THE FERTILIZERS INDUSTRY

1950

Production by factories in Canada which were engaged principally in the manufacture of fertilizers was valued at \$68,996,819 in 1950 compared with \$67,428,067 in 1949. In addition, there was a production of 224,966 tons of cyanamid, ammonium sulphate, mixed fertilizers and fish fertilizers valued at \$9,757,735 in 1950, and 227,281 tons at \$9,991,139 in 1949, by establishments which were classified to other industrial groups. The quantity of fish used as fertilizer in 1950 amounted to 108,355 barrels valued at \$69,231.

Thirty-six plants were occupied chiefly in the manufacture of fertilizers in 1950, there being 14 in Ontario, 7 in British Columbia, 6 in Quebec, 3 in New Brunswick, 3 in Nova Scotia, 2 in Prince Edward Island and 1 in Alberta. Workers in these establishments declined from 3,269 in 1949 to 3,253 in 1950, although total salaries and wages increased from \$9,004,943 to \$9,422,571.

Total production of mixed fertilizers in 1950 from all industries amounted to 669,900 tons worth \$26,519,000 at factory prices and included 666,100 tons at \$26,300,000 made by plants in the fertilizer manufacturing industry and 3,800 tons at \$219,000 made in the meat packing, oils and fats and adhesives industries. In 1949 the corresponding total was 661,100 tons at \$24,794,000 and in 1948 it was 650,200 tons at \$22,738,000.

Superphosphate was manufactured in 1950 by Canadian Industries Limited and Green Valley Fertilizer and Chemical Co., Ltd. The former had works at McMasterville, Quebec; Hamilton, Ontario; and also operated a plant at New Westminister, British Columbia, until September when it was taken over by Green Valley Fertilizer and Chemical Co., Ltd. Ammonium nitrate (fertilizer grade) was manufactured in 1950 by the North American Cyanamid Limited (Welland Works), at Niagara Falls, in Ontario, and by Consolidated Mining and Smelting Company of Canada, Limited, at Trail, British Columbia, and at Calgary, Alberta. The output figures are not published separately since there were only two producers in each instance.

Ammonium sulphate was made by the Consolidated Mining and Smelting Company of Canada, Limited, at Trail, British Columbia; North American Cyanamid Limited (Welland Works), at Niagara Falls, Ontario; and also by the following coke manufacturers: Algoma Steel Corporation Limited, at Sault Ste. Marie, Ontario; Dominion Iron and Steel Ltd., at Sydney, Nova Scotia; Hamilton By-Product Coke Ovens, Limited, at Hamilton, Ontario; Montreal Coke and Manufacturing Company, at Montreal, Quebec; and the Steel Company of Canada, Limited, at Hamilton, Ontario. Production during the calendar year 1950 amounted to 211,534 tons; imports totalled 103 tons, and exports amounted to 209,106 tons. Ammonium phosphate was made only by the Consolidated Mining and Smelting Company of Canada, Limited, at Trail, British Columbia.

A special survey of the fertilizer trade in Canada during the fertilizer year ended June 30, 1951, has been completed by the Dominion Bureau of Statistics, and the results have been published in a special report. Summary figures on the sales of fertilizers have been reprinted in Tables 6-9 of this bulletin. A total of 770,507 tons of mixtures and materials was sold in Canada during the year ended June 30, 1951, compared with 764,581 tons during the preceding twelve-month period.

Some fertilizers are made also in the other industries; for example, ammonium sulphate is produced as a by-product in coke plants; cyanamid is made by a firm which is classified to the heavy chemicals industry and a small amount of mixed fertilizer is made in the slaughtering and meat-packing industry. For the total production of mixed fertilizers, see table 1.
