SPECIAL REPORT

on the

SALES OF PEST CONTROL PRODUCTS BY CANADIAN REGISTRANTS, 1947

The Dominion Bureau of Statistics with the co-operation of the Department of Agriculture has just completed a special survey on the sales of pest control products by Canadian registrants during 1947. All establishments, including United States firms, registered with the Department of Agriculture to sell pest control products were asked to file a report in respect of their sales of these products. The procedure used in the survey and the results obtained are described in this bulletin.

The questionnaire classified sales according to end uses under which headings each of the products finding application was listed. For quantities, the units called for on the form were pounds and fluid ounces. The reason for using fluid ounces rather than pints, quarts, etc., is that such information is likely to be more accurate inasmuch as there is some confusion, for example, between 16 fluid ounce and 20 fluid ounce containers, both of which are often sold as pints.

As regards the selling value, the registrants were asked to report their sales on the wholesale level. At the same time, in order to eliminate duplication in the final summary of sales, each registrant was provided with a list of the registrants being circularized and asked to omit sales to any concern on the list.

A total of 569 questionnaires was mailed out and the response was approximately 85 per cent. However, some firms either reported no sales or sales to other registrants and as a result the number of firms actually reporting any sales on the consumer level was reduced to 342, or an effective rate of 60 per cent. These latter are listed in the directory at the back of the bulletin.

The value of pest control products sold by Canadian registrants in Canada during 1947 amounted to \$9,749,772 at wholesale prices. This total included agricultural dusts and sprays valued at \$3,936,426; livestock treatments at \$448,979; weedicides at \$1,046,248; household and industrial insecticides at \$1,560,631; disinfectants at \$2,549,288 and rodenticides at \$208,200.

Canadian exports of all products classified as pest control products reported by registrants were valued at \$193,413.
