ANNUAL INDUSTRY REPORT

CHEMICALS AND ALLIED PRODUCTS GROUP

## THE COMPRESSED GASES INDUSTRY, 1938

Production from the manufacturing plants in Canada which were occupied chiefly in making industrial gases was valued at \$3,753,600 in 1938 compared with \$3,929,242 in 1937, a decrease of 4.4 per cent.

Thirty factories were in operation in 1938, distributed as follows - 13 in Ontario, 6 in Quebec, 3 in Manitoba, 3 in Nova Scotia, 2 in Alberta, 2 in British Columbia, and 1 in Saskatchewan. These establishments employed capital amounting to \$4,938,766 of which \$2,962,266 was the value of land, buildings and equipment, \$366,388 was the value placed on inventories, and \$1,610,112 was the amount of working capital at the end of the year.

The average number of employees in this industry in 1938 was 654, including 357 salaried workers and 297 wage-earners. Salaries for the year amounted to \$633,168 and wages totalled \$385,526.

The chief products were oxygen, acetylene and carbon dioxide (in cylinders). The output of oxygen decreased 10 per cent to 173,992,296 cubic feet, and acetylene declined 6 per cent to 45,394,062 cubic feet, but carbon dioxide (in cylinders) increased 13.7 per cent to 7,159,327 pounds. The output of hydrogen declined 13 per cent to 34,970,537 cubic feet. Aqua ammonia, anhydrous ammonia, solid carbon dioxide, nitrogen and nitrous oxide were other products of this industry and were produced in about the same quantities as in 1937.

The Compressed Gases Industry, as reviewed in this bulletin, includes only those factories which make industrial gases as their main products. In addition, liquid chlorine and synthetic ammonia are manufactured in the Windsor plant of Canadian Industries Limited but as data pertaining to these departments cannot be shown separately from the general operations, this establishment has been classified to the Acids, Alkalies and Salts Industry. Synthetic ammonia (and the hydrogen and nitrogen for its manufacture) is made also at Trail, B.C., by the Consolidated Mining and Smelting Company of Canada, Limited, but as all of the output is used in making ammonia fertilizers, the statistics relating thereto are included in the Fertilizers Industry. Similarly, acetylene is made by Shawinigan Chemicals Limited at Shawinigan Falls for use in own works in making acetic acid, etc., and nitrogen is produced as an intermediate by the North American Cyanamid Company at Niagara Falls, for use in the manufacture of calcium cyanamide. Pintsch oil gas for lighting railway coaches is made at several divisional points but these plants have always been classified to other industries.

## DIRECTORY(x) OF FIRMS INCLUDED IN THE COMPRESSED GASES INDUSTRY IN CANADA, 1938.

Names of Firms	Location of Plants	Products Made
57 (344 (2) to (34 )		T L OUTLO OF MANAGEMENT OF THE PROOF
Cheney Chemicals Limited Air Liquid Society & Canadian Liquid Air Co. Ltd.	180 Duke St., Toronto, Ont. H.O 1111 Beaver Hall Hill, Montreal, P.Q. Plants Halifax, Sydney, Montreal, Toronto, London, Winnipeg, Regina, Calgary and Vancouver.	Nitrous oxide. Acetylene, oxygen and nitrogen.
Liquid Carbonic Canadian Corpora- ration Limited	St. Paul, Montreal, P.Q  Plants - Dartmouth, Montreal(2)  Toronto, St. Boniface, Edmonton and Vancouver	cylinders and solid.
Dominion Oxygen Company, Limited	H.O Canada Life Bldgo, 340 University Aveo, Toronto, Onto Plants - Montreal, Toronto and Sault Stee Marie	Oxygen and nitrogen
Prest-O Lite Company of Canada, Limited	H.O. Canada Life Bldg., 340 University Ave., Toronto, Ont. Plants Shawinigan Falls, Merritton and St. Boniface	Acetylene
Canadian Industries Limited	H.O P.O. Box 10, Montreal, P.Q. Plant Toronto, Onto	Aqua ammonia and anhydrous ammonia.
Lever Brothers, Limited The People's Gas Supply Co. Ltd. Proctor & Gamble Co. of Canada Limited Swift Canadian Company, Limited	299 Eastern Ave., Toronto, Ont. 2 Mill St., Ottawa, Ont. Burlington St. E., Hamilton, Ont.	
Wall Chemicals Limited	Toronto, Ont.  H.O 1103 Millwood Rd.,  Toronto, Ont.  Plants - Montreal, Toronto.	Hydrogen, oxygen and acetylene.

<sup>(</sup>x) The plants listed above are included under the Compressed Gases Industry as they make industrial gases as their chief products. In addition, Canadian Industries Limited produces synthetic ammonia at Windsor, Onto, liquid chlorine at Windsor,

Ont., and Cornwall, Ont., and liquid sulphur dioxide at Hamilton, Ontario, but, when classified according to the main products, these plants come under the Acids, Alkalies and Salts Industry which is reviewed in a separate bulletin. Synthetic ammonia (and the hydrogen and nitrogen for its manufacture) is made also at Trail, B.C., by the Consolidated Mining and Smelting Company but the entire output is used by that company in the manufacture of ammonia fertilizers and a separate report is not submitted for the gas division. Similarly, acetylene is made by the Shawinigan Chemicals Limited and used in making acetic acid, etc., and nitrogen is produced by the North American Cyanamid Company at Niagara Falls as an intermediate in the manufacture of cyanamide.
