Toronto, Ont.	Nitrous oxide.
L'Air Liquide Society & Canadian Liquid Air Co. Ltd.	H.O 1111 Beaver Hall Hill, Montreal, P.Q. Plants - Halifax, Montreal, Toronto, London, Winnipeg, Regina, Calgary and Vancouver.	Acetylene and oxygen.
Liquid Carbonic Canadian Corporation, Limited	H.O 2120 Cabot St., Cote St. Paul, Montreal, P.Q. Plants - Dartmouth, Montreal(2) Toronto, St. Boniface, Edmonton and Vancouver	cylinders and solid ,carbon dioxide,
Dominion Oxygen Company, Limited	H.O Canada Life Bldg., 340 University Ave., Toronto, Ont. Plants - Montreal and Toronto.	Oxygen and nitrogen.
Prest-O-Lite Company of Canada, Limited	H.O Canada Life Bldg., 340 University Ave., Toronto, Ont. Plants - Shawinigan Falls, Merritton and St. Boniface.	Acetylene
Canadian Industries Limited	H.O P. O. Box 1260 Montreal, P.Q. Plant - Toronto, Ont.	Aqua ammonia and anhydrous ammonia.
Lever Brothers, Limited	299 Eastern Ave., Toronto, Ont.	Hydrogen and oxygen,
The People's Gas Supply Co. Ltd.	2 Mill St., Ottawa, Ont.	Acetylene.
Proctor & Gamble Co. of Canada Limited	Burlington St., Hamilton Ont.	Hydrogen and oxygen.
Swift Canadian Company, Limited	Keele St. and St. Clair Ave., Toronto, Ont.	Hydrogen.
Wall Chemicals Ltd.	1103 Millwood Rd., Toronto, Ont.	Carbon dioxide in cylinders, and acetylene.
Carbo-Ice (Ontario) Limited	3 Laird Drive, Leaside, Ont.	Solid carbon dioxide and carbon dioxide in cylinders.

For Footnote(x) - see next page.

(x) The plants listed on page 8 are included under the Compressed Gases Industry as they make compressed gases as their chief product. In addition to these, Canadian Industries Limited produced synthetic ammonia and liquid chlorine at Sandwich. Ontario, and liquid sulphur dioxide at Hamilton, Ontario, but, when classified according to the main products, these plants come under the Acids, Alkalies and Salts Industry which is reviewed in a separate bulletin. Synthetic ammonia (and the hydrogen and nitrogen for its manufacture) is also made at Trail, B.C., by the Consolidated Mining and Smelting Company but is used by that company in the manufacture of ammonia fertilizers; acetylene is made by the Shawinigan Chemicals and used in making acetic acid, etc., and nitrogen is produced is an intermediate in the manufacture of cyanamide by the North American Cyanamid Company at Niagara Falls.
