SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- R revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- ... nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- R nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## FERTILIZER TRADE

Sales of mixed fertilizers and fertilizer materials for direct application to the soil, including exports amounted to 10,805,115 tons in the year ended June 30, 1972. Sales to Canadian users totalled 2,175,230 tons, including 1,171,355 tons of fertilizer materials and 1,003,875 tons of mixtures. Sales of materials increased .05 % and mixtures increased .005 % over the previous year.

Production of fertilizer materials (including non-industrial type anhydrous ammonia used for direct application and export) in the period under review, including such items as ammonium nitrate, ammonium phosphate, ammonium sulphate, urea, potash, superphosphate and cyanamide, amounted to 10,336,160 tons. The output of mixed fertilizers totalled 958,171 tons. The figures for the materials and mixtures are not additive as some of the former were used in making the latter.

Imports of fertilizers (including some anhydrous ammonia for fertilizer purposes) amounted to 2,163,732 tons. The more important items which were brought in were phosphate rock, 1,852,586 tons; superphosphate, 52,814 tons; potassium chloride (muriate of potash), 43,700 tons; and, potassium sulphate (sulphate of potash) 28,959 tons. The phosphate rock was used, of course, in Canadian fertilizer plants to make superphosphate and ammonium phosphate; similarly, most of the other imported materials were used in making mixed fertilizers.

Exports of materials (including potash) amounted to 8,472,850 tons. Exports of mixed fertilizers amounted to 157,035 tons.

## COMMERCE DES ENGRAIS

Les ventes d'engrais composés et de produits fertilisants utilisés en application directe, y compris les exportations, se sont élevées à 10,805,115 tonnes au cours de l'année terminée le 30 juin 1972. Les ventes aux consommateurs canadiens ont été de 2,175,230 tonnes, dont 1,171,355 tonnes de produits fertilisants et 1,003,875 d'engrais composés. Par rapport à l'année précédente, les ventes de produits fertilisants ont augmenté de .05 % et celles d'engrais composés, de .005 %.

Pendant la période en question, la production de produits fertilisants (y compris l'ammoniac anhydre non industriel utilisé pour application directe ou exporté) tels que le nitrate d'ammonium, le phosphate d'ammonium, le sulfate d'ammonium l'urée, le potasse, le phosphate, le superphosphate et la cyanamide, a atteint 10,336,160 tonnes, et celles d'engrais composés a été de 958,171 tonnes. Les chiffres sur les produits fertilisants et sur les engrais composés ne peuvent être additionnées, parce que certaines de la première catégorie ont servi à calculer ceux de la deuxième catégorie.

Les importations d'engrais (y compris certaines sortes d'ammoniac anhydre servant à fertiliser) se sont élevées à 2,163,732 tonnes. Les plus importants produits importés étaient le phosphate rocheux 1,852,586 tonnes; le superphosphate 52,814; la chlorure de potassium (muriate de potasse) 43,700; le sulfate de potassium (sulfate de potasse) 28,959. Le phosphate rocheux est entré dans la fabrication de superphosphate et phosphate d'ammonium dans les usines canadiennes. La plupart des autres produits importés ont également servi à la fabrication d'engrais composés.

Les exportations de produits fertilisants (y compris la potasse) ont été de 8,472,850 tonnes et celles d'engrais composés, de 157,035 tonnes.

1972 .....	948,555	14,761	435,926	817,607	21,045	300,705	4,151,105	52,052	3,974,278

- (1) Production: All nitrogenous materials plus "N" Content of non-industrial type anhydrous ammonia used for direct application and export. — Production: Tous les produits azotés plus la teneur en azote de l'ammoniaque anhydre non industriel utilisé pour application directe ou à des fins d'exportation.
- (2) Does not include nutrient content of mixes. — Ne comprend pas la teneur nutritive des mélanges.
- (3) Exports: Shipped for export by producers; not necessarily equivalent to export out of country as shown in "Trade of Canada - Exports". — Exportations: Expéditions des producteurs à des fins d'exportation; ne correspondent pas nécessairement aux exportations à l'extérieur du pays indiquées dans "Commerce du Canada - Exportations".
- (4) Exports: Includes nutrient quantity of all fertilizer material and nutrient quantity of all mixes. — Exportations: Comprend la quantité nutritive de tous les produits fertilisants et la quantité nutritive de tous les mélanges.
- (5) Source: Special monthly survey. — Source: Enquête mensuelle spéciale.
- (6) Imports: Imports, as reported in "Trade of Canada", of potassium chloride, potassium sulphate, sulphate of potash - magnesia. — Importations: Importations, telles que déclarées dans "Commerce du Canada", de chlorure de potassium, de sulfate de potassium et de sulfate de magnésie de potasse.
- (7) Revised on basis of K<sub>2</sub>O content. — Chiffres revisés d'après la teneur en K<sub>2</sub>O.

List of Reporting Firms

Listes des firmes déclarantes

Name — Nom	Plant location — Localisation de l'usine
<u>Prince Edward Island — Île-du-Prince-Édouard</u>
